STATEMENT OF CASE

Solaris Water Midstream, LLC seeks approval of a salt water disposal well in Eddy County, New Mexico. The disposal will be into the Devonian and Silurian-Fusselman formations at depths of 13,305 to 14,325 feet through the Roadrunner SWD #1 well. The well is located in Township 25S, Range 27E, Section 33, 830 feet from the North line and 200 feet from the East line. The proposed maximum injection rate is 30,000 bpd, with a proposed average

MAR 28 2019 10:04:43

injection rate of 15,000 bpd. The proposed maximum injection pressure is 2,661 psi (surface), with an average injection pressure of 1,500 to 2,000 psi (surface). Solaris proposes to use 5 ½" tubing swedged down to 5" with setting depth of 13,285 feet.

Solaris filed its Application for Authorization to Inject on July 3, 2018 (Form C-108).

On November 7, 2018, Solaris filed a revised C-108 because the site of the well was moved from Section 28 to Section 33, in the same Township and Range. The revised Application incorporated the information previously provided for Section VI, VIII, X and XI of Form C-108.

On July 19, 2018, Chevron U.S.A. Inc. filed a protest to the Application based on the proximity of the injection site to a mapped fault line. Solaris will present testimony demonstrating that the proposed well site does not pose a risk of increasing seismicity in the area. Solaris requests that the Application be granted.

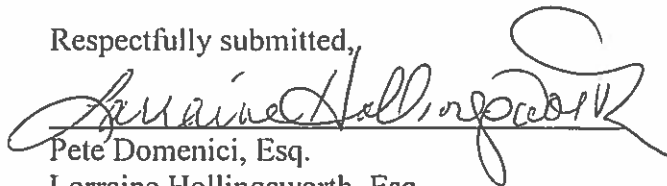

APPLICANT'S PROPOSED EVIDENCE

WITNESS	ESTIMATED TIME	ESTIMATED EXHIBITS
Ed Martin Regulatory	15 minutes	2
Jim Brannigan Geologist	20 minutes	3-5
Todd Reynolds Seismic	20 minutes	14
Paul Taylor Engineering	20 minutes	5-8
Witness to discuss well design, to be identified, testimony by affidavit	5 minutes	1-2
Drew Dixon Information regarding Solaris	10 minutes	2-3

PROCEDURAL MATTERS

Solaris intends to present the testimony of one witness by affidavit.

Respectfully submitted,

Pete Domenici, Esq.

Lorraine Hollingsworth, Esq.
