BEFORE THE OIL CONSERVATION DIVISION EXAMINER HEARING APRIL 4, 2019

CASE No. 20350

SAN JUAN 27-5 UNIT 126E

SAN JUAN & RIO ARRIBA COUNTIES, NEW MEXICO

STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION

APPLICATION OF HILCORP ENERGY COMPANY FOR AN EXCEPTION TO THE WELL DENSITY REQUIREMENTS OF THE SPECIAL RULES AND REGULATIONS FOR THE BLANCO-MESAVERDE GAS POOL,

RIO ARRIBA COUNTY, NEW MEXICO.

CASE NO. 20350

AFFIDAVIT OF CHARLES CREEKMORE IN SUPPORT OF CASE NO. 20350

I, Charles Creekmore, being of lawful age and duly sworn, declare as follows:

1. My name is Charles Creekmore. I work for Hilcorp Energy Company ("Hilcorp")

as a Landman.

2. I have previously testified before the New Mexico Oil Conservation Division as

an expert witness in petroleum land matters. My credentials as a petroleum landman have been

accepted by the Division and made a matter of record.

3. I am familiar with the application filed by Hilcorp in this case, and I am familiar

with the status of the lands in the subject areas.

4. None of the affected parties in this case has indicated opposition, and therefore I

do not expect any opposition at the hearing.

5. Hilcorp seeks an exception to the well density requirements of Rule I.B of the

Special Rules and Regulations of the Blanco-Mesaverde Gas Pool to permit it to complete and

simultaneously produce three Mesaverde gas wells in the same quarter section within the same

1

standard 320-acre, more or less, spacing and proration unit.

BEFORE THE OIL CONSERVATION DIVISION

Santa Fe, New Mexico

Exhibit No. A

Submitted by: **Hilcorp Energy Co.** Hearing Date: April 4, 2019

- 6. The Blanco-Mesaverde Gas Pool is governed by Special Rules and Regulations which provide for 320-acre spacing and proration units on which as many as four wells may be drilled. The Special Rules therefore limit the number of wells in a spacing unit to four and the number of wells in a half section within a spacing unit to two. The Special Rules also provide that well density exceptions can be approved only after notice and hearing.
- 7. Hilcorp is the operator of a standard 320-acre spacing and proration unit in the Blanco-Mesaverde Gas Pool comprised of the W/2 of Section 7, Township 27 North, Range 5 West, San Juan County, New Mexico, in which the following three wells are currently, or soon will be, completed and producing:
 - a. San Juan 27-5 Unit 46 Well (API No. 30-039-07112), Sec. 7, T27N, R5W,(Unit M);
 - b. San Juan 27-5 Unit 126M Well (API No. 30-039-23756), Sec. 7, T27N,R5W (Unit C); and
 - c. San Juan 27-5 Unit 126 Well (API No. 30-039-20400), Sec. 7, T27N, R5W
 (Unit K).
- 8. Hilcorp proposes to simultaneously dedicate and produce the following well within the same standard spacing and proration unit, at the following location:
 - a. San Juan 27-5 Unit 126E Well (API No. 30-039-30518), Sec. 7, T27N,
 R5W, with a surface location in Unit L and bottom-hole location in Unit
 F.

¹ This Dakota well is not yet completed into the Mesaverde formation, but is scheduled to be recompleted into the Mesaverde. It will be the second well in the SW/4, making the proposed recompletion of the San Juan 27-5 Unit 126E well the third well in the quarter section, thereby requiring a well density exception.

- 9. This will be the third well within the same quarter section within the same spacing unit, exceeding well density limits imposed by the Special Rules.
- 10. Hilcorp therefore requests that the Division enter an order granting an exception to the well density requirements of Rule 1.B of the Special Rules and Regulations of the Blanco-Mesaverde Pool to authorize Hilcorp to simultaneously dedicate and produce the San Juan 27-5 Unit 126E Well (API No. 30-039-30518) within the W/2 of Section 7, Township 27 North, Range 5 West, permitting the total number of wells dedicated and producing within the same quarter section to three wells within the same spacing unit.
- 11. The proposed simultaneous dedication of the San Juan 27-5 Unit 126E Well, which is currently producing in the Dakota formation, within the Blanco-Mesaverde is part of Hilcorp's strategy to use existing wells completed in other zones to economically target development of incremental Mesaverde gas reserves in areas where there is not adequate gas drainage.
- 12. The Division has pre-approved downhole commingling the Dakota formation with the Blanco-Mesaverde Gas Pool.
- 13. Pursuant to the Special Rules and Division precedent, Hilcorp provided notice to all Division-designated operators in offsetting 320-acre spacing units. Where Hilcorp is the operator, Hilcorp identified all working interest owners in offsetting spacing units as affected parties requiring notice. In some offsetting spacing units, Hilcorp owns 100% of the working interest, in which case there are no affected parties to notice.
- 14. **Exhibit A-1** is an overview map identifying the location of the subject Blanco-Mesaverde Gas Pool spacing unit, in the green outline, within the W/2 of Section 7, Township 27

North, Range 5 West, to which the San Juan 27-5 Unit 126E Well will be simultaneously dedicated.

