(30-05-35371)

Re: Application of Read & Stevens, Inc. for amendment of administrative Order NSL-4536 for approval of an unorthodox well location for its Liberty 4 Federal Well No. 1, to be located 1800 feet from the South line and 330 feet from the West line of Section 4, Township 20 South, Range 36 East, N.M.P.M., Lea County, New Mexico.

Dear Ms. Wrotenbery:

On December 27, 2001, the Oil Conservation Division entered Order NSL-4536 which approved the application of Read & Stevens, Inc. for an unorthodox well location in the Ellenberger and Devonian formations for its Liberty 4 Federal Well No. 1, to be located 1800 feet from the South line and 330 feet from the West line of Section 4, Township 20 South, Range 36 East, N.M.P.M., Lea County, New Mexico. The W/2 of Section 4 is to be dedicated to the well. Read & Stevens seeks to amend this application to also include the Wolfcamp, Strawn, Atoka and Morrow formations.

This location in the Wolfcamp, Strawn, Atoka and Morrow formations is unorthodox because Rule 104.C.(2) of the General Rules of the Oil Conservation Division provide for wells on 320-acre spacing and proration units to be located no closer than 660 feet to any governmental quarter section line. The proposed location is unorthodox because it is 330 feet too close to the West line of the dedicated acreage.

As shown in its original application, this unorthodox location in the Devonian and Ellenberger formations, the primary objectives in the well, is required by geologic conditions. The location was selected for these primary zones of interest based on a 3D seismic survey. Attached as Exhibit A to this application is the Devonian Time Structure Map of the subject area which shows the proposed

Lori Wrotenbery, Director Oil Conservation Division February 20, 2001 Page Two

location and the nearest standard location. The map demonstrates that moving to the proposed unorthodox location results in substantial gain in reservoir quality rock. Furthermore, drilling at a location 660 feet from the quarter section line would place the well near a high angle compressional fault and would place the well in a much thinner portion of the sand where the chances of drilling a successful well would be greatly reduced. Accordingly, the proposed location is the best location for a commercial Devonain and or Ellenberger well in the W/2 of Section 4.

Read & Stevens, Inc. has determined that if the well is unsuccessful in the Devonian and Ellenberger formations, it will plug back and attempt a completion in the Pennsylvanian formations (Wolfcamp, Strawn, Atoka and Morrow) in this well. The basis for the unorthodox locations in these shallower formations is not only the availability of the well bore which will be drilled to test the Devonian and Ellenberger formations, but is also the same geological data presented in support of the location in the Devonian and Ellenberger formations. In attempting to drill a well to these Pennsylvanian formations, Read & Stevens, Inc. needs to stay west of the fault shown on Exhibit A to enable it to complete the well in a favorable geologic position. Accordingly, Read & Stevens, Inc. seeks amendment of Order NSL-4536 to add the Wolfcamp, Strawn, Atoka and Morrow formations.

Attached as Exhibit B is a plat required by Division Rule 104.F (3) showing the subject spacing unit, the proposed unorthodox well location, the offsetting wells and the diagonal and adjoining spacing units. Although Read & Stevens is the designated operator of all the immediately adjoining and diagonal spacing units in the Pennsylvanian formations toward which the unorthodox well location encroaches, the mineral owners are different under these tracts. Exhibit C lists these interest owners. A copy of this application, including a copy of the plat described above has been sent to these persons by certified mail-return receipt requested in accordance with Rule 1207 (A) (5) advising them that if they have an objection to this application it must be filed in writing within twenty days from the day this notice was sent.

