Gentlemen:

Amendment To Present Commingling Order (PC-256) - Lockhart A-27 Lease

Order PC-256 as amended January 26, 1970, authorized commingling of Drinkard, Blinebry and Wantz Abo oil with Blinebry and Tubb distillate provided the Blinebry Gas, Tubb Gas and Drinkard Oil zone were measured separately.

All the production from this lease is now marginal except for No. 5 Drinkard, which has the ability to produce more than the daily gas allowable. We propose to revise the Lockhart A-27 Battery as shown on the attached schematic, metering No. 5 Drinkard separately and allocating all remaining production on the basis of periodic well tests.

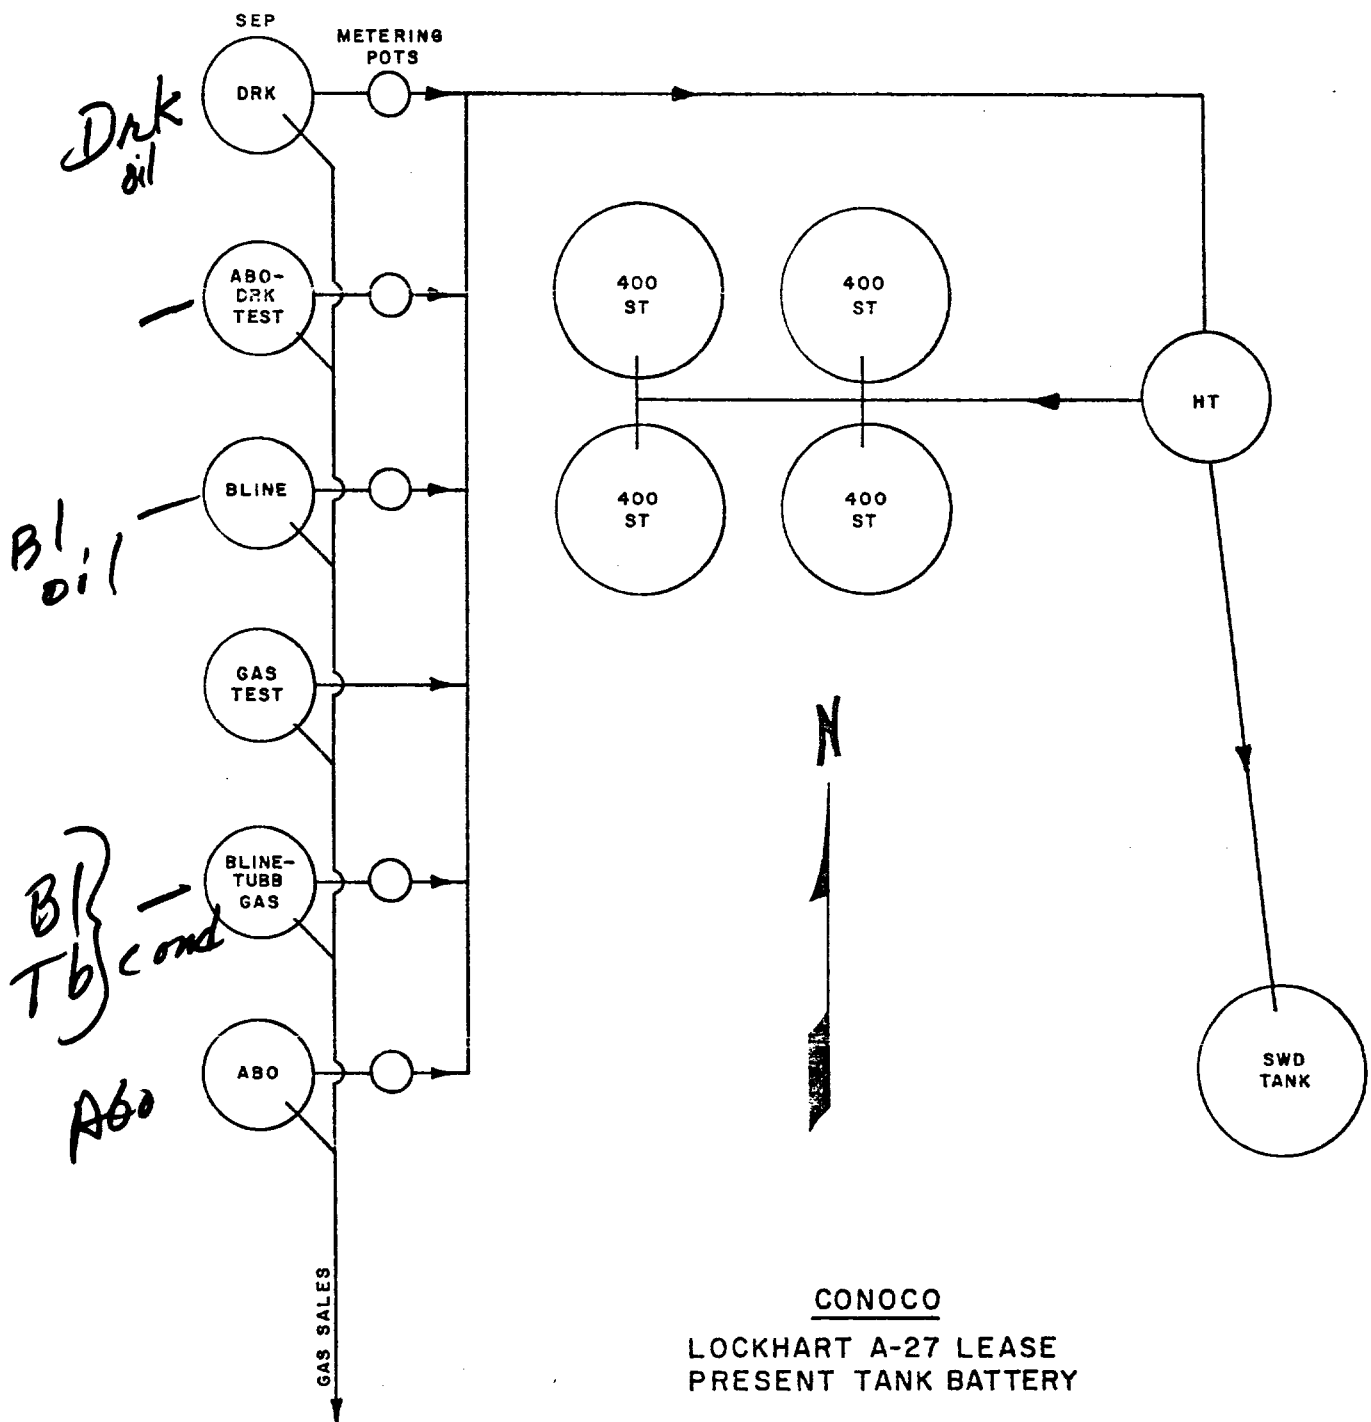

Attached is a letter of approval from U.S.G.S.

