January 24, 1972

New Mexico Oil Conservation Commission (3)
P. O. Box 2088
Santa Fe, New Mexico 87501

REQUEST FOR AMENDMENT TO
ADMINISTRATIVE ORDER PC-362
MOBIL OIL CORPORATION'S
BRIDGES-STATE LEASE AND STATE "JJ"
LEASE, NORTH VACUUM ABO, VACUUM-
UPPER PENNSYLVANIAN, AND MORROW
FORMATIONS, VACUUM FIELD,
LEA COUNTY, NEW MEXICO

Gentlemen:

Mobil Oil Corporation respectfully requests that Administrative Order PC-362, dated October 29, 1968, be amended so as to permit the commingling of production from the afore-mentioned pools for certain wells in Section 7, T17S, R35E, in addition to Sections 10, 11, 12, 13, 14, 15 and 23, T17S, R34E, Lea County, New Mexico.

We further request that this amendment to Administrative Order PC-362 provide for allocation of production by well tests, as a continuance of that approval granted by the December 3, 1971 revision to Order PC-362 which deleted the metering requirement.

As shown on the attached tabulation of production for the months October 1971 and November 1971, the average daily production of all present wells of the commingled zones is below top unit allowable. Mobil understands that in the event any well producing into the commingled battery becomes capable of top allowable production, we are to promptly notify the Commission and proceed to comply with provisions of Rule 303 and the Commission "Manual for the Installation and Operation of Commingling Facilities".

Both subject leases and all pools in this application have common lease ownership, working interest ownership, royalty ownership and ORR ownership. The approval of the Commissioner of Public Lands for this application is attached for your convenience. Should any further information be required, please advise.

Yours very truly,

Ira B. Stitt

Division Operations Engineer