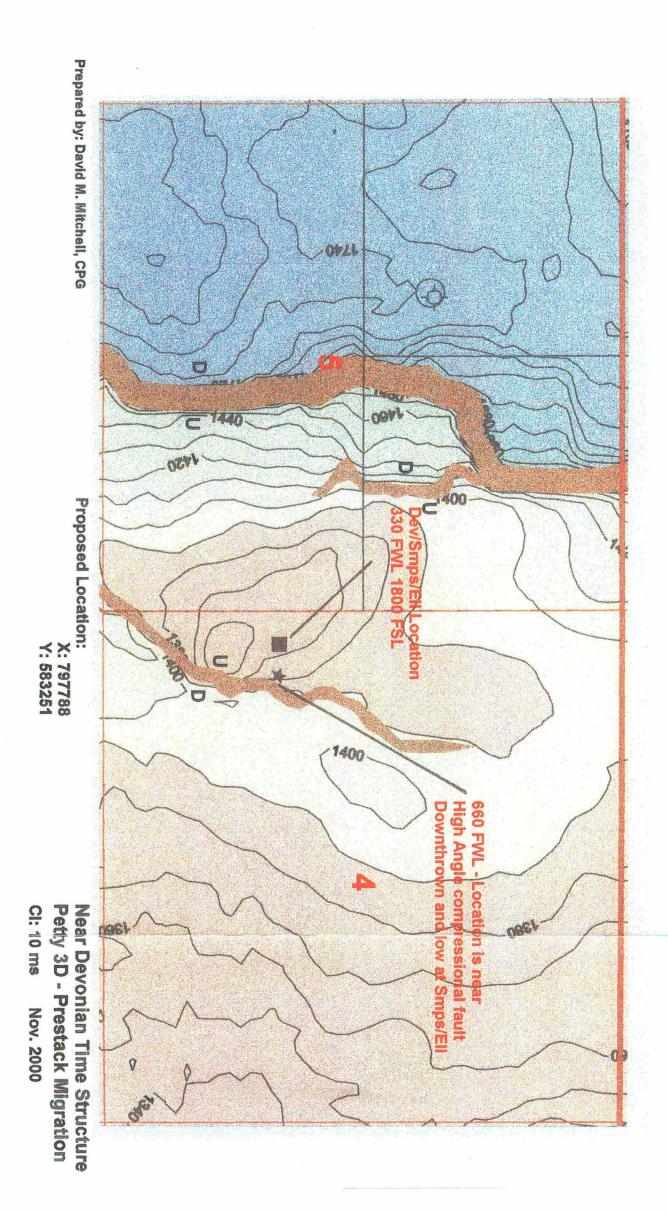

Your attention to this application is appreciated.

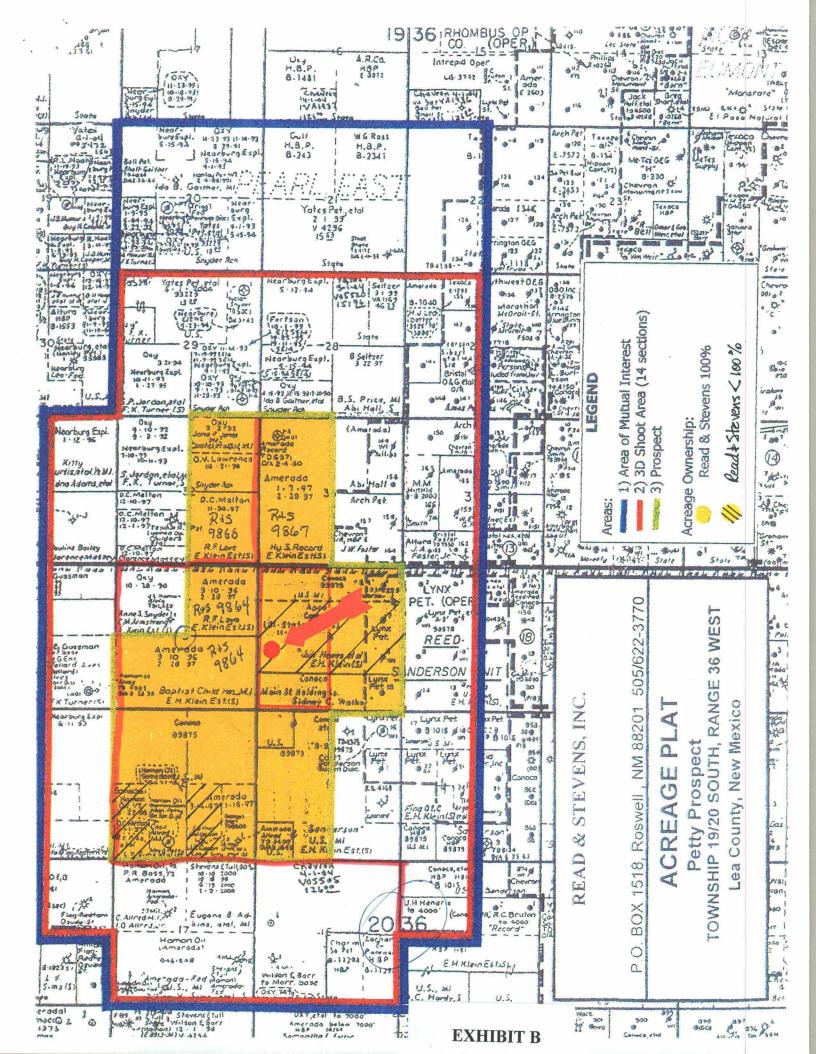

very truly yours

William F. Carr

Attorney for Read & Stevens, Inc.