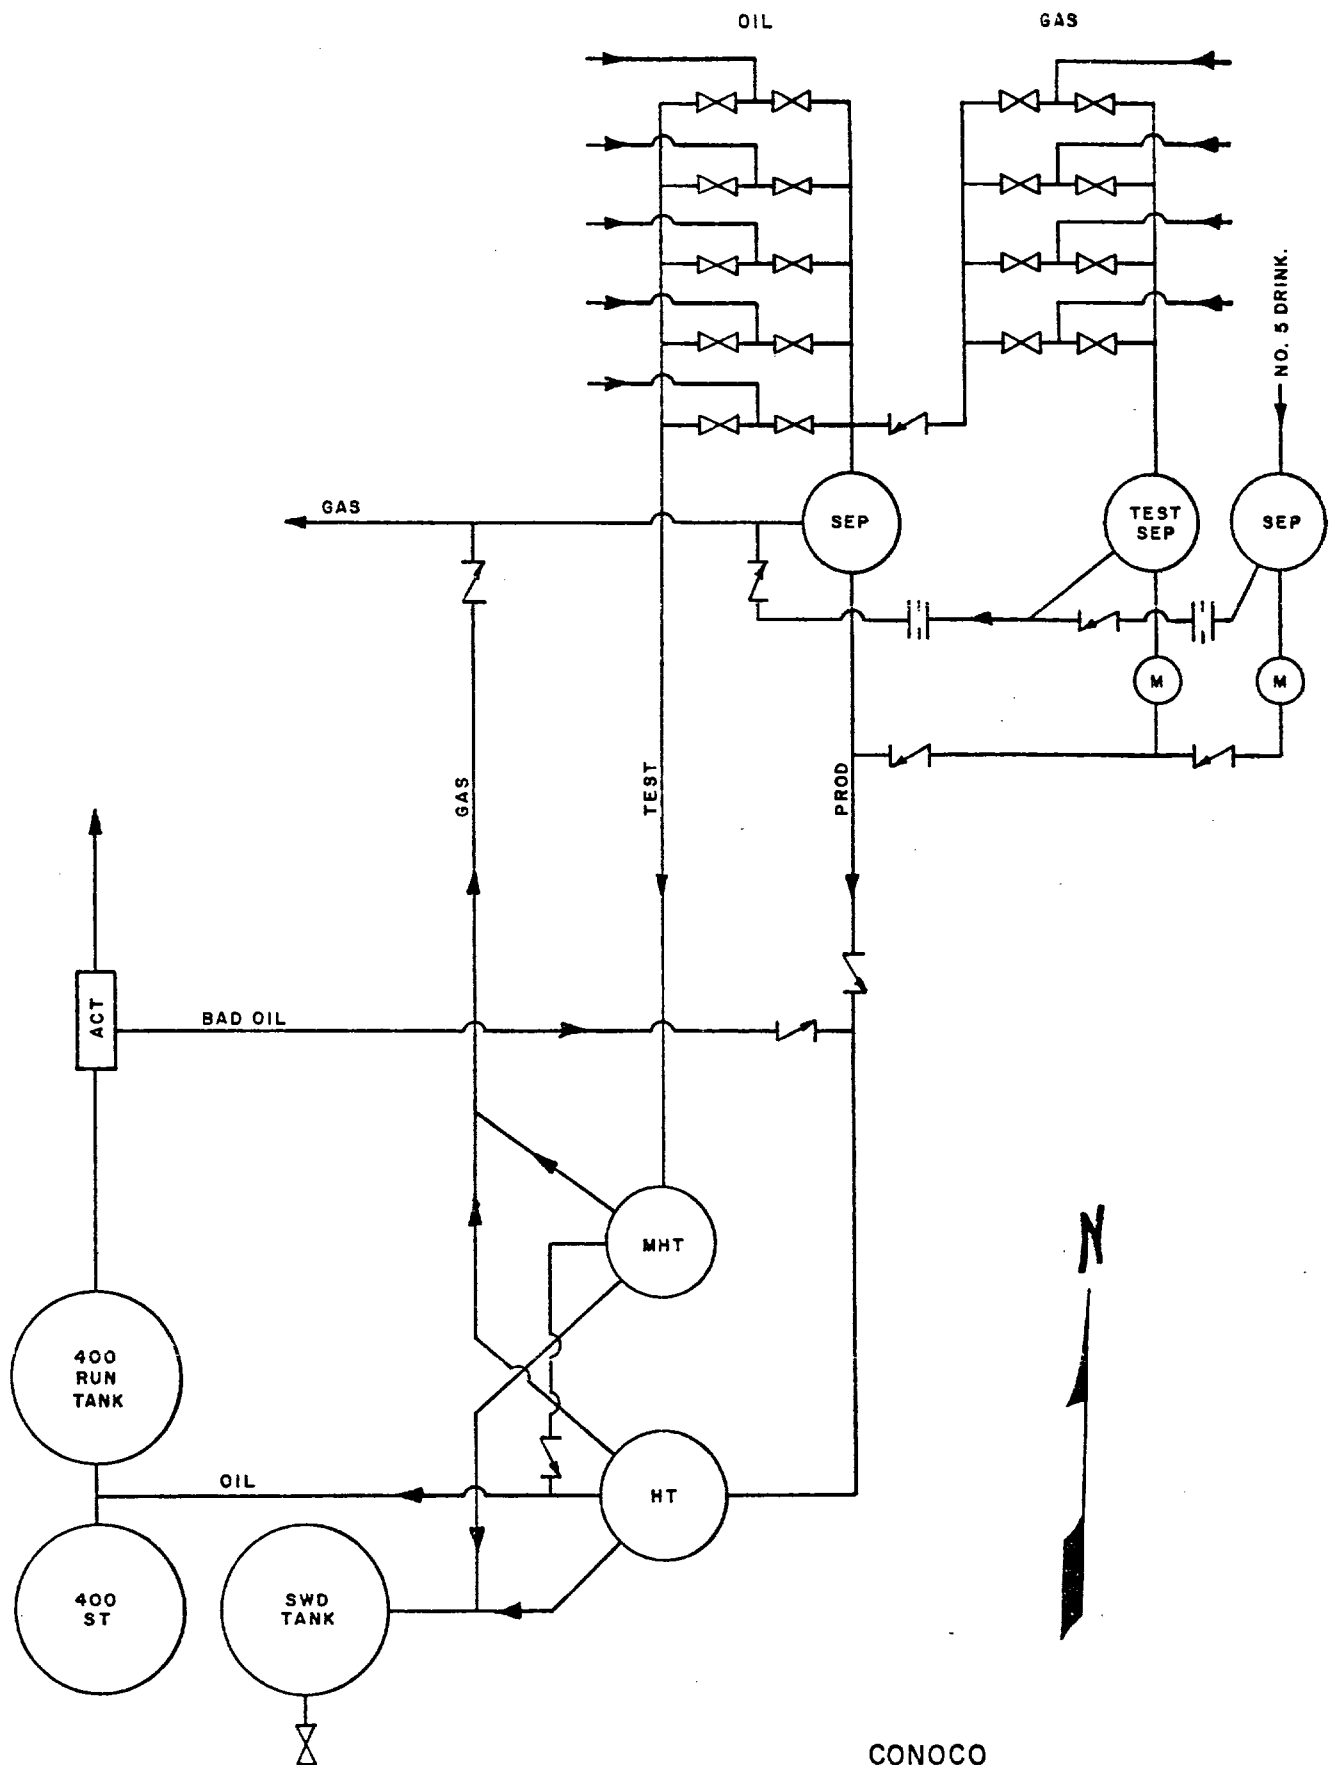

Your approval of the proposed amendment is respectfully requested.

Yours very truly,

*L. P. Thompson*

Gentlemen:

Your letter of January 11 requests approval to modify the commingling system approved by our letter of November 18, 1969, for your Lockhart A-27 lease in the N $\frac{1}{2}$  sec. 27, T. 21 S., R. 37 E., Lea County, New Mexico, lease Las Cruces 032096(a). You now propose to discontinue separate measurement of Blinebry Gas pool, Tubb Gas pool and Drinkard Oil pool production except that Drinkard production from well No. 5 will continue to be separately measured.

The system for commingling described in your letter is hereby approved subject to like approval by the New Mexico Oil Conservation Commission.

Please notify our Hobbs office when the installation is completed so that a field inspection of the system can be made.

Sincerely yours,

  
Arthur R. Brown  
District Engineer