- 15. Exhibit A-1 also identifies the locations of the existing Mesaverde wells as gray circles, as well as the **San Juan 27-5 Unit 126E Well** as a gray triangle.
- 16. Exhibit A-1 also depicts the notice area comprised of the offsetting spacing units, which is the area within the red dashed line surrounding the subject spacing unit outlined in green. In this case, Hilcorp is the operator of the offsetting spacing units within the notice area.
- 17. **Exhibit A-2** identifies the affected parties within the offsetting spacing units who are required to be noticed. I provided a list of all affected parties requiring notice to Holland & Hart LLP. All parties were locatable.
- 18. To the best of my knowledge, the addresses used to provide notice are valid and correct addresses which have been recently used by Hilcorp and at which mail has been received by the notice parties.
 - 19. Exhibits A-1 and A-2 were prepared by me or under my direction and supervision.
 FURTHER AFFIANT SAYETH NAUGHT.

VIA CERTIFIED MAIL CERTIFIED RECEIPT REQUESTED

TO: AFFECTED PARTIES

Re: Application of Hilcorp Energy Company for an Exception to the Well Density Requirements of the Special Rules and Regulations of the Blanco-Mesaverde Gas Pool, Rio Arriba County, New Mexico.

Ladies & Gentlemen:

This letter is to advise you that Hilcorp Energy Company has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on April 4, 2019 and the status of the hearing can be monitored through the Division's website at http://www.emnrd.state.nm.us/ocd/. Division hearings will commence at 8:15 a.m. in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B to file a Pre-hearing Statement four business days in advance of a scheduled hearing. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: the names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact Brad Pearson at (713) 289-2793.

Affidavit of Publication

State of New Mexico County of Rio Arriba

I, Robert Trapp, being first duly sworn, declare and say I am the publisher of the Rio Grande SUN, a weekly newspaper published in the English language and having a general circulation in the County of Rio Arriba, State of New Mexico, and being a newspaper duly qualified to publish legal notices and advertisements under the provisions of Chapter 167 of the Session Laws of 1937. The publication, a copy of which is hereto attached, was published in said paper once each week for

/
consecutive weeks and on the same day of each week in the regular issue of the paper during the time of publication and the notice was published in the newspaper proper, and not in any supplement. The first publication being on the
21 day of March, 2019
and the last publication on theday of
march, 2019 payment for said advertisement has been duly made, or assessed as court costs. The undersigned has personal knowledge of the matters and things set forth in this affidavit.

CASE 20350: Application of Hilcorp Energy Company for an Exception to the Well Density Requirements of the Special Rules and Regulations of the Blanco-Mesaverde Gas Pool, Rio Arriba County, New Mexico. Applicant in the above-styled cause seeks an order for an exception to the well density requirements of Rule I.B of the Special Rules and Regulations for the Blanco-Mesaverde Gas Pool (72319), Rio Arriba County, New Mexico, to permit it to complete and simultaneously produce three Mesaverde gas wells in the same quarter section within the same standard 320-acre, more or less, spacing and proration unit. Hilcorp further seeks approval for the proposed location of the San Juan 27-5 Unit 126E Well (API No. 30-039-30518) in the Mesaverde formation with a surface location in Unit L and a bottom-hole location in Unit F of the W/2 of Section 7, Township 27 North, Range 5 West, NMPM, Rio Arriba County, New Mexico, and authorization to simultaneously complete and produce the San Juan 27-5 Unit 126E Well from the Blanco-Mesaverde Gas Pool. Said area is located approximately 28 miles east of Bloomfield, NM. (Published March 21, 2019)

STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION

APPLICATION OF HILCORP ENERGY COMPANY FOR AN EXCEPTION TO THE WELL DENSITY REQUIREMENTS OF THE SPECIAL RULES AND REGULATIONS FOR THE BLANCO-MESAVERDE GAS POOL, RIO ARRIBA COUNTY, NEW MEXICO.

