New Mexico Oil Conservation Commission
P. O. Box 2088

Attention: Mr. A. L. Porter, Jr.

Dear Sir:

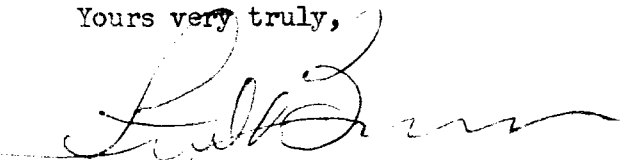

Sinclair Oil & Gas Company requests an exception to Statewide Rule 303 and administrative approval to comingling of oil produced from the Blinebry Oil Pool and Drinkard Oil Pool on the State 367 Lease located in the N/2 of the S/2, SW/4 of SW/4 and E/2 of NE/4 all in Section 36, T-21-S. R-37-E, Lea County, New Mexico.

It is expected that the Drinkard Oil will be too allowable but restricted because of high gas-oil ratio, whereas the Blinebry production is too allowable. It is proposed to meter the production from the Drinkard Oil and use the subtraction method to determine the Blinebry Oil production.

The gravity of the Blinebry Oil is 36° API and is valued at \$2.93 per barrel. The Drinkard Oil is 38° API and is valued at \$2.97 per barrel. The commercial value of the comingled production is calculated to be not less than the sum of the values of the production from each source.

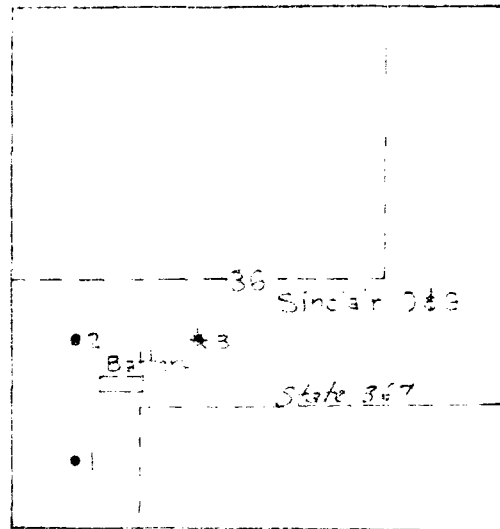

An early approval of this application will be appreciated.

Yours very truly,

W. F. BURNS,
Superintendent
