**CASE NO. 20228 & 20233**

**AFFIDAVIT OF STAN MITCHELL**

Stan Mitchell, of lawful age and being first duly sworn, declares as follows:

1. My name is Stan Mitchell and I am employed by Percussion Petroleum Operating, LLC ("Percussion") as a Landman.
2. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters. My credentials as a petroleum landman have been accepted by the Division and made a matter of public record.
3. I am familiar with the applications filed by Percussion in these consolidated cases and familiar with the status of the lands in the subject area.
4. None of the interest owners that remain to be pooled have indicated opposition to these pooling proceedings and I do not expect any opposition at the hearing.
5. In these consolidated cases, Percussion seeks an order pooling all uncommitted interests in the Red Lake Glorieta-Yeso Pool (51120) underlying two standard 160-acre horizontal spacing units in the S/2 of Section 18, Township 18 South, Range 27 East, NMPM, Eddy County, New Mexico, comprised of the following acreage:
  - In Case No. 20228, Percussion seeks an order pooling all uncommitted interest underlying the S/2 S/2 of Section 18 to be dedicated to the **Oasis 1H Well**, which will be horizontally drilled from a surface location in the SE/4 SE/4 (Unit P) of

Section 13, Township 18 South, 26 East, to a standard bottom hole location in the SE/4 SE/4 (Unit P) of Section 18, Township 18 South, Range 27 East.

- In **Case No. 20233**, Percussion seeks an order pooling all uncommitted interest underlying the N/2 S/2 of Section 18 to be dedicated to the **Smashing Pumpkins 1H Well**, to be drilled from a surface location in the NE/4 SE/4 (Unit I) of Section 13, Township 18 South, 26 East, to a standard bottom hole location in the NE/4 SE/4 (Unit I) of Section 18, Township 18 South, Range 27 East.

6. **Percussion Exhibit A-1** contains a Form C-102 for each of the proposed wells in Cases 20228 and 20233. The completed intervals for these wells will remain within the standard setback required by the Division's Statewide rules for horizontal oil wells.

7. The S/2 of Section 18 is comprised of 14 separate tracts of land. In **Percussion Exhibit A-2** I have identified the ownership in each of the proposed spacing units. Percussion is seeking to pool working interests and unleased mineral interests in both cases, and certain non-participating royalty interests (NPRI) in Case No. 20233 involving the Smashing Pumpkins well. The interests that remain to be pooled are identified with green shading on Exhibit A-2.

8. Percussion has conducted a diligent search of all public records in Eddy County, including phone directories and computer databases, to determine valid addresses for each of the mineral interests that Percussion seeks to pool.

9. All ownership depth severances within the Red Lake Glorieta-Yeso Pool underlying the proposed horizontal spacing units have been resolved by agreement.

10. **Percussion Exhibit A-3** contains a sample of the well proposal letters provided to the working interest or unleased mineral owners in each of the proposed horizontal spacing units. An initial AFE was included with the well proposal letters. In addition to submitting these letters, Percussion subsequently undertook good faith efforts to reach agreement with the parties it seeks to pool.

11. **Percussion Exhibit A-4** contains a more recent AFE for each of the proposed wells. The costs reflected on these AFE's are lower than what was submitted with the November well proposal letters and consistent with what operators have incurred for drilling similar horizontal wells in the area.

12. The estimated overhead and administrative costs are \$7,500/month while drilling and \$750/month while producing. These costs are consistent with what other operators are charging in this area for these types of wells and Percussion asks that they be incorporated into the pooling orders.

13. I provided the law firm of Holland & Hart LLP a list of names and addresses for the interest owners the Percussion seeks to pool and instructed that they be notified of this hearing.

14. The exhibits attached to this affidavit are either prepared by me or compiled under my direction and supervision.

RE: Well Proposal & Letter Agreement  
Oasis 1H well  
Section 18, T18S, R27E  
Eddy County, New Mexico

Percussion Petroleum Operating, LLC ("Percussion") hereby proposes to drill and complete the Oasis 1H, to an approximate total vertical depth of 2900' as a horizontal upper Yeso well (the "Subject Well") at the following proposed location (subject to change upon staking and survey).

