- Applicant is an interest owner in the SE/4 of Section 20 and the SW/4 of Section
 and has the right to drill a well or wells thereon.
 - 2. Applicant proposes to drill the following wells to test the Wolfcamp formation:
 - (a) The Loving Townsite 2021 WC Well No. 1H, with a first take point in the NW/4SE/4 of Section 20, and a final take point in the NE/4SW/4 of Section 21;
 - (b) The Loving Townsite 2021 WA Well No. 1H, with a first take point in the NW/4SE/4 of Section 20, and a final take point in the NE/4SW/4 of Section 21;
 - (c) The Loving Townsite 2021 WC Well No. 2H, well with a first take point in the SW/4SE/4 of Section 20, and a final take point in the SE/4SW/4 of Section 21; and
 - (d) The Loving Townsite 2021 WA Well No. 2H, with a first take point in the SW/4SE/4 of Section 20, and a final take point in the SE/4SW/4 of Section 21.
- 3. Applicant has in good faith sought to obtain the voluntary joinder of all other mineral interest owners in the SE/4 of Section 20 and the SW/4 of Section 21 for the purposes set forth herein.

EXHIBIT

- 4. Although applicant attempted to obtain voluntary agreements from all mineral interest owners to participate in the drilling of the wells or to otherwise commit their interests to the wells, certain interest owners have failed or refused to join in dedicating their interests. Therefore, applicant seeks an order pooling all mineral interest owners in the Wolfcamp formation in the SE/4 of Section 20 and the SW/4 of Section 21, pursuant to NMSA 1978 §§70-2-17, 18.
- 5. The pooling of all mineral interests in the Wolfcamp formation underlying the SE/4 of Section 20 and the SW/4 of Section 21 will prevent the drilling of unnecessary wells, prevent waste, and protect correlative rights.

WHEREFORE, applicant requests that, after notice and hearing, the Division enter its order:

- A. Pooling all mineral interests in the Wolfcamp formation underlying the SE/4 of Section 20 and the SW/4 of Section 21;
- B. Designating applicant as operator of the wells;
- C. Considering the cost of drilling, completing, and equipping the wells, and allocating the cost among the wells' working interest owners;
- D. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- E. Setting a 200% charge for the risk involved in drilling, completing, and equipping the wells in the event a working interest owner elects not to participate in the wells.

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF KAISER-FRANCIS OIL COMPANYFOR COMPULSORY POOLING, EDDYCOUNTY, NEW MEXICO.

Case No. 2/553

SELF-AFFIRMED STATEMENT OF LEE J. LINDMAN

Lee J. Lindman, being duly sworn upon his oath, deposes and states:

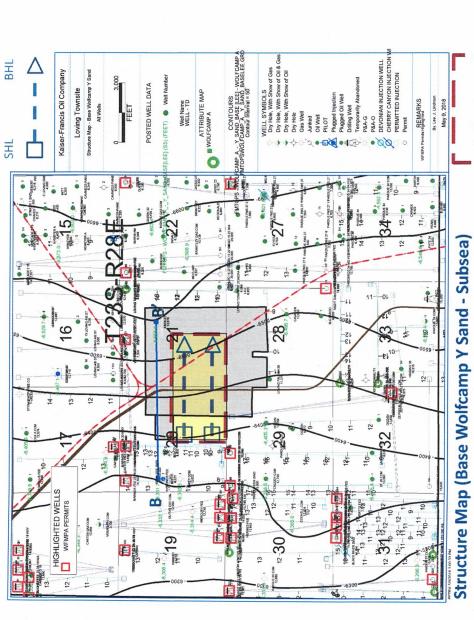

- 1. I am over the age of 18, and have personal knowledge of the geological matters stated herein.
- 2. I am a geologist for Kaiser-Francis Oil Company ("KFOC"). I have been qualified by the Division as an expert petroleum geologist. My area of responsibility at KFOC includes this portion of Southeast New Mexico.
 - 3. The following geological plats are attached hereto:
 - (a) Attachment A is a structure map on the Base of the Wolfcamp Y Sand. It shows that structure dips gently to the East. It also displays other Wolfcamp X-Y wells and permits in the vicinity of the Loving Townsite 2021 WA 1H& 2H,and a line of cross-section. The proposed completion interval in the well is the upper Wolfcamp X-Y sand.
 - (b) Attachment B is a Gross Isopach map of the Wolfcamp X-Y Sand. This zonehas uniform thickness across the proposed well unit.
 - (c) Attachment C is cross-section B-B'. The well logs on the cross-section give a representative sample of the Wolfcamp X-Y formation in this area. The target zone for these wells is continuous across the well unit.
 - (d) Attachment D is a structure map of the Base of the Wolfcamp C. It shows that the structure dips gently to the East. It also displays the other Wolfcamp C wells and permits in the vicinity of the Loving Townsite 2021 WC 1H & 2H, and a line of cross-section. The completed interval is the Wolfcamp C.
 - (e) Attachment E is a Gross Isopach map of the Wolfcamp C. This zone has uniform thickness across the well unit.
 - (f) Attachment F is a cross-section B-B'. The well logs on the cross-section give a representative sample of the Wolfcamp C formation in this area. The target zone for these wells is continuous across the well unit.

- 4. I conclude from the maps that:
- (a) The horizontal spacing unit is justified from a geologic standpoint.
- (b) Each quarter section in the well unit will contribute more or less equally to production from the well.
- (c) There is no faulting or other geologic impediment which will adversely affect the drilling of the subject well.
- 5. Based on production from wells in this area, KFOCsees no difference for standup or laydown wells in this area.
- 6. Attachment G contains the proposed horizontal drilling plans for the Loving Townsite WA 1H & 2H wells and the as-drilled C-102s for the Loving Townsite 2021 WC 1H & #2H wells. The completed Loving Townsite 2021 WC 1H and 2H are orthodox and comply with Division setback requirements. The proposed wells will also be orthodox and comply with Division setback requirements.
- 7. I understand that this Self-Affirmed Statement will be used as written testimony in this case. I affirm that my testimony in paragraphs 1 through 6 above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date handwritten next to my signature below.
