CASE NO. 16142

APPLICATION

Apache Corporation ("Apache"), OGRID Number 873, through its undersigned attorneys, hereby makes an application to the Oil Conservation Division pursuant to the provisions of NMSA (1978), Section 70-2-17, for an order: (1) creating a non-standard 160-acre, more or less, spacing and proration unit in the Bone Spring formation, comprised of the S2/ N/2 of Section 26, Township 19 South, Range 28 East, NMPM, Eddy County, New Mexico; and, (2) approving non-standard locations; and (3) pooling all mineral interests in the Bone Spring formation underlying this proposed non-standard spacing and proration unit. In support of this application, Apache states as follows:

1. Apache is an interest owner in the subject lands and has a right to drill a well thereon.
2. Apache seeks to dedicate the S2/ N/2 of Section 26, Township 19 South, Range 28 East, NMPM, Eddy County, New Mexico to the below proposed well to form a non-standard 160-acre, more or less, oil spacing and proration unit (the "project area").

3. Apache plans to horizontally drill the **Palmillo 26 State Com #314H** well to a depth sufficient to test the Bone Spring formation.

4. The well will be drilled from a surface location, located in the SE/4 NE/4 of Section 26.

5. The well is within the Palmillo, Bone Spring Southwest Pool (Pool Code 96413), which is subject to 330' setback requirements. The producing interval that Apache seeks to drill will not comply with the 330 foot setback requirements established under the Division's rules.

6. The first take point for the Palmillo 26 State Com #314H well will be located 1620 feet from the North line and 230 feet from the East line of Section 26; and the last take point will be located 2188 feet from the North line and 100 feet from the West line of Section 26.

7. Apache sought, but has been unable to obtain a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed project area to participate in the drilling of the well or to otherwise commit their interests to the well.

8. The creation of a non-standard proration unit, approval of non-standard locations, and the pooling of interests will avoid the drilling of unnecessary wells, will prevent waste and will protect correlative rights.

WHEREFORE, Apache requests this application be set for hearing before an Examiner of the Oil Conservation Division on May 17, 2018, and after notice and hearing as required by law, the Division enter its order:

A. Creating a non-standard oil spacing and proration unit ("project area") in the Bone Spring formation comprised of the S2/ N/2 of Section 26, Township 19 South, Range 28 East, NMPM, Eddy County, New Mexico;

B. Approving non-standard locations;

- C. Pooling all mineral interests in the Bone Spring formation underlying this non-standard spacing and proration unit/project area;
- D. Designating Apache as operator of this unit and the wells to be drilled thereon;
- E. Authorizing Apache to recover its costs of drilling, equipping and completing the well;
- F. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- G. Setting a 200% charge for the risk involved in drilling and completing the well in the event a working interest owner elects not to participate in the well.

CASE NO. _____: Application of Apache Corporation for a non-standard spacing and proration unit, non-standard locations, and compulsory pooling, Eddy County, New Mexico. Applicant seeks an order from the Division: (1) creating a non-standard 160-acre, more or less, spacing and proration unit in the Bone Spring formation, comprised of the S2/ N/2 of Section 26, Township 19 South, Range 28 East, NMPM, Eddy County, New Mexico; and, (2) approving non-standard locations; and (3) pooling all mineral interests in the Bone Spring formation underlying this proposed non-standard spacing and proration unit. This proposed non-standard spacing and proration unit will be the project area for the **Palmillo 26 State Com #314H** well, to be horizontally drilled. The producing area for the well will be unorthodox. Also to be considered will be the cost of drilling and completing said well, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Apache as operator of the well, and a 200% charge for risk involved in drilling said well. Said area is located approximately 13.6 miles northeast of Carlsbad, New Mexico.

RE: Palmillo 26 State #314H Well Proposal & Palmillo 26 Facility Proposal
Section 26, T19S-R28E
Eddy County, New Mexico

To Whom It May Concern,

Apache Corporation ("Apache"), proposes the drilling of the following well located in the S/2N/2 of Section 26, Township 19 South, Range 28 East, Eddy County, New Mexico to be drilled from the surface pad location ("Operations") as shown on the attached Exhibit "A". Apache anticipates that it will begin the Operations in August 2018.