**Oasis 1H well – Horizontal Yeso Well, Eddy County, NM**

- Proposed Surface Hole Location – 900' FSL & 650' FEL, Section 13, T18S-R26E
- Proposed Bottom Hole Location – 945' FSL & 20' FEL, Section 18, T18S-R27E

Attached in duplicate is AFE which specifies total drilling and completed costs to be estimated at \$4,020,500.00. **Your working interest in this well is 0.140961%.**

In support of this well and future development, Percussion proposes to form a Working Interest Unit covering the South Half of the South Half of Section 18 in Township 18 South, Range 27 East, Eddy County, New Mexico, containing 160 acres of land, more or less, insofar, and only insofar, as the same covers rights from the top of the Yeso formation to the base of the Yeso formation (the "WIU"). The term "horizontal well" shall be defined as a directional well bore with one or more laterals that extend a minimum of one hundred feet (100') horizontally in the target zone.

For the mutually exclusive development within the WIU as to horizontal wells, and any concept wells (i.e. micro seismic wells, pilot hole wells), Percussion herein submits an operating agreement ("JOA") dated November 20, 2018, a 1982 AAPL form, to govern proposals and operations within the WIU. The Exhibits "A" and "F" to the JOA will be completed in the near term pending transactional decisions of the working interest parties.

Please indicate your election as to the Subject Wells by marking any single item 1), 2) or 3) below in the space provided and returning a copy of this letter agreement to the undersigned within thirty (30) days of receipt, otherwise you may be subject to the compulsory pooling provisions of the State of New Mexico. If you mark any item that pertains to AFEs and/or the JOA, then please execute and return copies of the same together with your executed copy of this letter agreement to Percussion within said thirty (30) day period. Exhibit "A" and "F" to the JOA shall be provided at a later date after all of the working interest percentages of the non-operators have been determined.

IN SUPPORT OF CASE NOS. 20228, 20233**

C.J. Lipinski, of lawful age and being first duly sworn, declares as follows:

1. My name is C.J. Lipinski. I work for Percussion Petroleum Operating, LLC ("Percussion") as a Geologist.
2. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum geology. My credentials as a petroleum geologist have been accepted by the Division and made a matter of public record.
3. I am familiar with the applications filed by Percussion in these consolidated cases and I have conducted a geologic study of the lands in the subject area.
4. **Percussion Exhibit B-1** location map showing the proposed horizontal spacing units outlined in red. The proposed wellbores for each spacing unit (the **Smashing Pumpkin 1H** and the **Oasis 1H**) are depicted with light green and dark green lines respectively. Percussion is targeting the Yeso formation with these proposed wells and offsetting wells in this formation are depicted on the map.
5. **Percussion Exhibit B-2** is a subsea structure map that I prepared for the top of the Glorieta formation using a 25-foot contour interval. The map shows that in the subject area, structure dips gently to the southeast. The structure appears consistent in this section and I do not

observe any faulting, pinchouts, or other geologic impediments to developing the proposed spacing units with horizontal wells.

6. **Percussion Exhibit B-3** shows the wells used to construct a cross-section from A to A'. I chose these wells because they have good quality logs at sufficient depth, and each log contains gamma ray, resistivity, photoelectric absorption, neutron and density porosity curves. I consider these wells to be representative of the geology of the area.

7. **Percussion Exhibit B-4** is a stratigraphic cross-section prepared by me of the representative wells shown on the prior exhibit. The target interval for the proposed Oasis 1H and Smashing Pumpkin 1H wells is marked on the exhibit. The logs in the cross-section demonstrate that the target interval within the Yeso should be present across the proposed spacing units.

8. In my opinion, each tract comprising the proposed spacing units will be productive and contribute more-or-less equally to production from the wellbore.

9. In my opinion, the granting of Percussion's applications in these cases is in the best interest of conservation, the prevention of waste, and protection of correlative rights.

10. **Percussion Exhibit B-1 through B-4** were either prepared by me or compiled under my direction and supervision.
