

CASE NO. 20779 OCD Exhibit 2

Maps Showing Location of Proposed AGI Well and Adjacent Devonian Disposal Wells

- Legend for Enlarged Map Area**
- ▲ Protested administrative application: surface location
 - ▲ Application as case before Division: surface location
 - ▲ Active SWD disposal well: surface location
 - ▲ Proposed AGI well: surface location
 - ▲ Application dismissed at request of applicant due to proximity to fault: Case 20142, Trident SWD No. 1
 - Estimated radius (0.28 mile) of injection of TAG after 30 years (C-108 Application)

Circles around SWD wells on both maps define a 3/4-mile radius from the surface location

Striker 6 SWD No. 2
 API 30-025-44291 SWD-1705
 Open-hole and perforations (4.5-in liner at top of interval): 16,040' to 17,705'
 Injection commenced: 10/2018
 Highest reported rate: 15,545 BWPD at 2899 PSI
 Last reported rate: 2,195 BWPD at 780 PSI
