VIA HAND-DELIVERY

Ms. Heather Riley, Director
Oil Conservation Division
New Mexico Department of Energy, Minerals and Natural Resources
1220 South Saint Francis Drive
Santa Fe, New Mexico 87505

Re: **Order Nos. R-14521 (Case No. 15831), R-14520 (Case No. 15831):** Applications of COG Operating LLC for a non-standard oil spacing and proration unit and compulsory pooling, Lea County, New Mexico.

Dear Ms. Riley:

Division Order Nos. R-14521 and 14520 granted COG Operating LLC's applications for non-standard spacing units and compulsory pooling on December 13, 2017. The orders authorized the drilling of COG's Baseball Cap Fed Com Well No. 24H at a location in the W/2 E/2 of Section 24 and the W/2 E/2 of Section 25, Township 24 South, Range 34 East, Lea County, New Mexico; and the Baseball Cap Fed Com 26 H at a location E/2 W/2 of Section 24 and the E/2 W/2 of Section 25, Township 24 South, Range 34 East, Lea County, New Mexico. Copies of the orders are attached for your convenience.

Ordering Paragraph 6 of each order requires COG to drill and complete the well within 120 days or the Order will terminate unless COG obtains a time extension from the Division Director for good cause shown. COG is pad drilling and completing these wells in the following manner in attempt to ultimate efficiency: The vertical portion of each well is drilled first and then each horizontal component is drilled next. The wells are then completed all at the same time. COG spud the 26H well on December 7, 2017 and will next turn to drilling the 24H well. Concho anticipates being finished drilling the 24H well around June 1, 2018. Concho will then complete both wells and should be producing by September 1, 2018. Therefore, COG has been unable to finish completion operations on the well within 120 days of the spud date. Accordingly, COG respectfully requests until September 1, 2018 to complete the wells.

Thank you for your time and attention to this matter.

Sincerely,

Ocean Munds-Dry
Senior Attorney
COG Operating LLC

McMillan, Michael, EMNRD

Subject: FW: Baseball Cap wells 24H and 26H

Mike- I have confirmed with our land people in Midland that COG's Baseball Cap Federal Com Well No. 26H has been drilled and the rig is off the location. The Baseball Cap Fed Com Well No. 24 H is scheduled to be spud on or before May 31, 2018.

If you have additional questions concerning these wells, please advise.

Bill Carr

ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
DIVISION TO CONSIDER:**

**CASE NO. 15830
ORDER NO. R-14520**

**APPLICATION OF COG OPERATING LLC FOR A NON-STANDARD SPACING
AND PRORATION UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW
MEXICO.**

ORDER OF THE DIVISION

BY THE DIVISION:

This case came on for hearing at 8:15 a.m. on October 26, 2017, at Santa Fe, New Mexico, before Examiner Scott A. Dawson.

NOW, on this 13th day of December, 2017, the Division Director, having considered the testimony, the record and the recommendations of the Examiner,

FINDS THAT:

(1) Due public notice has been given and the Division has jurisdiction of this case and the subject matter.

(2) Cases No. 15830 and 15831 were consolidated at the hearing for the purpose of testimony; however, separate orders will be issued for each case.

(3) In Case No. 15830, COG Operating LLC (the "Applicant" or "COG") seeks approval of a 320-acre non-standard oil spacing and proration unit and project area (the "Unit") for oil and gas production from the Wolfcamp formation, WC-025 G-09 S253402N; Wolfcamp Pool (Pool code 98116), comprising the W/2 E/2 of Section 24, and the W/2 E/2 of Section 25, both in Township 24 South, Range 34 East, NMPM, Lea County, New Mexico. Applicant further seeks an order pooling all uncommitted interests in the Unit for the Wolfcamp formation.

(4) The Unit will be dedicated to the following "Proposed Well":

- a. Baseball Cap Federal Com Well No. 24H (the "proposed well"; API No. 30-025-44152), a horizontal well to be drilled from a surface location 360

feet from the South line and 1980 feet from the East line (Unit O) of Section 25, to a bottom-hole location 200 feet from the North line and 2310 feet from the East line (Unit B) of Section 24, both in Township 24 South, Range 34 East, NMPM.

- b. The location of the completed interval for the proposed well will be standard for horizontal oil wells within the Unit.

