STATEMENT OF CASE

APPLICANT

(Please make a concise statement of what is being sought with this application and the reasons therefore.)

El Paso Energy Raton, L.L.C. seeks approval from the N.M. Oil Conservation Division (OCD) of twenty (20) non-standard/irregular coalbed methane (CBM) gas spacing units and non-standard setbacks of 200 feet from certain boundaries of the spacing units for unorthodox well locations within the spacing units to be located in the Raton Basin, Colfax County, New Mexico, more particularly described as located within projected Sections 3, 4 and 10, T29N, R18E, NMPM; projected Sections 21, 22, 23, and 24, T30 N, R17 E, NMPM; and projected Sections 29, 30, 32, and 33, T30N, R18E, NMPM, all within the Maxwell Land and Beaubien and Miranda Grants in Colfax County, New Mexico. This area is approximately 36 miles southwest of Raton, New Mexico. The non-standard/irregular spacing units are necessary because of the irregular boundary line between El Paso's mineral interest and the mineral interest of the United States (U.S.) administered by the U. S. Forest Service and the U.S. Bureau of Land Management in the Carson National Forest. The 200 feet setbacks will be from only the outer boundaries of the spacing units adjoining El Paso's mineral interests. Setbacks from the outer boundaries adjoining the irregular boundary line with the United States will be standard 660 foot setbacks. The wells may be completed from the top of the Raton coal seam to the base of the Vermejo coal seam. The non-standard setbacks for unorthodox well locations are necessary to accommodate flexibility for rough terrain and the surface owner's decisions.

OPPOSITION OR OTHER PARTY

(Please make a concise statement of the basis for opposing this application or otherwise state the position of the party filing this statement.)

The BLM's position is set forth in its June 6, 2003 letter to the OCD.

PROPOSED EVIDENCE

APPLICANT

WITNESSES

(Name and expertise)

EST. TIME

EXHIBITS

Paul H. Dowden

Direct testimony is estimated to be 45 minutes or less, subject to matters arising during this case.

Application

Expertise is in petroleum land management, land ownership, oil, gas and mineral leasing, spacing units, well locations, surface owner determinations, pipelines, gas markets and other matters of expertise within the scope of duties of a principal landman.

Certificate and Supplemental Certificates of Mailing and Compliance with Division Rule 1207 (Order R-8054)

Charles M. Kinard

Direct testimony is estimated to be one hour or less, subject to matters arising during this case.

Special Warranty Deed from Vermejo Park Corporation to the USA, c/o USFS, dated 12/30/81, filed for record on 1/22/82, Colfax Co., N.M.

Expertise is in mechanical and petroleum engineering, including coalbed methane (CBM) gas production, operations, resources, and related matters, including within the Raton Basin, spacing units, well locations and drilling and other matters connected with CBM gas production and operations, transportation facilities for CBM gas and gas markets.
