 10

An operator is limited to the number of wells it can place in approved temporary abandonment status as follows:

- A) 1 well for 1-5 wells;
- B) Thirty-three and three tenths percent for more than 5 wells.

OCD Exhibit 12

"True vertical depth" means the difference in elevation between the ground level at the well's surface location and the deepest point in the wellbore.

In determining the blanket plugging financial assurance, if an operator has federal wells that move the operator into a higher tier, the operator may request the operator's blanket plugging financial assurance be reduced by the federal statewide bond; provided, however, at not time can the amount subtracted from the required financial assurance make the blanket plugging financial assurance required less than the amount of financial assurance required for the operator's total combined state and private well count.