(5) The proposed well is within the WC-025 G-09 S253402N; Wolfcamp Pool (Pool Code 98116) and is subject to Division Rule 19.15.15.9(A) NMAC, which provides for 330-foot setbacks from the unit boundaries and standard 40-acre units each comprising a governmental quarter-quarter section. The proposed Unit and project area consists of eight adjacent quarter-quarter sections oriented north to south.

(6) Applicant appeared through counsel and presented the following land and geologic evidence:

- (a) the Wolfcamp formation in this area is suitable for development by horizontal drilling;
- (b) the proposed orientation of the horizontal well from south to north is appropriate for the Unit;
- (c) all quarter-quarter sections to be included in the Unit are expected to be productive in the Wolfcamp formation, so that the Unit as requested will not impair correlative rights;
- (d) Applicant's land witness testified that the titles of some claimants to interests they claim in the unit are unmarketable, and requested that those interests be compulsory pooled;
- (e) notice by certified mail was provided to all uncommitted interest owners in the proposed Unit whose interests were evidenced by a conveyance instrument, either of record or known to Applicant when the Application was filed, and to heirs known to Applicant of deceased persons who appear as owners in such instruments, and whose whereabouts could be ascertained by exercise of reasonable diligence; and
- (f) those potentially affected parties whose whereabouts could not be ascertained were noticed by publication as provided in Rule 19.15.4.12.B NMAC.

(7) OneEnergy Partners and OneEnergy Partners Operating LLC ("OneEnergy") entered an appearance at the hearing in opposition through counsel. Testimony of the Applicant stated that the Applicant and OneEnergy had reached an

agreement whereby OneEnergy assigned to the Applicant all of their interest in the Unit. Applicant further stated that once the agreement with OneEnergy was completed, OneEnergy would withdraw their objection to the application. OneEnergy appeared through counsel and confirmed that they had withdrawn their objection to the application.

- (8) No other party appeared or otherwise opposed the application.

The Division concludes as follows:

(9) The proposed non-standard unit should be approved to enable Applicant to drill a horizontal well that will efficiently produce the reserves underlying the Unit, thereby preventing waste and protecting correlative rights.

(10) Two or more separately owned tracts are embraced within the Unit, and/or there are royalty interests and/or undivided interests in oil and gas minerals in one or more tracts included in the Unit that are separately owned.

(11) Applicant is owner of an oil and gas working interest within the Unit. Applicant has the right to drill and proposes to drill the proposed well to a common source of supply within the Unit at the proposed location.

(12) There are interest owners in the Unit that have not agreed to pool their interests.

(13) To avoid the drilling of unnecessary wells, protect correlative rights, prevent waste and afford to the owner of each interest in the Unit the opportunity to recover or receive without unnecessary expense a just and fair share of hydrocarbons, this application should be approved by pooling all uncommitted interests, whatever they may be, in the oil and gas within the Unit.

(14) COG Operating LLC (OGRID 229137) should be designated the operator of the proposed well and the Unit.

(15) Any pooled working interest owner who does not pay its share of estimated well costs should have withheld from its share of production, its share of reasonable well costs plus an additional 200% thereof as a reasonable charge for the risk involved in drilling the subject well.

(16) Reasonable charges for supervision (combined fixed rates) should be fixed at \$7,000 per month, while drilling and \$700 per month, while producing, provided that these rates may be adjusted annually pursuant to the Overhead section of the COPAS form titled "*Accounting Procedure-Joint Operations*." The operator is authorized to withhold from each pooled working interest owner's share of production the proportionate share of both the supervision charges and the actual expenditures required for operating such well, not more than what are reasonable.

IT IS THEREFORE ORDERED THAT:

(1) Pursuant to the application of COG Operating LLC, a 320-acre non-standard oil spacing and proration unit and project area (the "Unit") is hereby established for oil and gas production from the Wolfcamp formation, WC-025 G-09 S253402N; Wolfcamp Pool (Pool code 98116), comprising the W/2 E/2 of Section 24, and the W/2 E/2 of Section 25, both in Township 24 South, Range 34 East, NMPM, Lea County, New Mexico.

(2) All uncommitted interests, whatever they may be, including any adverse claims to interests to which any party's interest may be unmarketable in the oil and gas in the Wolfcamp formation underlying the Unit, are hereby pooled.