- 1) Palmillo 26 State #314H ("314H") with a proposed surface location to be located in the SE/4NE/4 (Unit H) of Section 26, Township 19S, Range 28 East, Eddy County, New Mexico. The proposed bottom hole location of the 314H will be located in the SW/4NW/4 (Unit E) of Section 26, Township 19 South, Range 28 East, Eddy County New Mexico. The 314H will have a targeted interval located in the 3rd Bone Spring formation (~8,600' TVD) to a Total Measured Depth of approximately 13,950'. The estimated cost of drilling and completing the 314H is \$6,401,700.00 as found on the enclosed AFE #11-18-0180.
- 2) Also enclosed is AFE #11-18-0183 for the facility. The estimated cost of the Palmillo 26 facility is \$2,666,000. We ask that you sign this AFE election at the same time as you sign the drilling and completion AFE as the facility AFE is not a separate election; it is a separate AFE for internal administrative purposes. A separate facility agreement will be sent at a later date.

Apache is proposing the Operations under the terms of a modified 1989 AAPL Model Form Operating Agreement ("JOA") covering all of Section 26 with the following general provisions:

- 100%/300% Non-consenting penalty
- Drilling and Producing Rate of \$7,000/\$700
- Apache named as Operator

If you wish to participate in the Operations, please sign and return the elections and the AFEs in the enclosed yellow return envelope. A JOA will be sent separately to you for review and execution at a later date.

Apache's records indicate you own a 1.99653% working interest in the 160 acre proration unit. If you do not wish to participate in the Operations, Apache is willing to discuss an acquisition of your interest, contingent on reaching mutually satisfactory terms.

Page 2 of 4

Apache desires to develop Section 26 on a 640 acre basis as indicated in the previous plan of development letter dated February 8, 2018. As of the date of this letter, Apache has not received 100% commitment from the owners in Section 26 to move forward with a single section development and it is necessary to propose wells on a 160 acre basis. Should you desire to participate in the 640 acre single section development, please contact me as indicated below.

If we do not reach an agreement within thirty (30) days from the date of this letter, Apache will apply to the New Mexico Oil Conservation Division for compulsory pooling of your interest into a spacing unit for the proposed well(s).

Should you have any further questions, please contact me at 432.818.1096 or ashley.stpierre@apachecorp.com.

Sincerely,

Ashley St. Pierre, CPL

RE: Palmillo 26 State #315H and #316H Well Proposals & Palmillo 26 Facility Proposal
Section 26, T19S-R28E
Eddy County, New Mexico

To Whom It May Concern,

Apache Corporation ("Apache"), proposes the drilling of the following wells located in the N/2N/2 of Section 26, Township 19 South, Range 28 East, Eddy County, New Mexico all to be drilled from the same surface pad location ("Operations") as shown on the attached Exhibit "A". Apache anticipates that it will begin the Operations in August 2018.

- 1) Palmillo 26 State #315H ("315H") with a proposed surface location to be located in the NE/4NE/4 (Unit A) of Section 26, Township 19S, Range 28 East, Eddy County, New Mexico. The proposed bottom hole location of the 315H will be located in the NW/4NW/4 (Unit D) of Section 26, Township 19 South, Range 28 East, Eddy County New Mexico. The 315H will have a targeted interval located in the 3rd Bone Spring formation (~8,600' TVD) to a Total Measured Depth of approximately 13,950'. The estimated cost of drilling and completing the 315H is \$6,217,700.00 as found on the enclosed AFE #11-18-0181. The 315H is the initial well in the proration unit.
- 2) Palmillo 26 State #316H ("316H") with a proposed surface location to be located in the NE/4NE/4 (Unit A) of Section 26, Township 19S, Range 28 East, Eddy County, New Mexico. The proposed bottom hole location of the 316H will be located in the NW/4NW/4 (Unit D) of Section 26, Township 19 South, Range 28 East, Eddy County New Mexico. The 316H will have a targeted interval located in the 3rd Bone Spring formation (~8,600' TVD) to a Total Measured Depth of approximately 13,950'. The estimated cost of drilling and completing the 316H is \$6,284,700.00 as found on the enclosed AFE #11-18-0182. The 316H is the infill well in the proration unit.
- 3) Also enclosed is AFE #11-18-0183 for the facility. The estimated cost of the Palmillo 26 facility is \$2,666,000. We ask that you sign this AFE election at the same time as you sign the drilling and completion AFE as the facility AFE is not a separate election; it is a separate AFE for internal administrative purposes. A separate facility agreement will be sent at a later date.

