RE: Application for Non-Standard
Proration Unit
NW/4 and NE/4
Section 18-T24N-R5W
Rio Arriba County, New Mexico

Dear Mike:

Elm Ridge Resources wishes to request a Non-Standard Proration Unit for the above referenced locations. We have obtained a farm-out agreement from the original operator of the 320 acre proration unit, Floyd Oil. They currently operate the Apache Fed. #14 in the NW/4 of Sec.18-T24N-R5W and wish to continue operating that well. We plan to drill the infill location in the NE/4 and have an operating agreement that assigns operating rights to Elm Ridge Resources for the well we drill. Accordingly, both above referenced locations would need to be granted Non-Standard Proration Unit status.

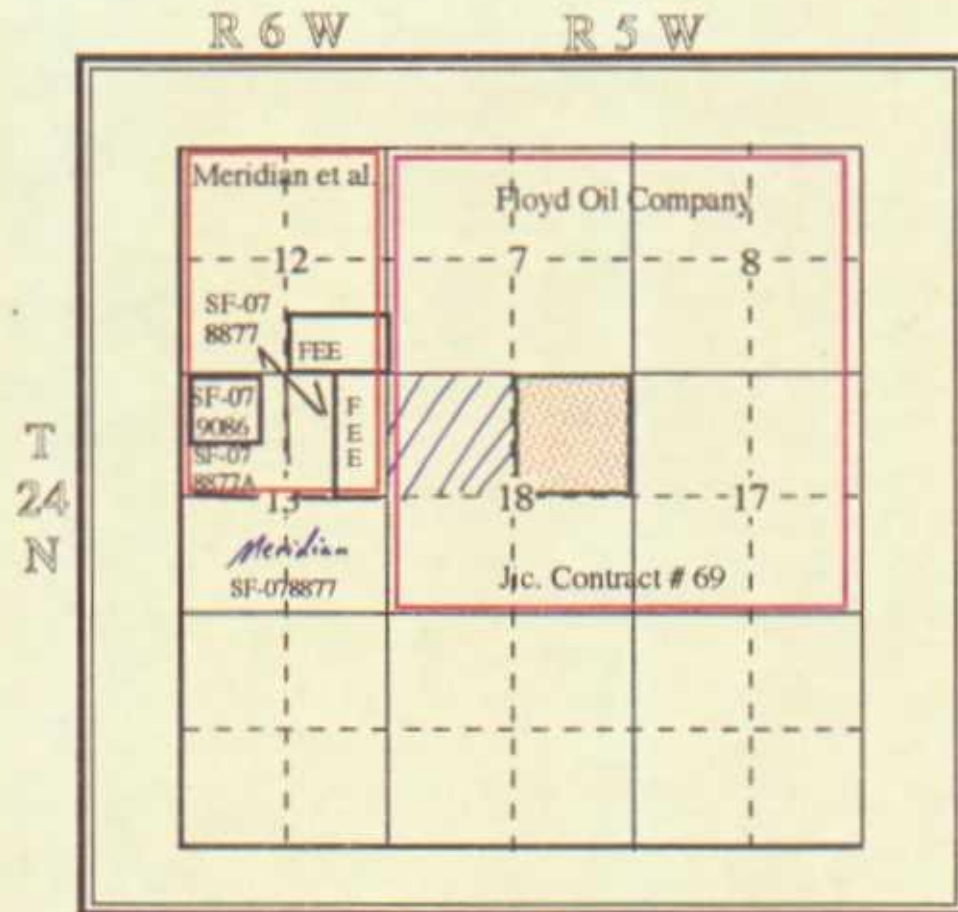

I have attached a plat depicting the offset operators. These offset operators and any affected working interest owners have been contacted by certified mail of Elm Ridges request for a Non-Standard Proration Unit.

Yours truly,

Elm Ridge Resources

Geologist
