Santa Fe, New Mexico 87501

Attention: Mr. R. L. Stamets
Director

Dear Sir:

Mobil Producing Texas and New Mexico, Inc. respectfully requests permission to amend Administrative Order PC-252 to permit the surface commingling of the Wantz-Abo production on the D. A. Williamson lease with the currently commingled Blinebry and Drinkard production on this lease. The D. A. Williamson lease comprises the NE/4 of Section 23, Township 23 - South, Range 37 East, Lea County, New Mexico. Ownership is common.

The commingled production will consist of approximately 140 barrels of oil per day (38.5° API) from the Wantz-Abo and 2 barrels of oil per day (36.9° API) from the commingled Blinebry and Drinkard. There will be no loss in commercial value by commingling the three zones. In fact, the commercial value should increase slightly as 2 bbls at 36.9° will be commingled with 100 + bbls. of 38.5° crude. This should result in all commingled crude with a 38° API gty. Please find the enclosed schematic of the proposed installation and plat of the lease. Production will be allocated on monthly well tests.

Very truly yours,

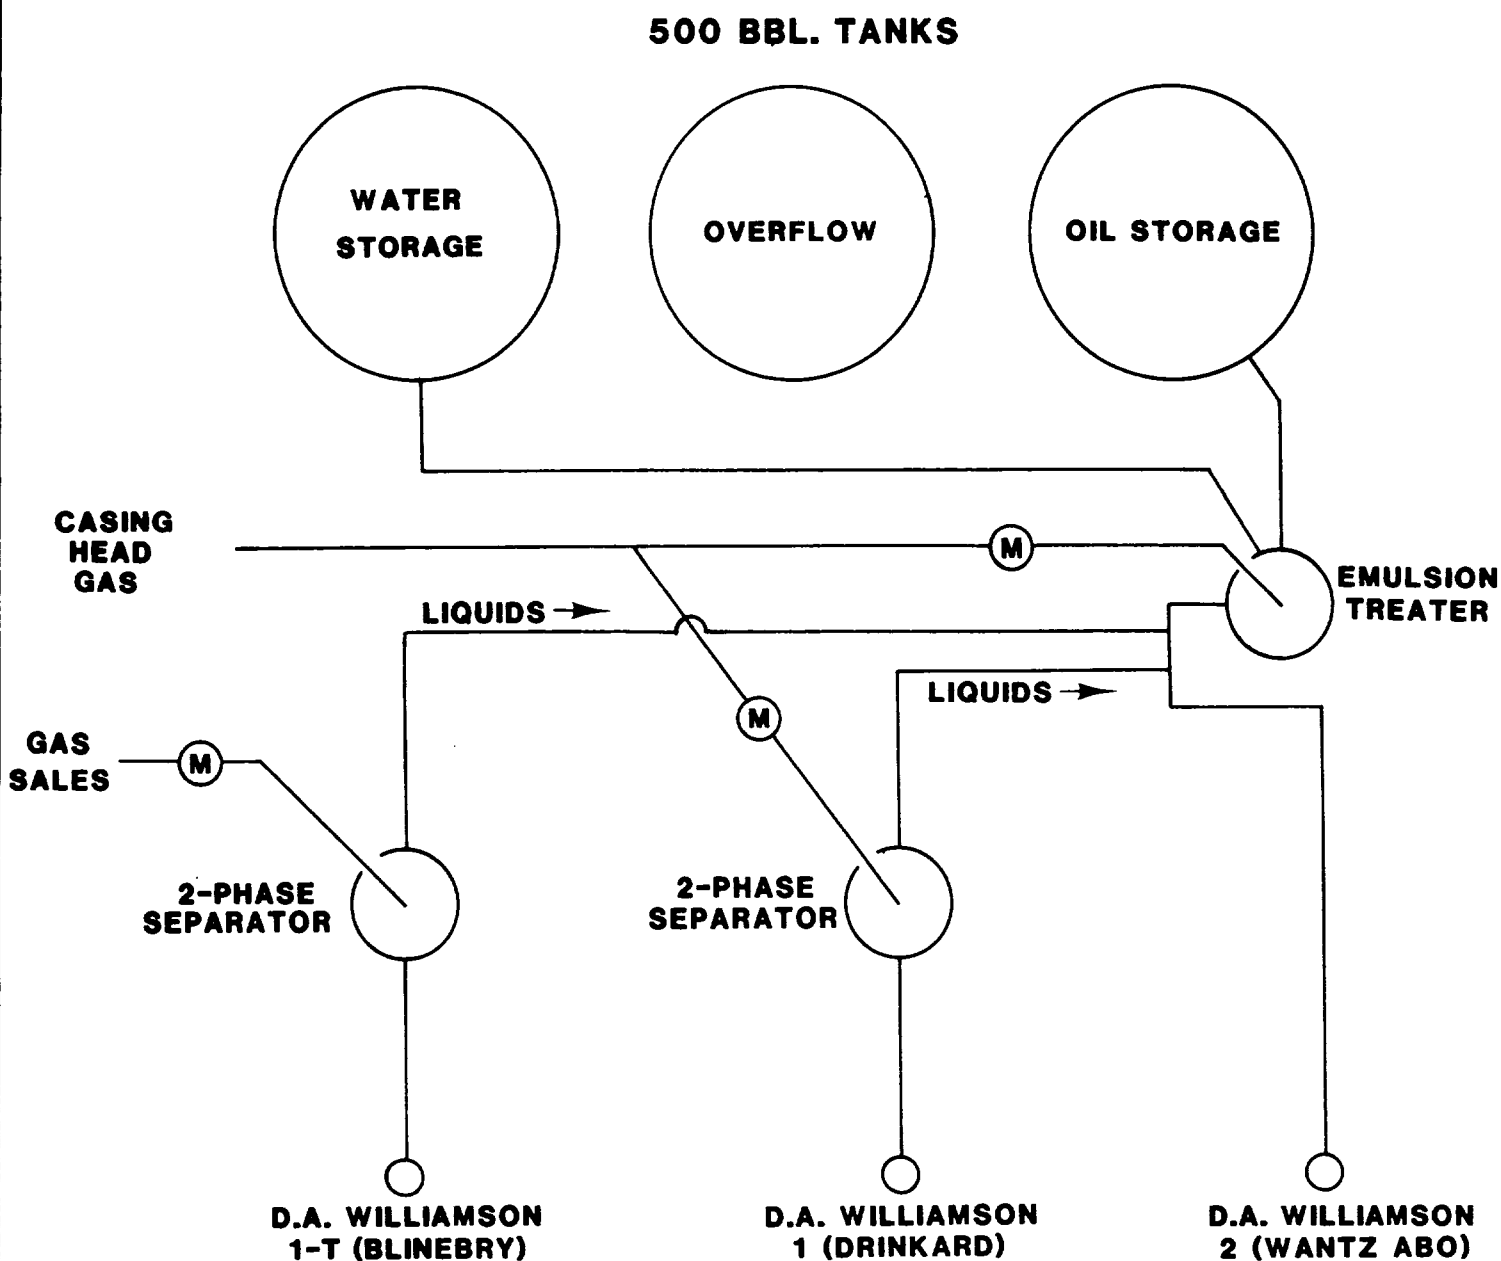

G. E. Tate
Environmental and Regulatory Manager