(3) The Unit shall be dedicated to the Applicant's Baseball Cap Federal Com Well No. 24H (the "proposed well"; API No. 30-025-44152), a horizontal well to be drilled from a surface location 360 feet from the South line and 1980 feet from the East line (Unit O) of Section 25, to a bottom-hole location 200 feet from the North line and 2310 feet from the East line (Unit B) of Section 24, both in Township 24 South, Range 34 East, NMPM. The location of the completed interval for the proposed well will be standard for horizontal oil wells within the Unit.

(4) The operator of the Unit shall commence drilling the proposed well on or before December 31, 2018, and shall thereafter continue drilling the proposed well with due diligence to test the Wolfcamp formation.

(5) In the event the operator does not commence drilling the proposed well on or before December 31, 2018, Ordering Paragraphs (1) and (2) shall be of no effect, unless the operator obtains a time extension from the Division Director for good cause demonstrated by satisfactory evidence.

(6) Should the proposed well not be drilled and completed within 120 days after commencement thereof, then Ordering Paragraphs (1) and (2) shall be of no further effect, and the Unit and project area created by this order shall terminate, unless operator appears before the Division Director and obtains an extension of the time for completion of the proposed well for good cause shown by satisfactory evidence. If the proposed well is not completed in all of the standard spacing units included in the proposed project area (or Unit) then the operator shall apply to the Division for an amendment to this Order to contract the Unit so that it includes only those standard spacing units in which the well is completed.

(7) Upon final plugging and abandonment of the proposed well and any other well drilled on the Unit pursuant to Division Rule 19.15.13.9 NMAC, the pooled Unit shall terminate, unless this Order has been amended to authorize further operations.

(8) COG Operating LLC (OGRID 229137) is hereby designated the operator of the well and the Unit.

(9) After pooling, uncommitted working interest owners are referred to as pooled working interest owners. ("Pooled working interest owners" are owners of working interests in the Unit, including unleased mineral interests, who are not parties to an operating agreement governing the Unit.) After the effective date of this order, the operator shall furnish the Division and each known pooled working interest owner in the Unit an itemized schedule of estimated costs of drilling, completing and equipping the proposed well ("well costs").

(10) Within 30 days from the date the schedule of estimated well costs for is furnished, any pooled working interest owner shall have the right to pay its share of estimated well costs of such well to the operator in lieu of paying its share of reasonable well costs out of production as hereinafter provided, and any such owner who pays its share of estimated well costs as provided above for the subject well shall remain liable for operating costs but shall not be liable for risk charges for such well. Pooled working interest owners who elect not to pay their share of estimated well costs as provided in this paragraph shall thereafter be referred to as "non-consenting working interest owners."

(11) The operator shall furnish the Division and each known pooled working interest owner (including non-consenting working interest owners) an itemized schedule of actual well costs within 90 days following completion of each of the proposed well. If no objection to the actual well costs is received by the Division, and the Division has not objected, within 45 days following receipt of the schedule, the actual well costs shall be deemed to be the reasonable well costs. If there is an objection to actual well costs within the 45-day period, the Division will determine reasonable well costs after public notice and hearing.

(12) Within 60 days following determination of reasonable well costs for the well, any pooled working interest owner who has paid its share of estimated costs in advance as provided above shall pay to the operator its share of the amount that reasonable well costs exceed estimated well costs and shall receive from the operator the amount, if any, that the estimated well costs it has paid exceed its share of reasonable well costs.

(13) The operator is hereby authorized to withhold the following costs and charges from each non-consenting owner's share of production from the subject well:

- (a) The proportionate share of reasonable well costs attributable to such interest; and
- (b) As a charge for the risk involved in drilling the well, 200% of the above costs.

(14) The operator shall distribute the costs and charges withheld from production, proportionately, to the parties who advanced the well costs.

(15) Reasonable charges for supervision (combined fixed rates) are hereby fixed at \$7000 per month while drilling and \$700 per month while producing, provided that these

rates may, at the election of the operator, be adjusted annually pursuant to the overhead adjustment provisions of the COPAS form titled "*Accounting Procedure-Joint Operations*." The operator is authorized to withhold from each pooled working interest owner's share of production from the well the proportionate share of both the supervision charges and the actual expenditures required for operating the well, not more than what are reasonable.

