REQUEST FOR ADMINISTRATIVE APPROVAL FOR NON-STANDARD LOCATION
FOR RICHARDSON OPERATING CO.
NV NAVAJO 28 #2 GAS WELL
240' FNL & 1940' FWL SEC. 28, T. 29 N., R. 14 W., SAN JUAN COUNTY, NM

I. The well is on Navajo Tribal Trust surface and on Navajo Tribal Trust oil and gas lease 14-20-603-2168. The proposed location is non-standard for the West Kutz Pictured Cliffs due to land use (irrigated center pivot NAPI field). The well must be at least 660' from all quarter section lines. This proposed well is 240' from the north line of Section 28. Thus, it is 420' too far north. It is non-standard to the southwest quarter of Section 21. Richardson controls the Pictured Cliff rights to the north on its Navajo Tribal Trust lease 14-20-603-2199 and already has filed APDs for standard locations in Section 20 and 21. The NV Navajo 20 #4 is 3,423' northwest at 1975 FSL & 670 FEL 20-29n-14w. The NV Navajo 21 #3 is 2,263' north at 1660 FSL & 710 FWL 21-29n-14w. The NV Navajo 21 #4 is 3,268' northeast at 1780 FSL & 770 FWL 21-29n-14w. The NV Navajo 28 #2 APD (Exhibit A) is attached.

II. A C-102 (Exhibit B) showing the well location and pro ration unit (dashed line marking the northwest quarter = 160 acres) for the Pictured Cliffs is attached. Richardson's lease 14-20-603-2168 (= solid line) is shown on the attached copy (Exhibit C) of the Kirtland USGS topo map. The well is 1,940' from the closest non-Richardson operated lease.

III. According to NM Oil Conservation Records; there is no production from the Pictured Cliffs within a minimum 2,298' radius. Closest such well is Richardson's NV Navajo 28 #1 at 1570' FNL & 1465' FEL 28-29n-14w. A copy of the Kirtland 7.5' USGS map (Exhibit D) is attached showing the proposed well site, existing producing wells (5 Gallup oil wells or water injection wells, 3 Pictured Cliffs and/or Fruitland {all Richardson}), and 7 plugged and abandoned wells within a mile. Richardson is the operator of all leases within a minimum 1,940'. A registered letter was sent on September 9, 2002 to the only affected interest owner (Navajo Nation Minerals Department). A copy of the receipt will be provided.

IV. A copy of the Kirtland USGS map is attached (Exhibit E). The proposed

well site is marked. Pictured Cliffs pro ration unit (solid line) is all of the northwest quarter of Section 28, which is 160 acres in size. A dotted line marks the standard drilling window. Existing pro ration units for the Pictured Cliffs are similarly depicted. The southwest quarter of Section 28 and all of Section 29 are currently unleased Tribal minerals.

V. Land use forces a non-standard location. The entire drilling window is covered by a center pivot irrigated NAPI field (see air photograph Exhibit F).

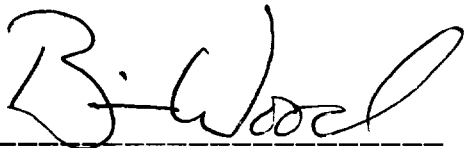

VI. Archaeology is not an issue.

VII. The non-standard location is requested because of surface conditions. All of the drilling window (see air photo Exhibit F) is in an irrigated field.

VIII. Directional drilling is not a feasible for such a shallow well.

IX. I hereby certify that notice has been sent to the following lessees, lessors, operators of spacing units, or owners of undrilled leases which adjoin the applicant's spacing unit on one or more of the two sides or the single closest corner to the proposed well and that the information is current and correct:

Dear Akhtar,

As required by New Mexico Oil Conservation Division Rules, I am notifying you of the following non-standard location for a well. This letter is a notice only. No action is needed unless you have questions or objections.

Richardson Operating Co. is applying to drill its NV Navajo 28 #2 gas well. The minimum distance from a gas well to a quarter section line is 660'. Due to surface conditions (NAPI irrigated field), the well is 240' from the north line of the section, or 420' less than the standard minimum. Thus, it is a non-standard location. The proposed well is 2,298' from the closest existing or proposed gas well (Richardson's NV Navajo 16 #1). See attached map for more details.
