I will follow up with Scott in the morning and get a decision made. Brent got involved and confused this a little bit. It has been hard to keep track of with all the emails from different people.

Aaron,

I have not ordered anything for the old Marbob wells yet. You and I discussed this a couple of times on the phone, but we never reached a decision (I believe due to expensive stand-up opinions). Were you referencing the old Marbob wells highlighted in yellow below? If so, have you heard from Scott regarding the turnaround time from Currier Abstract? I just don't want this to fall through the cracks. Thanks!

Savannah

Scott,

Per our conversation, please proceed with rendering an opinion for the SRO State Com #43H well. As I mentioned, I was mistaken about the location of this well. The well is part of the SRO Unit/SRO Operating Agreement only and covers

Sections the W/2W/2 of Sections 17 & 20, T26S, R28E. This well is set to spud on 7/26/14 so it will be a priority after the SRO 46 and 48 wells.

Let me know what Currier Abstract says re: turnaround time on the other wells we discussed please. If they can get to them quickly ordering the abstracts is fine. If not we may need to discuss doing stand-up opinions for those wells.

Let me know if you have any questions or need anything else. Thank you.

Scott,

When you get a chance this afternoon give a call to discuss the requested opinion on the SRO State Com #43H that we discussed yesterday. Looks like I may have been mistaken on the legal descriptions and we may not need the opinion rendered. Thank you.

Scott,

Could you please prepare a DTO/DOTO of the ownership for the SRO State Com #43H which allocates production pursuant to the SRO and Moody GX Operating Agreements?

The SRO State Com #43H covers the W/2W/2 of Sections 17 & 20, T26S, R28E.

We are looking to spud this well on or around 7/26/2014.

I believe that Section 17 was removed from the MYOX Operating Agreement by amendment and a separate OA was put in place covering Sections 17 & 18, T26S, R28E for the Moody GX Working Interest Unit. A copy of the Moody GX Operating Agreement is attached hereto for your reference.

It was good talking with you. I will make an effort to put a face with a name soon. Let me know if you have any questions or need anything else. Thanks.

Hi Scott,

Were DOTO's ever ordered from you on the SRO 46H & 48H wells? I noticed they were not mentioned in your 4/25/14 email to Brent Sawyer. If they haven't already been ordered, can you please add these two wells to your list and make them first priority? Both these wells started producing after the unit was terminated, and we have Devon/Legend's interest in suspense pending a DOTO. Devon and Legend were not originally sent proposals on these wells, but we have recently proposed them under the Myox OA. We're not really sure what the WI's will be here due to the SRO/Myox OA overlap. Please give me a call if you'd like to discuss or let me know if you need any additional information. Thanks!

Brent/Scott,

I have talked with Savannah and Jennifer about this. Savannah is going to coordinate with Scott on getting the opinions that we need ordered. Let me know if you have any questions. Thanks.

Scott:

Good morning.

I am not officially ordering opinions on the wells. I'll need to talk to the landman whose area this is, Aaron Meyers, first. Thanks for the quick reply though, I appreciate it.

Thanks
Brent

Brent,

My apologies. Our phone system is down because the power is out at our Roswell office – it won't be back for a few days I am told.

I reviewed the list that you provided.

I am having my secretary double check all order letters (e-mails) that I received, but from my review of orders that I received, we never received orders for DTO/DOTO for the following wells:

SRO 1H
SRO 2H
SRO 3H
SRO 4H

SRO 5H
SRO 6H
SRO 7H
SRO 8H
SRO 13H
SRO 14H
SRO 17H

I am happy to prepare these as well. We do not have complete abstract coverage on the SRO 2H, SRO 3H, SRO 4H, SRO 7H, and SRO 8H. Each of these wells includes lands outside of the Unit Boundaries. We can order abstracts on them – which may take some time, or I can review the additional lands doing a stand-up.

PLEASE LET ME KNOW IF YOU ARE OFFICIALLY ORDERING OPINIONS ON THESE WELLS SO I CAN JUMP ON THE STAND UP WORK.

We have received orders on the following wells, which should require post termination exhibits only (DTO's):

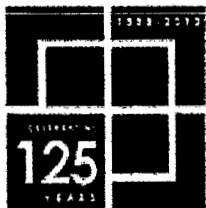

SRO 39H
SRO 63H
SRO 59H
SRO 60H
SRO 34H
SRO 61H
SRO 62H
SRO 41H
SRO 29H
SRO 26H
SRO 27H
SRO 58H

We have received orders on the remaining wells on your spreadsheet which we are preparing pre and post termination exhibits for (9H, 10H, 11H, 12H, 15H, 16H, 18H, 20H, 31H, 53H).

Give me a call to discuss if you have a few minutes.

Thanks,
Scott

Scott:

Good morning! I have tried several times to give you a call this morning, but I oddly keep getting a busy signal so I thought I would try email.

I wanted to confirm that you are working on DOTOs, both before and after the SRO unit dissolved, for the following 21 wells; the SRO State Com #1H through #20H, excluding the 19H (which doesn't exist yet), the 31H and the 53H.

You should also be working on DOTOs for the #46H and #48H effective after the SRO was dissolved: these two wells started production after the unit terminated.

I've attached a spreadsheet showing the well numbers and their sections, which I thought might be a useful reference for you.

Please give me a call.

Thanks
