EXTENSION

Administrative Order PC-343

Gentlemen:

Reference is made to your letter of April 3, 1968, requesting an extension to Administrative Order PC-343 which order, dated January 18, 1968, authorized the commingling of Grayburg and San Andres production from Windfohr Oil Company's Well No. 38, located in the NE/4 NE/4 of Section 12, Township 17 South, Range 30 East, Eddy County, New Mexico, until April 1, 1968.

Administrative Order PC-343 is hereby extended until October 1, 1968, subject to like approval being obtained from the United States Geological Survey.

Very truly yours,

A. L. PORTER, Jr.
Secretary-Director

1. Exhibit to Order 60-343

of 1968

Reference is made to your letter of April 1, 1968, concerning the application for the administrative Order 60-343. In the body of said letter, you have authorized the Commission to conduct a geological survey of the area. The Commission's field work, located in the NW 1/4 of Section 13, Township 17 North, Range 30 East, New Mexico, was completed April 1, 1968.

The administrative Order 60-343 is hereby extended until October 1, 1968, subject to the approval being obtained from the United States Geological Survey.

Very truly yours,

J. H. BROWN, JR.
Executive Director

68 APR 4 AM 8 31

Gentlemen:

On December 1, 1967, Windfohr Oil Company requested your approval to commingle Grayburg oil production from their dually completed well #38 Grayburg Jackson (San Andres) Unit located in the NE/4 NE/4 of Section 12, Township 17 South, Range 30 East, on Lease LC-055264 with Grayburg production on segregated Lease NM-2747 (formerly LC-055264) in Section 1, Township 17 South, Range 30 East, Eddy County, New Mexico. The United States Geological Survey gave their temporary approval by letter dated January 5, 1968 until April 1, 1968. The New Mexico Oil Conservation Commission gave their temporary approval by letter dated January 18, 1968, Administrative Order PC-343, also until April 1, 1968. Since that time we have filed well tests on Oil Conservation Commission Forms #C-127 and these have been furnished to both the Oil Conservation Commission and United States Geological Survey.

This well is still being dually produced and at the present time it is pumping 10 barrels of oil per day from the Grayburg formation and 2 barrels of oil per day from the San Andres formation. We believe it is evident by this time that this is a marginal well in both zones and we are hereby requesting your permanent approval to continue commingling this Grayburg oil production.

Yours very truly,

Ralph L Gray
REGISTERED PETROLEUM ENGINEER.