(16) Except as provided above, all proceeds from production from the proposed well that are not disbursed for any reason shall be held for the account of the person or persons entitled thereto pursuant to the Oil and Gas Proceeds Payment Act (NMSA 1978 Sections 70-10-1 through 70-10-6, as amended). If not disbursed, such proceeds shall be turned over to the appropriate authority as and when required by the Uniform Unclaimed Property Act (NMSA 1978 Sections 7-8A-1 through 7-8A-31, as amended).

(17) Any unleased mineral interest shall be considered a seven-eighths (7/8) working interest and a one-eighth (1/8) royalty interest for allocating costs and charges under this Order. Any well costs or charges that are to be paid out of production shall be withheld only from the working interests' share of production, and no costs or charges shall be withheld from production attributable to royalty interests.

(18) Should all the parties to this compulsory pooling order reach voluntary agreement after entry of this order, this order shall thereafter be of no further effect.

(19) The operator of the well and the Unit shall notify the Division in writing of the subsequent voluntary agreement of parties subject to the compulsory pooling provisions of this order.

(20) Jurisdiction of this case is retained for the entry of such further orders as the Division may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.

**IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
DIVISION TO CONSIDER:**

**CASE NO. 15831
ORDER NO. R-14521**

**APPLICATION OF COG OPERATING LLC FOR A NON-STANDARD SPACING
AND PRORATION UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW
MEXICO.**

ORDER OF THE DIVISION

BY THE DIVISION:

This case came on for hearing at 8:15 a.m. on October 26, 2017, at Santa Fe, New Mexico, before Examiner Scott A. Dawson.

NOW, on this 13th day of December, 2017, the Division Director, having considered the testimony, the record and the recommendations of the Examiner,

FINDS THAT:

(1) Due public notice has been given and the Division has jurisdiction of this case and the subject matter.

(2) Cases No. 15830 and 15831 were consolidated at the hearing for the purpose of testimony; however, separate orders will be issued for each case.

(3) In Case No. 15831, COG Operating LLC (the "Applicant") seeks approval of a 320-acre non-standard oil spacing and proration unit and project area (the "Unit") for oil and gas production from the Wolfcamp formation, WC-025 G-09 S253402N; Wolfcamp Pool (Pool code 98116), comprising the E/2 W/2 of Section 24, and the E/2 W/2 of Section 25, both in Township 24 South, Range 34 East, NMPM, Lea County, New Mexico. Applicant further seeks an order pooling all uncommitted interests in the Unit for the Wolfcamp formation.

(4) The Unit will be dedicated to the following "Proposed Well":

- a. Baseball Cap Federal Com Well No. 26H; (API No. 30-025-44153), a horizontal well to be drilled from a surface location 320 feet from the South line and 1980 feet from the West line (Unit N) of Section 25, Township 24 South, Range 34 East, to a bottom-hole location 200 feet from the North line and 1650 feet from the West line (Unit C) of Section 24, Township 24 South, Range 34 East, NMPM.
- b. The location of the completed interval for the proposed well will be standard for horizontal oil wells within the Unit.

(5) The proposed well is within the WC-025 G-09 S253402N; Wolfcamp Pool and is subject to Division Rule 19.15.15.9(A) NMAC, which provides for 330-foot setbacks from the unit boundaries and standard 40-acre units each comprising a governmental quarter-quarter section. The proposed Unit and project area consists of eight adjacent quarter-quarter sections oriented north to south.

(6) Applicant appeared through counsel and presented the following land and geologic evidence:

- (a) the Wolfcamp formation in this area is suitable for development by horizontal drilling;
- (b) the proposed orientation of the horizontal well from south to north is appropriate for the Unit;
- (c) all quarter-quarter sections to be included in the Unit are expected to be productive in the Wolfcamp formation, so that the Unit as requested will not impair correlative rights;
- (d) Applicant's land witness testified that the titles of some claimants to interests they claim in the unit are unmarketable, and requested that those interests be compulsory pooled;
- (e) notice by certified mail was provided to all uncommitted interest owners in the proposed Unit whose interests were evidenced by a conveyance instrument, either of record or known to Applicant when the Application was filed, and to heirs known to Applicant of deceased persons who appear as owners in such instruments, and whose whereabouts could be ascertained by exercise of reasonable diligence; and
- (f) those potentially affected parties whose whereabouts could not be ascertained were noticed by publication as provided in Rule 19.15.4.12.B NMAC.

