Re: Pierce Federal #10 SW/4, Sec. 5, T6S, R22E Chaves County, N.M.

## Gentlemen:

McKay Oil Corporation desires to drill a Federal location in the SW/4, Sec. 5, Township 6 South, Range 22 East, NMPM. (See Attachment 'A') Due to topography and geological problems, McKay Oil is requesting an unorthodox status.

The well was originally staked at 1980 feet from the West line and 660 feet from the South line. Due to the terrain, the BLM would not approve this location or any other normal location within this particular drilling spacing unit. (See Attachment 'B')

The SE/4 of this quarter section was chosen because of geological data on wells to the South. Further, any location in this quarter section that would be feasible to drill would have to be a non-standard location. Therefore, it is our opinion that this location would be the best economical and productive location to drill. (See Attachment 'C')

All minerals surrounding this proration unit, with the exception of to the Northwest, West, and Southwest, are leased to McKay Oil Corporation. (See Attachment 'A') Theses minerals are leased to Mesa Petroleum. A registered letter to Mesa is being mailed on this date in regards to the unorthodox location. Written confirmation of approval from Mesa was requested.

Therefore, McKay Oil requests that the O.C.D. approve the unorthodox location at 2108 feet from the West line and feet from the South line, Sec. 5, Township 6 South, Range 22 East, NMPM, which has been approved by the BLM and E.N.M. Archaeological Service.

McKay Oil Corporation would request and appreciate your immediate attention to this matter. Thank you for your cooperation and assistance.

Sincerely,

McKay Oil Corporation