Attention:

William F. Carr

Re:

Administrative application to amend NSL-4536 to include

the Wolfcamp, Strawn, Atoka, and Morrow formations.

Dear Mr. Carr:

My review of your application dated February 20, 2001 indicates the location of Read & Stevens, Inc.'s proposed Liberty "4" Com. Well No. 1 (API No. 30-025-35371) to be drilled 1800 feet from the South line and 330 feet from the West line (Unit L) of Section 4, Township 20 South, Range 36 East, NMPM, Lea County, New Mexico is within the governing limits (one mile) of the North Osudo-Morrow Gas, which requires 640-acre spacing units and for wells to be located no closer than 1650 feet from the unit boundary Pool (see copy of Division Orders No. R-3305 and R-3305-A, attached).

Please advise. I will hold this application pending your response. Thank you.

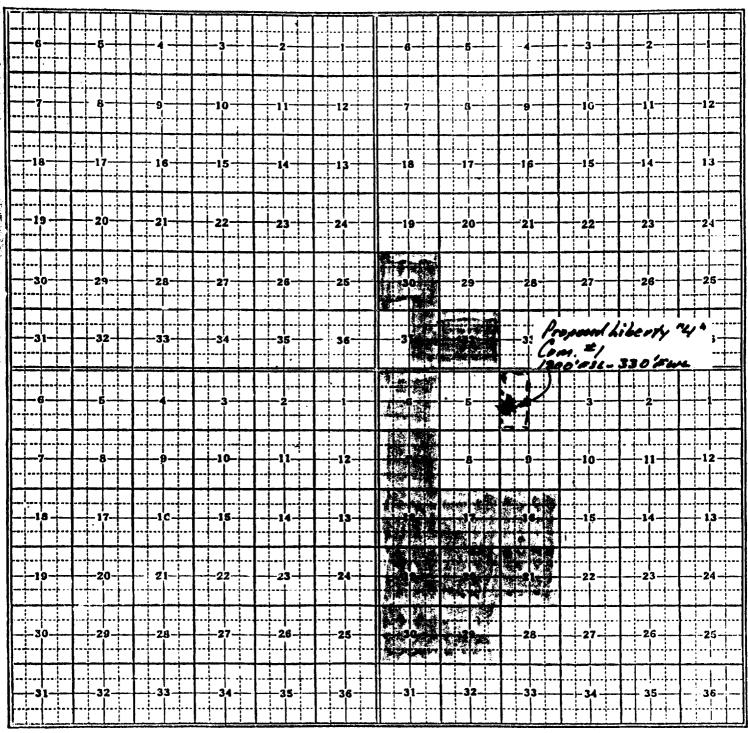

Sincerely,

Michael E. Stogner

# BEFORE THE OIL CONSERVATION COMMISSION OF THE STATE OF NEW MEXICO

IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION COMMISSION OF NEW MEXICO FOR THE PURPOSE OF CONSIDERING:

> CASE No. 3642 Order No. R-3305 NOMENCLATURE

APPLICATION OF PAN AMERICAN PETROLEUM CORPORATION FOR SPECIAL POOL RULES, LEA COUNTY, NEW MEXICO.

#### ORDER OF THE COMMISSION

#### BY THE COMMISSION:

This cause came on for hearing at 9 a.m. on August 23, 1967, at Santa Fe, New Mexico, before Examiner Elvis A. Utz.

NOW, on this 29th day of August, 1967, the Commission, a quorum being present, having considered the tesitmony, the record, and the recommendations of the Examiner, and being fully advised in the premises,

#### FINDS:

- (1) That due public notice having been given as required by law, the Commission has jurisdiction of this cause and the subject matter thereof.
- (2) That the applicant, Pan American Petroleum Corporation, seeks the promulgation of special rules and regulations for the North Osudo-Morrow Gas Pool, Lea County, New Mexico, including a provision for 640-acre spacing units and specified well locations.
- (3) That in order to prevent the economic loss caused by the drilling of unnecessary wells, to avoid the augmentation of risk arising from the drilling of an excessive number of wells, to prevent reduced recovery which might result from the drilling of too few wells, and to otherwise prevent waste and protect correlative rights, temporary special rules and regulations providing for 640-acre spacing units should be promulgated for the North Osudo-Morrow Gas Pool.

