REQUEST FOR ADMINISTRATIVE APPROVAL FOR NON-STANDARD LOCATION
FOR RICHARDSON OPERATING CO.

RPC 17 #4 GAS WELL

562' FSL & 1392' FEL SEC. 17, T. 29 N., R. 13 W., SAN JUAN COUNTY, NM

I. The well is on private surface and on a private oil and gas lease. The proposed location is non-standard for the West Kutz Pictured Cliffs due to topography and surface uses. The well must be at least 660' from all quarter section lines. This well is 562' from the south line of the southeast quarter of Section 17. Thus, it is 98' too far south. Richardson controls the Pictured Cliff rights to the south and has already staked a standard location in the northeast quarter of Section 20. Richardson operates a standard Pictured Cliffs well (Eaton White #1) in the northwest quarter of Section 20. The APD (Exhibit A) is attached.

II. A C-102 (Exhibit B) showing the well location and proration unit (hatched line marking the southeast quarter = 160 acres) for the Pictured Cliffs is attached. Richardson's leasehold (= solid line) is shown on the attached copy (Exhibit C) of the Farmington South USGS topo map. The well is 2,423' from the closest non-Richardson operated lease. A standard location would be closer to the exterior of the lease.

III. According to NM Oil Conservation Records reviewed in their Santa Fe office on December 12, 2001 and on line on December 21, 2001; there is no production from the Pictured Cliffs within a minimum 2,863' radius. Closest such well is Richardson's White #1 at 1450' FNL & 1850' FWL 20-29n-13w. A copy of the Farmington South 7.5' USGS map (Exhibit D) is attached showing the proposed well site, existing producing wells (3 Dakota and 3 PC {all Richardson}), and 21 plugged and abandoned wells. Richardson is the operator of its fee lease and leases within a minimum 2,423'. Registered letters were sent on December 22, 2001 to the offset interest owners. A copy of the receipts and letters will be provided.

IV. A copy of the Farmington South USGS map is attached (Exhibit E). The proposed well site is marked. Pictured Cliffs' proration unit (solid line) is all of the southeast quarter of Section 17, which is 160.00 acres in size. A

dashed line marks the standard drilling window.

V. Topography is one reason forcing a non-standard location. The center of the drilling window is bisected by the San Juan River and its floodplain (see Exhibit E).

VI. Archaeology is not an issue.

VII. The non-standard location is requested because of surface conditions. One-fourth of the drilling window (see dashed line on attached assessor's plat (Exhibit F)) is inside the Farmington City Limits. NM 371 cuts a slice out of the drilling window. Other manmade impediments inside the drilling window include a nursing home, large gas station, trucking company, church, and houses. Surface owners with land in the drilling window were approached about drilling on their land. None accepted. Finally, an owner just south of the window agreed - provided Richardson would buy their acre. Richardson did. In order for Richardson to even be close to the drilling window, Richardson had to stake a smaller than normal pad (see pad plan view on (Exhibit G).

VIII. Directional drilling is not a feasible for such a shallow well.

IX. I hereby certify that notice has been sent to the following lessees, lessors, operators of spacing units, or owners of undrilled leases which adjoin the applicant's spacing unit on one or more of the two sides or the single closest corner to the proposed well and that the information is current and correct:

As required by New Mexico Oil Conservation Division Rules, I am notifying you of the following non-standard location for a well. This letter is a notice only. No action is needed unless you have questions or objections.

Richardson Operating Co. is applying to drill its RPC 17 #4 gas well. The minimum distance from a Pictured Cliffs gas well to a quarter section line is 660'. Due to surface conditions, the well is 562' from the south line of the section, or 98' less than the standard minimum. Thus, it is a non-standard location. The proposed well is 2,863' from the closest Pictured Cliffs producer (Richardson's White #1 well). See attached map for more details.

Well Name: RPC 17 #4 Total Depth: 1,150'
Proposed Producing Zone: Pictured Cliffs sandstone
Acreage Dedication: 160.00 acres (southeast quarter of Section 17)
Location: 562' FSL & 1392' FEL Sec. 17, T. 29 N., R. 13 W.,
San Juan County, NM on a private lease
Approximate Location: ≈1/4 air mile southwest of Farmington, NM
Applicant Name: Richardson Operating Co. (303) 830-8000
Applicant's Address: 1700 Lincoln St., Suite 1700, Denver, Co. 80203

Submittal Information: Application for a non-standard location will be filed with the NM Oil Conservation Division. If they determine the application complies with the applicable regulations, then it will be approved. The New Mexico Oil Conservation Division address is 2040 S. Pacheco, Santa Fe, NM 87504. Their phone number is (505) 827-7131.

As required by New Mexico Oil Conservation Division Rules, I am notifying you of the following non-standard location for a well. This letter is a notice only. No action is needed unless you have questions or objections.

Richardson Operating Co. is applying to drill its RPC 17 #4 gas well. The minimum distance from a Pictured Cliffs gas well to a quarter section line is 660'. Due to surface conditions, the well is 562' from the south line of the section, or 98' less than the standard minimum. Thus, it is a non-standard location. The proposed well is 2,863' from the closest Pictured Cliffs producer (Richardson's White #1 well). See attached map for more details.

Well Name: RPC 17 #4 Total Depth: 1,150'
Proposed Producing Zone: Pictured Cliffs sandstone
Acreage Dedication: 160.00 acres (southeast quarter of Section 17)
Location: 562' FSL & 1392' FEL Sec. 17, T. 29 N., R. 13 W.,
San Juan County, NM on a private lease
Approximate Location: ≈1/4 air mile southwest of Farmington, NM
Applicant Name: Richardson Operating Co. (303) 830-8000
Applicant's Address: 1700 Lincoln St., Suite 1700, Denver, Co. 80203

Submittal Information: Application for a non-standard location will be filed with the NM Oil Conservation Division. If they determine the application complies with the applicable regulations, then it will be approved. The New Mexico Oil Conservation Division address is 2040 S. Pacheco, Santa Fe, NM 87504. Their phone number is (505) 827-7131.

To: Stogner, Michael
Subject: RPC 17 #4

Mike,
I just received an app. for NSL on the RPC 17 #4 in O, 17, 29N, 13W. This seems to be OK based on topo as the San Juan River pretty much cuts out the window north of the location.