CASE NO. 20350

AFFIDAVIT OF MICHELLE SIVADON IN SUPPORT OF CASE NO. 20350

Michelle Sivadon, being of lawful age and duly sworn, declare as follows:

1. My name is Michelle Sivadon. I work for Hilcorp Energy Company ("Hilcorp")

as a reservoir engineer.

2. I have previously testified before the New Mexico Oil Conservation Division as

an expert in reservoir engineering. My credentials as a reservoir engineer have been accepted by

the Division and made a matter of record.

3. I am familiar with the application filed by Hilcorp in this case and have conducted

an engineering study of the subject area and of the Blanco-Mesaverde Gas Pool.

4. As with Hilcorp's prior applications for well density exceptions in the Blanco-

Mesaverde Gas Pool, I used a decline curve analysis of existing wells to estimate ultimate

recoveries for the subject spacing unit under the existing well density. I then compared the

estimated ultimate gas recoveries against log-derived volumetric calculations for the original gas

in place with the cumulative gas production in the spacing unit. Using this approach, we

identified areas, including the subject spacing unit, that have substantial remaining recoverable

1

Santa Fe, New Mexico **Exhibit No. C**

gas and lower-than-expected gas recoveries where additional well bores or well completions are necessary to adequately drain remaining gas reserves.

- Juan 27-5 Unit 126E Well (API No. 30-039-30518) with a surface location in Unit L and a bottom-hole location in Unit F of the W/2 of Section 7, Township 27 North, Range 5 West, which is the well Hilcorp proposes for simultaneous dedication within the Blanco-Mesaverde Gas Pool in this application. It is currently producing within the Dakota formation. It will be the third Mesaverde completion in the quarter section in the spacing unit. I anticipate that it will help drain the area toward the west.
- 6. Exhibit C-2 is a basin-wide map reflecting Hilcorp's calculations for original gas in place across the Blanco-Mesaverde Gas Pool. The warmer colors represent areas where there is more original gas in place. The cooler colors indicate areas where there is less original gas in place. The red star indicates the location of the subject well in an area where we calculate moderately high volumes of original gas in place.
- 7. Exhibit C-3 is a map depicting the calculated estimated ultimate recovery (EUR) from the Blanco-Mesaverde Gas Pool and drainage radius. The larger radius circles reflect wells with higher EURs and larger drainage areas. The red star identifies the location of the subject well where there is relatively low EURs and the drainage radii are smaller.
- 8. Exhibit C-4 is a map depicting calculated remaining recoverable gas. The cooler colors indicate areas where there is relatively less remaining recoverable gas. The warmer colors reflect areas where there is relatively more remaining recoverable gas. The red star identifies the location of the subject well in an area where we calculate that there is relatively considerable remaining recoverable gas and relatively low EURs under the existing well density.

- 9. Exhibit C-5 is a table that supports this volumetric analysis. The first column titled "Volumetric OGIP" reflects the calculated volumetric original gas in place on a quarter section, section, and nine-section area basis around the subject spacing unit. The column titled "Section Equivalent OGIP" shows the estimated gas in place to show that the estimates are consistent across the area. The column titled "CTD/RF%" shows the cumulative gas production to date on a quarter section, section, and nine-section area basis and the calculated recovery factor. The column titled "Remaining GIP" shows the estimated remaining gas in place on a quarter section, section, and nine-section area basis. The last column titled "EUR/RF%" shows the estimated ultimate gas recovery and recovery factor calculated on a quarter section, section, and nine-section area basis.
- 10. I would expect recovery factors of approximately 70-80% in a gas pool of this type. The low recovery factors in Exhibit C-5 indicate that that is area is not being sufficiently drained by the existing wells in the subject spacing unit under the existing well density and that additional well bores, or completions, are necessary to adequately drain the Blanco-Mesaverde Gas Pool in this area.
- 11. Approval of Hilcorp's application is therefore necessary to drain unrecovered gas reserves that will otherwise be left in place under the existing well density.
- 12. In my opinion, granting this application will not impair the Blanco-Mesaverde Gas Pool, and will be in the interest of conservation, the prevention of waste and will protect correlative rights.
- 13. Exhibits C-1 through C-5 were prepared by me or under my direction and supervision.

FURTHER AFFIANT SAYETH NAUGHT.

My Commission Expires:

12244187_1

San Juan 27-5 Unit 126E

Well Specifics

- SW7 27-5 3003930518 2008 drill
- 3rd MV completion in SW 1/4 section
 126 MV completion is already planned
 Completion in vertical section of DK horizontal
- 1300' from nearest MV producer
- Help drain area to west
- Complete MV in 1-2 stages
- Section 8 was 20 acre infill pilot
