All in T23S-R29E
Eddy County, New Mexico

Gentlemen:

Devon Energy Production Company, L.P., ("Devon") as operator, proposes to drill the referenced wells as horizontal Lower Brush Canyon Delaware wells, expected to require drilling to an approximate total vertical depth of 6,400' and approximate total measured depth of 14,000'. Each of the proposed wells will be drilled back to back from a common drill pad, with an expected start date in early February 2013. Enclosed you will find Devon's AFE, in duplicate, for each of the proposed wells reflecting our estimated cost for each of the wells to be \$7,227,000.

Title review reflects that multiple Joint Operating Agreements have historically been executed by some but not all of the current interest owners or their predecessors and in some instances covering some but not all of the lands covered by the proposed project areas. In that regard, Devon also submits for you review, approval and execution a new Joint Operating Agreement superseding all prior Joint Operating Agreements covering both of the referenced project areas and creating a working interest unit covering same.

In the event you elect to participate in Devon's proposals, please so indicate by signing and returning one (1) copy of each of the AFE's, one (1) of the original signature pages to the Joint

Operating Agreement, and one (1) of the signature pages to the Model Form Recording Supplement To Operating Agreement And Financing Statement. All of the foregoing should be accompanied by your well requirement sheet including email address and returned to the undersigned.

In the vent you elect not to participate in Devon's proposals, please contact the undersigned in order that appropriate support agreements may be negotiated.

Feel free to contact the project engineer, Dan McCorkell at 405-228-7528 or the undersigned at 405-552-4633 if there are any questions.

Yours very truly,

DEVON ENERGY PRODUCTION COMPANY, L.P.