-2-CASE No. 3642 Order No. R-3305

- (4) That the temporary special rules and regulations should provide for limited well locations in order to assure orderly development of the pool and protect correlative rights.
- (5) That the temporary special rules and regulations should be established for a one-year period in order to all we the operators in the subject pool to gather reservoir information to establish the area that can be efficiently and economically drained and developed by one well.
- (6) That this case should be reopened at an examiner hearing in August, 1968, at which time the operators in the subject pool should be prepared to appear and show cause why the North Osudo-Morrow Gas Pool should not be developed on 320-acre spacing units.
- (7) That the horizontal limits of the subject pool, as here-tofore classified, defined, and described, should be extended to include therein:

#### TOWNSHIP 20 SOUTH, RANGE 36 EAST, NMPM

Section 17: N/2 Section 20: S/2 Section 30: W/2

#### IT IS THEREFORE ORDERED:

(1) That the horizontal limits of the North Osudo-Morrow Gas Pool in Lea County, New Mexico, as heretofore classified, defined, and described, are hereby extended to include therein:

#### TOWNSHIP 20 SOUTH, RANGE 36 EAST, NMPM

Section 17: N/2 Section 20: S/2 Section 30: W/2

(2) That temporary Special Rules and Regulations for the North Osudo-Morrow Gas Pool are hereby promulgated as follows:

# SPECIAL RULES AND REGULATIONS FOR THE NORTH OSUDO-MORROW GAS POOL

RULE 1. Each well completed or recompleted in the North
Osudo-Morrow Gas Pool or in the Morrow formation within one mile

-3-CASE No. 3642 Order No. R-3305

thereof, and not nearer to or within the limits of another designated Morrow gas pool, shall be spaced, drilled, operated, and produced in accordance with the Special Rules and Regulations hereinafter set forth.

- RULE 2. Each well shall be located on a standard unit containing 640 acres, more or less, consisting of a governmental section.
- RULE 3. The Secretary-Director of the Commission may grant an exception to the requirements of Rule 2 without notice and hearing when an application has been filed for a non-standard unit and the unorthodox size or shape of the unit is necessitated by a variation in the legal subdivision of the United States Public Land Surveys, or the following facts exist and the following provisions are complied with:
  - (a) The non-standard unit consists of quarterquarter sections or lots that are contiguous by a common bordering side.
  - (b) The non-standard unit lies wholly within a governmental section and contains less acreage than a standard unit.
  - (c) The applicant presents written consent in the form of waivers from all offset operators and from all operators owning interests in the section in which the non-standard unit is situated and which acreage is not included in said non-standard unit.
  - (d) In lieu of paragraph (c) of this rule, the applicant may furnish proof of the fact that all of the aforesaid operators were notified by registered or certified mail of his intent to form such non-standard unit. The Secretary-Director may approve the application if no such operator has entered an objection to the formation of such non-standard unit within 30 days after the Secretary-Director has received the application.
- RULE 4. Each well shall be located no nearer than 1650 feet to the outer boundary of the section and no nearer than 330 feet to any governmental quarter-quarter section line.

-4-CASE No. 3642 Order No. R-3305

RULE 5. The Secretary-Director may grant an exception to the requirements of Rule 4 without notice and hearing when an application has been filed for an unorthodox location necessitated by topographical conditions or the recompletion of a well previously drilled to another horizon. All operators offsetting the proposed location shall be notified of the application by registered or certified mail, and the application shall state that such notice has been furnished. The Secretary-Director may approve the application upon receipt of written waivers from all operators offsetting the proposed location or if no objection to the unorthodox location has been entered within 20 days after the Secretary-Director has received the application.

