RE: Division Order No. R-20253: Request for Time Extension for Ordering Paragraph (4)
Case No. 16069, Order No. R-20253 approved date December 3, 2018
Facility: 3RF-3, Logos Section 30 Recycling Containment

Dear Sir:

The following pertains to your request on behalf of the operator, Logos Resources II, LLC, received by the Division on January 2, 2018 and to the requirements in the captioned hearing order.

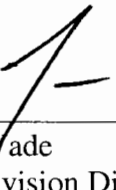

The operator requested an extension of the 30-day time limit given by the Division in which to provide the requirements detailed in Ordering Paragraph (4) which included developing a procedure to quantify parameters for identifying compromises of the primary liner with the procedure to include quarterly sampling of fluids found in the leak detection system.

The operator stated that they were not made aware of this order's ruling in ample time and with the holidays approaching, the applicant could not meet the deadline of the 30-day time frame pertaining to the associated order. Accordingly, the operator is requesting a new submittal date of February 1, 2019 to replace the existing time limits of January 2, 2019.

The Division is supportive of the time extension but also reminds the operator that the requirement for quantifiable parameters was included in Ordering Paragraph (2)(a) of Division Order No. R-14314 and would be expected to be a condition of the current order in order to satisfy a minimum standard for leak detection.

The operator is hereby granted an extension time limit to February 1, 2019 to fulfil the obligations specified in Ordering Paragraph (4). All other provisions of this order remain in full force and effect.

Sincerely,

Gabriel Wade
Acting Division Director
