Re: Application of Gulf Oil Corporation for the Approval of a
Non-Standard 160-Acre Gas Proration Unit, Blinebry Gas
Pool, Lea County, New Mexico

Gentlemen:

Gulf Oil Corporation respectfully requests administrative approval of a Non-Standard 160-Acre Blinebry Gas Proration Unit covering the N/2 SW/4, SE/4 NW/4 and SW/4 NE/4 of Section 31-22S-38E, Lea County, New Mexico. This non-standard unit is to be attributed to the Scarborough Estate Well No. 4. In support of this application the following facts are submitted:

- (1) Applicant's Scarborough Estate Well No. 4, located 1,980 feet from the north line and 1,980 feet from the west line of Section 31, is completed in the Blinebry Gas Pool and is assigned a Non-Standard 120-Acre Gas Proration Unit covering the N/2 SW/4 and the SE/4 NW/4 by Administrative Order NSP-575 dated October 30, 1961.
- (2) The SW/4 NE/4 of this Section 31 is now dedicated to the Scarborough Estate Well No. 3 by Administrative Order NSP-563 dated August 31, 1961. The Scarborough Estate Well No. 2, located in the SE/4 NE/4, is being dually completed in the Blinebry Oil and an application has been submitted to attribute only the NE/4 SE/4 to Well No. 3. In order to have contiguous quarter-quarter sections attributed to a gas proration unit it is proposed to dedicate the SW/4 NE/4 to the Scarborough Estate Well No. 4 thereby increasing the existing 120-Acre Non-Standard Unit to a 160-Acre Non-Standard Unit.
- (3) The proposed Non-Standard Gas Proration Unit consists of contiguous quarter-quarter sections, but does not lie wholly within a single governmental quarter section.
- (4) The entire Non-Standard Proration Unit is reasonably presumed to be gas productive in the Blinebry Gas Pool.
- (5) The length does exceed 2,640 feet.

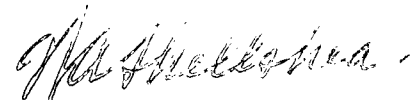

April 19, 1962

- (6) All offset operators in the quarter sections in which the proposed Non-Standard Unit is located and within 1,500 feet of the Unit Well have been furnished a copy of this application.

Respectfully submitted,

GULF OIL CORPORATION