#### IT IS FURTHER ORDERED:

- (1) That the locations of all wells presently drilling to or completed in the North Osudo-Morrow Gas Pool or in the Morrow formation within one mile thereof are hereby approved; that the operator of any well having an unorthodox location shall notify the Hobbs District Office of the Commission in writing of the name and location of the well on or before September 15, 1967.
- (2) That any operator desiring to dedicate acreage pursuant to Rule 2 to a well presently drilling to or completed in the North Osudo-Morrow Gas Pool shall file a new Form C-102 with the Commission on or before September 15, 1967.
- (3) That this case shall be reopened at an examiner hearing in August, 1968, at which time the operators in the subject pool may appear and show cause why the North Osudo-Morrow Gas Pool should not be developed on 320-acre spacing units.
- (4) That jurisdiction of this cause is retained for the entry of such further orders as the Commission may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year here nabove designated.

#### HAND DELIVERED

Michael E. Stogner
Chief Hearing Officer and Engineer
Oil Conservation Division
New Mexico Energy, Minerals and
Natural Resources Department
1220 South Saint Francis Drive
Santa Fe. New Mexico 87505

Application of Read & Stevens, Inc. for amendment of administrative Order NSL-4536 for approval of an unorthodox well location for its Liberty 4 Federal Well No. 1, to be located 1800 feet from the South line and 330 feet from the West line of Section 4, Township 20 South, Range

Dear Mr. Stogner:

On December 27, 2001, the Oil Conservation Division entered Order NSL-4536 which approved the application of Read & Stevens, Inc. for an unorthodox well location in the Ellenberger and Devonian formations for its Liberty 4 Federal Well No. 1, to be located 1800 feet from the South line and 330 feet from the West line of Section 4, Township 20 South, Range 36 East, N.M.P.M., Lea County, New Mexico. The W/2 of Section 4 is to be dedicated to the well. On February 20, 2001, Read & Stevens filed an application to amend NSL-4536 to also include the Wolfcamp, Strawn, Atoka and Morrow formations.

36 East, N.M.P.M., Lea County, New Mexico.

By letter dated March 16, 2001, you advised Read & Stevens, Inc., that the proposed well location was within one mile of the North Osudo-Morrow Gas Pool which is governed by Special Pool Rules and Regulations which provide for 640-acre spacing units with wells to be located 1650 feet from the outer boundary of the spacing unit. Read & Stevens was advised that the application would be held pending a response.

Read & Stevens has reviewed their geological interpretation of the Morrow formation in this area and concluded that the Morrow is not a prospect in this well. Accordingly,

Michael E. Stogner May 9, 2001 Page 2

Read & Stevens withdraws its application to amend Order No. NSL-4536 to include the Morrow. On February 20, 2001 Read & Stevens notified all affected parties of our application to amend Order NSL-4536 -- including the Morrow formation. Since there was no objection to that proposed amendment and since what Read & Stevens now seeks is less than what it sought in February, Read & Stevens requests that this application, as amended by the deletion of the Morrow formation, be approved without additional notice to affected persons.

You attention to this request is appreciated.

Vety truly yours

William F. Carr

Administrative Order NSL-4536

Dear Mr. Carr:

Reference is made to the following: (i) your application on behalf of the operator, Read & Stevens, Inc. dated December 6, 2000; and (ii) the records of the New Mexico Oil Conservation Division ("Division") in Santa Fe: all concerning Read & Stevens, Inc.'s request for an unorthodox wildcat gas well location in both the Devonian and deeper Ellenburger formations for its proposed Liberty "4" Federal Com Well No. 1 to be drilled 1800 feet from the South line and 330 feet from the West line (Unit L) of Section 4, Township 20 South, Range 36 East, NMPM, Lea County, New Mexico.

Lots 3 and 4, the S/2 NW/4, and the SW/4 (W/2 equivalent) of Section 4, being a standard 320.29-acre stand-up gas spacing and proration unit for both formations is to be dedicated to this well.

This application has been duly filed under the provisions of Division Rule 104.F, revised by Division Order No. R-11231, issued by the New Mexico Oil Conservation Commission in Case No. 12119 on August 12, 1999.

It is our understanding that Read & Stevens, Inc. is seeking this location exception based on a 3-D seismic survey of the immediate area, which indicates that a well drilled at the proposed unorthodox gas well location will be at a more favorable geologic position within the shallower Devonian formation then a well drilled at a location considered to be standard within the W/2 equivalent of Section 4.

By the authority granted me under the provisions of Division Rule 104.F (2), the above-described unorthodox wildcat gas well location to both the Devonian and Ellenburger formations within this 320.29-acre unit comprising the W/2 equivalent of Section 4 is hereby approved.

Sincerely.

Lori Wrotenbery

Director

LW/MES/kv
