Dear Working Interest Owner:

McElvain Energy, Inc., as manager and operator for Mac Resources, LLC ("McElvain"), hereby proposes the drilling of the referenced horizontal 2nd Bone Spring formation well as further described on the enclosed Authorization for Expenditure ("AFE"). The well will be drilled with a single lateral to a vertical depth of 9,802' or a depth sufficient to penetrate the 2nd Bone Spring formation and thereafter drilled horizontally in the 2nd Bone Spring formation to a total measured depth of 17,411'.

The enclosed AFE shows the estimated costs of drilling and completing the captioned well. McElvain estimates your working interest in the well to be 2%, which is subject to change upon receipt of the final Drilling Title Opinion. Please indicate on the Election Page, whether or not you desire to participate. If your election is to participate, please execute the Election Page and return the Election Page and any well data requirements to my attention at the letterhead address.

Upon request, McElvain will forward a copy of the proposed Joint Operating Agreement covering the Pooled Unit for this well. In lieu of participating in this well, McElvain would be interested in acquiring your interest in this spacing unit and the surrounding area. If you would like to discuss a potential deal with McElvain or if you have any questions regarding this proposal please do not hesitate to contact the undersigned at 303-962-6487.

Very truly yours,

Case No. 16337: Application of McElvain Energy Inc. for a non-standard well location, non-standard spacing and proration unit, and compulsory pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order (1) creating a non-standard 225.41-acre, more or less, spacing and proration unit underlying Lots 3 and 4 [W/2 SW/4] of Section 19 and Lots 1-4 [W/2 W/2] of Section 30, Township 18 South, Range 34 East, NMPM, Lea County, New Mexico; (2) pooling all uncommitted interests in the E-K Bone Spring Pool (Pool Code 21650) underlying this acreage; and (3) approving the unorthodox well location. Said non-standard unit is to be dedicated to the applicant's proposed EK 30 BS2 Federal Com No. 4H Well, which will be drilled horizontally from the SW/4 SW/4 (Lot 4) of Section 30 to a bottom hole location in the NW/4 SW/4 (Lot 3) of Section 19. The Special Rules for the E-K Bone Spring Pool require 80-acre spacing units and that the completed interval for a well be located within 150 feet of the center of the quarter-quarter section. The completed interval for this well will be at an unorthodox location because it is closer to the northern and southern boundaries of the proposed spacing and proration unit than allowed by the Special Rules. Also to be considered will be the cost of drilling and completing said well and the allocation of the cost thereof as well as actual operating costs and charges for supervision, designation of McElvain Energy, Inc. as operator of the well, and a 200% charge for risk involved in drilling said well. Said area is located approximately 28 miles west of Hobbs, New Mexico.

Case No. 16336: Application of McElvain Energy Inc. for a non-standard well location, non-standard spacing and proration unit, and compulsory pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order (1) creating a non-standard 240-acre, more or less, spacing and proration unit comprised of the E/2 SW/4 of Section 19 and the E/2 W/2 of Section 30, Township 18 South, Range 34 East, NMPM, Lea County, New Mexico; (2) pooling all uncommitted interests in the E-K Bone Spring Pool (Pool Code 21650) underlying this acreage; and (3) approving the unorthodox well location. Said non-standard unit is to be dedicated to the applicant's proposed **EK 30 BS2 Federal Com No. 3H Well**, which will be drilled horizontally from the SW/4 SW/4 (Unit M) of Section 30 to a bottom hole location in the NE/4 SW/4 (Unit K) of Section 19. The Special Rules for the E-K Bone Spring Pool require 80-acre spacing units and that the completed interval for a well be located within 150 feet of the center of the quarter-quarter section. The completed interval for this well will be at an unorthodox location because it is closer to the northern and southern boundaries of the proposed spacing and proration unit than allowed by the Special Rules. Also to be considered will be the cost of drilling and completing said well and the allocation of the cost thereof as well as actual operating costs and charges for supervision, designation of McElvain Energy, Inc. as operator of the well, and a 200% charge for risk involved in drilling said well. Said area is located approximately 27 miles west of Hobbs, New Mexico.
