Case No. 16317

APPLICATION

COG Operating LLC ("COG") through its attorneys Ocean Munds-Dry, William R. Carr and Elizabeth A. Ryan hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, Sec. 70-2-17, for an order (1) creating an 160-acre, more or less, spacing and proration unit comprised of W/2SE/4 of Section 18 and W/2NE/4 of Section 19, Township 24 South, Range 35 East, N.M.P.M., Lea County, New Mexico; and (2) pooling all uncommitted interests in the Bone Spring Formation, WC-025 G-09 S243532M; Wolfbone Pool [98098]. In support of its Application, COG states:

1. COG (OGRID No. 229137) is a working interest owner in the proposed spacing and proration unit and has the right to drill a well thereon.
2. COG proposes to dedicate the above-referenced spacing and proration unit to the proposed **Snapback Fee 502H Well** which will be horizontally drilled from the surface location in NW/4SE/4 (Unit J) of Section 18 to a bottom hole location of SW/4NE/4 (Unit G) of Section 19.
3. The completed interval for this Well will meet the 330-foot standard offset from the outer boundaries of the spacing unit as required by the Statewide Rules for horizontal wells in 19.15.16.15 NMAC.

4. COG has sought in good faith and been unable to obtain voluntary agreement for the development of these lands from all of the working interest owners in the subject spacing unit.

5. The pooling of interests will avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

6. As a part of a larger simultaneous drilling and completion project, COG requests an extension of the 120-day time period to drill and complete a well provided by the standard pooling order.

7. In order to permit COG to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in this spacing unit should be pooled, and COG Operating LLC should be designated the operator of the proposed horizontal wells and spacing unit.

WHEREFORE, COG requests that, this Application be set for hearing before an Examiner of the Oil Conservation Division on July 26, 2018, and, after notice and hearing, the Division enter its order:

- A. Creating a 160-acre, more or less, standard horizontal spacing and proration unit in the Bone Spring Formation comprised of W/2SE/4 Section 18 and the W/2NE/4 Section 19, Township 24 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
- B. Pooling all uncommitted interests in the Bone Spring Formation underlying the spacing and proration unit;
- C. Designating COG Operating LLC as the operator of the spacing unit and horizontal well to be drilled thereon;
- D. Authorizing COG to recover its costs of drilling, equipping, and completing the well, and allocating its costs among the well's interest owners;

- E. Approving actual operating charges and costs charged for supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- F. Setting a 200% penalty for the risk assumed by COG in drilling and completing the well against any working interest owner who does not voluntarily elect to participate in the drilling of the well.

Respectfully submitted,

COG OPERATING LLC

CASE NO. 16317

Application of COG Operating LLC for Compulsory Pooling, Lea County, New Mexico. Applicant in the above styled cause seeks an order (1) creating an 160-acre, more or less, spacing and proration unit comprised of W/2SE/4 of Section 18 and W/2NE/4 of Section 19, Township 24 South, Range 35 East, N.M.P.M., Lea County, New Mexico; and (2) pooling all uncommitted interests in the Bone Spring Formation, Wolfbone Pool, underlying said acreage. Said spacing unit shall be dedicated to the **Snapback Fee 502H Well**, with a surface location in the NW/4SE/4 (Unit J) of Section 18 and a bottom hole location in SW/4NE/4 (Unit G) of Section 19. The completed interval for this well will remain within the 330-foot standard offset required by the Rules. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs thereof, as well as actual operating costs and charges for supervision, designation of COG Operating LLC as operator of the well, and a 200% penalty for risk involved in the drilling the well. Said area is approximately 14 miles northwest of Jal, New Mexico.