(7) OneEnergy Partners and OneEnergy Partners Operating LLC ("OneEnergy") entered an appearance and appeared at the hearing in opposition through counsel. Testimony of the Applicant stated that the Applicant and OneEnergy had reached an agreement whereby OneEnergy assigned to the Applicant all of their interest in the Unit. Applicant further stated that once the agreement with OneEnergy was completed, OneEnergy would withdraw their objection to the application. OneEnergy appeared through counsel and confirmed that they had withdrawn their objection to the application.

(8) No other party appeared or otherwise opposed this application.

The Division concludes as follows:

(9) The proposed non-standard unit should be approved to enable Applicant to drill the subject horizontal well that will efficiently produce the reserves underlying the Unit, thereby preventing waste and protecting correlative rights.

(10) Two or more separately owned tracts are embraced within the Unit, and/or there are royalty interests and/or undivided interests in oil and gas minerals in one or more tracts included in the Unit that are separately owned.

(11) Applicant is owner of an oil and gas working interest within the Unit. Applicant has the right to drill and proposes to drill the proposed well to a common source of supply within the Unit at the proposed location.

(12) There are interest owners in the Unit that have not agreed to pool their interests.

(13) To avoid the drilling of unnecessary wells, protect correlative rights, prevent waste and afford to the owner of each interest in the Unit the opportunity to recover or receive without unnecessary expense a just and fair share of hydrocarbons, this application should be approved by pooling all uncommitted interests, whatever they may be, in the oil and gas within the Unit.

(14) COG Operating LLC (OGRID 229137) should be designated the operator of the proposed well and the Unit.

(15) Any pooled working interest owner who does not pay its share of estimated well costs should have withheld from its share of production, its share of reasonable well costs plus an additional 200% thereof as a reasonable charge for the risk involved in drilling the subject well.

(16) Reasonable charges for supervision (combined fixed rates) should be fixed at \$7,000 per month, while drilling and \$700 per month, while producing, provided that these rates may be adjusted annually pursuant to the Overhead section of the COPAS form titled "*Accounting Procedure-Joint Operations*." The operator is authorized to withhold from each pooled working interest owner's share of production the proportionate share of

both the supervision charges and the actual expenditures required for operating such well, not more than what are reasonable.

IT IS THEREFORE ORDERED THAT:

(1) Pursuant to the application of COG Operating LLC, a 320-acre non-standard oil spacing and proration unit and project area (the "Unit") is hereby established for oil and gas production from the Wolfcamp formation, WC-025 G-09 S253402N; Wolfcamp Pool (Pool code 98116), comprising the E/2 W/2 of Section 24, and the E/2 W/2 of Section 25, both in Township 24 South, Range 34 East, NMPM, Lea County, New Mexico.

(2) All uncommitted interests, whatever they may be, including any adverse claims to interests to which any party's interest may be unmarketable in the oil and gas in the Wolfcamp formation underlying the Unit, are hereby pooled.

(3) The Unit shall be dedicated to the Applicant's Baseball Cap Federal Com Well No. 26H; (API No. 30-025-44153), a horizontal well to be drilled from a surface location 320 feet from the South line and 1980 feet from the West line (Unit N) of Section 25, to a bottom-hole location 200 feet from the North line and 1650 feet from the West line (Unit C) of Section 24, both in Township 24 South, Range 34 East, NMPM. The location of the completed interval for the proposed well will be standard for horizontal oil wells within the Unit.

(4) The operator of the Unit shall commence drilling the proposed well on or before December 31, 2018, and shall thereafter continue drilling the proposed well with due diligence to test the Wolfcamp formation.

(5) In the event the operator does not commence drilling the proposed well on or before December 31, 2018, Ordering Paragraphs (1) and (2) shall be of no effect, unless the operator obtains a time extension from the Division Director for good cause demonstrated by satisfactory evidence.

