Dear Mr. Lange:

Reference is made to the following: (i) your application dated October 13, 1999; and (ii) the records of the New Mexico Oil Conservation Division ("Division") in Santa Fe: all concerning Arch Petroleum Inc.'s ("Arch") request to reactivate a previously approved 80.08-acre non-standard gas spacing and proration unit in the Tubb Oil and Gas Pool ("GPU") comprising the following acreage and to exchange the well dedication of this GPU:

This GPU was approved by and the subject to: (i) Division Administrative Order NSP-352, dated February 22, 1957; (ii) Division Administrative Order NSP-352-A (L) dated April 4, 1995; and (iii) a reconfirmation order by letter dated December 26, 1996. This GPU, from its inception, has been dedicated to Arch's Lee Stebbins (NCT-B) Well No. 3 (API No. 30-025-10061), located at an unorthodox gas well location 660 feet from the North line and 460 feet from the East line (Lot 1/Unit A) of Section 5. By authority granted me under the provisions of **Rule 2(d)** of the "*General Rules for the Prorated Gas Pools of New Mexico/Special Rules and Regulations for the Tubb Oil and Gas Pool*", as promulgated by Division Order No. R-8170, as amended, the above-described 80.08-acre GPU, to be dedicated to Arch's above-described Lee Stebbins (NCT-B) Well No. 4, is hereby approved. Also, Arch is hereby permitted to produce the allowable assigned the subject GPU, in accordance with Rule 5 of the pool rules based upon a unit size of 80.08 acres.