Apache is proposing the Operations under the terms of a modified 1989 AAPL Model Form Operating Agreement ("JOA") covering all of Section 26 with the following general provisions:

- 100%/300% Non-consenting penalty
- Drilling and Producing Rate of \$7,000/\$700
- Apache named as Operator

Page 2 of 4

If you wish to participate in the Operations, please sign and return the elections and the AFEs in the enclosed yellow return envelope. A JOA will be sent separately to you for review and execution at a later date.

Apache's records indicate you own a 3.993056% working interest in the 160 acre proration unit. If you do not wish to participate in the Operations, Apache is willing to discuss an acquisition of your interest, contingent on reaching mutually satisfactory terms.

Apache desires to develop Section 26 on a 640 acre basis as indicated in the previous plan of development letter dated February 8, 2018. As of the date of this letter, Apache has not received 100% commitment from the owners in Section 26 to move forward with a single section development and it is necessary to propose wells on a 160 acre basis. Should you desire to participate in the 640 acre single section development, please contact me as indicated below.

If we do not reach an agreement within thirty (30) days from the date of this letter, Apache will apply to the New Mexico Oil Conservation Division for compulsory pooling of your interest into a spacing unit for the proposed well(s).

Should you have any further questions, please contact me at 432.818.1096 or ashley.stpierre@apachecorp.com.

Sincerely,

Ashley St. Pierre, CPL

Subject: RE: NMOCD Applications for Apache

Thank you Jennifer. We will take a look and get with Ashley if we have questions. We have been in our "new" location for five years but sometimes a company will pick up our old address. It happens occasionally. I appreciate your diligence in tracking us down.

Thanks,

Linda Hicks

Subject: NMOCD Applications for Apache

Linda,

The attached applications were mailed to Fasken in April and were returned to us as undeliverable. I am the attorney representing Apache in the matters, and obtained your e-mail address from Apache. We wanted to send you an electronic copy of the applications in order to ensure that notification was provided. Fasken is an offset owner in an adjoining spacing unit, and is being notified solely due to its offset ownership. These applications are set for hearing on May 17, 2018 at 8:15 a.m. at the New Mexico Oil Conservation Division in Santa Fe, New Mexico. If you have factual questions related to these applications, the landman at Apache responsible for this area is Ashley St. Pierre. Ashley can be contacted directly at 432-818-1096.

Thank you,
Jennifer

Subject: RE: NMOCD Applications for Apache

Thank you Jennifer. We will take a look and get with Ashley if we have questions. We have been in our "new" location for five years but sometimes a company will pick up our old address. It happens occasionally. I appreciate your diligence in tracking us down.

Thanks,

Subject: NMOCD Applications for Apache

Linda,

The attached applications were mailed to Fasken in April and were returned to us as undeliverable. I am the attorney representing Apache in the matters, and obtained your e-mail address from Apache. We wanted to send you an electronic copy of the applications in order to ensure that notification was provided. Fasken is an offset owner in an adjoining spacing unit, and is being notified solely due to its offset ownership. These applications are set for hearing on May 17, 2018 at 8:15 a.m. at the New Mexico Oil Conservation Division in Santa Fe, New Mexico. If you have factual questions related to these applications, the landman at Apache responsible for this area is Ashely St. Pierre. Ashley can be contacted directly at 432-818-1096.

Thank you,
Jennifer

The State of New Mexico, through its Oil Conservation Division, hereby gives notice that the Division will conduct a public hearing at 8:15 a.m. on May 17, 2018, to consider this application. Applicant seeks an order: (1) creating a non-standard 160-acre, more or less, spacing and proration unit in the Bone Spring formation, comprised of the N/2 N/2 of Section 26, Township 19 South, Range 28 East, NMPM, Eddy County, New Mexico; and, (2) approving non-standard locations; and (3) pooling all mineral interests in the Bone Spring formation underlying this proposed non-standard spacing and proration unit. This proposed non-standard spacing and proration unit will be the project area for the Palmillo 26 State Corn #315H and Palmillo 26 State Corn #316 wells, to be horizontally drilled. The producing area for these wells will be unorthodox. Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Apache as operator of the well, and a 200% charge for risk involved in drilling said wells.
