Post Office Box 68  
Hobbs, New Mexico

April 17, 1958

File: RLH-249-400.1

Subject: Application for Administrative  
Approval to Dual Complete and for  
a Non-Standard Proration Unit -  
W. H. Turner No. 1, Eumont Field

Mr. A. L. Porter (3)  
New Mexico Oil Conservation Commission  
Post Office Box 871  
Santa Fe, New Mexico

Dear Sir:

Under the provisions of Order R-316, Rule 112A of the Commission's Rules and Regulations, Pan American Petroleum Corporation makes application for administrative approval to dually complete and produce its W. H. Turner No. 1 in the Eumont Field. This dual completion will be effected to produce gas from Yates formations through tubing-casing annulus and oil from the Drinkard zone through the tubing by installation of suitable packer equipment.

Also, under the provision of Commission Order No. R-520, Rule 5 (b) Special Rules and Regulations for the Eumont Gas Pool, delegating the Secretary of the Commission authority to grant exceptions to the requirement of Rule No. 5 (a) without notice and hearing for a non-standard gas proration unit, Pan American Petroleum Corporation hereby applies for an exception to the aforementioned rule for W. H. Turner No. 1, Eumont Field, to be dually completed as a gas-oil well.

In support of the above application, the following data are furnished:

1. The application is submitted in triplicate.
2. Complete legal description of acreage involved: *80 acres*  
S/2 of the SE/4 of Section 29, T-21-S, R-37-E, NMPM,  
Lea County, New Mexico.
3. Exact name and location of well involved:  
W. H. Turner No. 1, located 660' from the South line  
and 660' from the East line of Section 29, T-21-S,  
R-37-E, NMPM, Lea County, New Mexico.
4. Attached plat showing:
  - (a) Acreage to be dedicated.
  - (b) Well location.
  - (c) Offset ownership.

COPY

*trans ref to D.C.*  
*428*  
*May 21, 1958*  
*Re-DC-593*

5. Attached diagramatic sketch of proposed dual completion equipment showing:
  - (a) Formation involved.
  - (b) Perforations.
  - (c) Approximate location of packer.
  - (d) Other information pertinent to dual completion.
6. Statement of Intention:

The subject well is currently completed as an oil well in the Drinkard formation. It is planned to perforate and stimulate the Yates formation and complete the well as a gas-oil dual.
7. The proposed non-standard gas proration unit of 80 contiguous acres consists of the S/2 of the SE/4 of Section 29, T-21-S, R-37-E.
8. The proposed non-standard gas proration unit lies wholly within a single governmental section.
9. The entire proposed non-standard gas proration unit may reasonably be presumed to be productive of gas.
10. The length or width of the proposed non-standard gas proration unit does not exceed 5280'.
11. All operators who offset the lease containing location of the subject well have been furnished a copy of this application by registered mail. Attached is mailing list of all operators notified.

Yours very truly,

PAN AMERICAN PETROLEUM CORPORATION
