**Re: Application for Administrative Approval of Unorthodox Location
Cross Timbers Operating Company's Ute Indians A-31 Well
Proposed Location: 800' FWL & 2,350' FSL of Sec. 26-T32N-R14W
Unit L, NW/4 SW/4, San Juan County, New Mexico
Dakota and Morrison Formation**

Dear Mr. Stogner:

Cross Timbers Operating Company hereby requests administrative approval for an unorthodox location for the captioned well. Attached for your reference are the following exhibits:

1. Well Location Plat (NMOCD Form C-102);
2. Topographic Map; and
3. Ownership map.

The Ute Indians A-31 well is a planned to test the Dakota and Morrison sands. The SW/4 of Section 26, being 160 acres, more or less, would be a standard gas spacing and proration unit for wildcat Morrison gas production and Ute Dome-Dakota Pool gas production. Current rules state that the well should be no closer than 660' to the outer boundary of the quarter section line. The proposed location will not conform to the current footage requirements. As shown on the attached topographic map, this location is the only suitable spot for this well in the SW/4 of Sec. 26 as we are building our location at the base of a Mesa that precludes us from moving any further south. The terrain becomes too rugged.

The SW/4 of Section 26 and all adjoining spacing units are included in a single 4,200-acre lease granted by the Ute Mountain Ute Tribe to Amoco. Since this lease is now owned by Cross Timbers, there are no other offset owners or operators notify.

By certified mail, a copy of this application for administrative approval has been sent to the parties listed hereinafter.

In summary, Cross Timbers is requesting administrative approval for the unorthodox location based on the information stated above. If additional information or clarification is needed, please contact me at (817) 885-2661.