(6) Should the proposed well not be drilled and completed within 120 days after commencement thereof, then Ordering Paragraphs (1) and (2) shall be of no further effect, and the Unit and project area created by this order shall terminate, unless operator appears before the Division Director and obtains an extension of the time for completion of the proposed well for good cause shown by satisfactory evidence. If the proposed well is not completed in all of the standard spacing units included in the proposed project area (or Unit) then the operator shall apply to the Division for an amendment to this Order to contract the Unit so that it includes only those standard spacing units in which the well is completed.

(7) Upon final plugging and abandonment of the proposed well and any other well drilled on the Unit pursuant to Division Rule 19.15.13.9 NMAC, the pooled Unit shall terminate, unless this Order has been amended to authorize further operations.

(8) COG Operating LLC (OGRID 229137) is hereby designated the operator of the well and the Unit.

(9) After pooling, uncommitted working interest owners are referred to as pooled working interest owners. ("Pooled working interest owners" are owners of working interests in the Unit, including unleased mineral interests, who are not parties to an operating agreement governing the Unit.) After the effective date of this order, the operator shall furnish the Division and each known pooled working interest owner in the Unit an itemized schedule of estimated costs of drilling, completing and equipping the proposed well ("well costs").

(10) Within 30 days from the date the schedule of estimated well costs is furnished, any pooled working interest owner shall have the right to pay its share of estimated well costs of such well to the operator in lieu of paying its share of reasonable well costs out of production as hereinafter provided, and any such owner who pays its share of estimated well costs as provided above for the subject well shall remain liable for operating costs but shall not be liable for risk charges for such well. Pooled working interest owners who elect not to pay their share of estimated well costs as provided in this paragraph shall thereafter be referred to as "non-consenting working interest owners."

(11) The operator shall furnish the Division and each known pooled working interest owner (including non-consenting working interest owners) an itemized schedule of actual well costs within 90 days following completion of each of the proposed well. If no objection to the actual well costs is received by the Division, and the Division has not objected, within 45 days following receipt of the schedule, the actual well costs shall be deemed to be the reasonable well costs. If there is an objection to actual well costs within the 45-day period, the Division will determine reasonable well costs after public notice and hearing.

(12) Within 60 days following determination of reasonable well costs for the well, any pooled working interest owner who has paid its share of estimated costs in advance as provided above shall pay to the operator its share of the amount that reasonable well costs exceed estimated well costs and shall receive from the operator the amount, if any, that the estimated well costs it has paid exceed its share of reasonable well costs.

(13) The operator is hereby authorized to withhold the following costs and charges from each non-consenting owner's share of production from the subject well:

- (a) The proportionate share of reasonable well costs attributable to such interest; and
- (b) As a charge for the risk involved in drilling the well, 200% of the above costs.

(14) The operator shall distribute the costs and charges withheld from production, proportionately, to the parties who advanced the well costs.

(15) Reasonable charges for supervision (combined fixed rates) are hereby fixed at \$7000 per month while drilling and \$700 per month while producing, provided that these rates may, at the election of the operator, be adjusted annually pursuant to the overhead adjustment provisions of the COPAS form titled "*Accounting Procedure-Joint Operations*." The operator is authorized to withhold from each pooled working interest owner's share of production from the well the proportionate share of both the supervision charges and the actual expenditures required for operating the well, not more than what are reasonable.

(16) Except as provided above, all proceeds from production from the proposed well that are not disbursed for any reason shall be held for the account of the person or persons entitled thereto pursuant to the Oil and Gas Proceeds Payment Act (NMSA 1978 Sections 70-10-1 through 70-10-6, as amended). If not disbursed, such proceeds shall be turned over to the appropriate authority as and when required by the Uniform Unclaimed Property Act (NMSA 1978 Sections 7-8A-1 through 7-8A-31, as amended).

(17) Any unleased mineral interest shall be considered a seven-eighths (7/8) working interest and a one-eighth (1/8) royalty interest for allocating costs and charges under this Order. Any well costs or charges that are to be paid out of production shall be withheld only from the working interests' share of production, and no costs or charges shall be withheld from production attributable to royalty interests.

(18) Should all the parties to this compulsory pooling order reach voluntary agreement after entry of this order, this order shall thereafter be of no further effect.

(19) The operator of the well and the Unit shall notify the Division in writing of the subsequent voluntary agreement of parties subject to the compulsory pooling provisions of this order.

(20) Jurisdiction of this case is retained for the entry of such further orders as the Division may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
