STATEMENT OF THE CASE

APPLICANT

Applicants seeks an order approving a non-standard spacing and proration unit in the Bone Spring formation comprised of the E/2SE/4 of Section 25 and the E/2E/2 of Section 36, Township 24 South, Range 28 East, N.M.P.M., and pooling interest owners underlying the well unit in the entire Bone Spring formation.

OPPONENT

Primero owns an interest in the proposed well unit as to the Bone Spring Avalon and First Bone Spring Sand intervals. It is believed that applicant's proposed well is a Second Bone Spring or Third Bone Spring well. Due to a depth severance in the Bone Spring (see attached assignment), Primero would not own an interest in production in the proposed well. Thus, pooling should not be granted as against Primero, and the application should be denied.

The State of New Mexico, through its Oil Conservation Division, hereby gives notice that the Division will conduct a public hearing at 8:15 a.m. on September 6, 2018, to consider this application. Applicant seeks an order from the Division: (1) creating a non-standard 480-acre, more or less, spacing unit in the Bone Spring formation limited in depth from 7,300' to 9,560', comprised of the E/2 of Section 36 and the SE/4 of Section 25, Township 24 South, Range 28 East, NMPM, Eddy County, New Mexico; and, (2) pooling all mineral interests in the Bone Spring formation underlying this proposed spacing unit. This proposed non-standard spacing and proration unit will be the project area for the Southern Comfort State 24-28-25 TB 6H well, to be horizontally drilled. The producing area for this well will be orthodox. Also to be considered will be the cost of drilling and completing said well, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Marathon as operator of the well, and a 200% charge for risk involved in drilling said well. Said area is located approximately 3 miles south of Malaga, New Mexico.
