Oil Conservation Commissioners

Dear Commissioners,

I urge you to maintain the current New Mexico Pit Rule, which protects our water supply from drilling waste.

For the last four years, New Mexico's Pit Rule has kept drilling waste out of our water supply. I urge you to maintain this effective rule.

Sincerely,

Alahna Weller

Subject: Pit Rule Comment

NM Oil Conservation Commissioners:

Hello and good day.

Oil and gas company profits are at an all time high. However, even if that were not the case it would be foolhardy to weaken the existing NM oil and gas development "pit rule". We must remain ever alert to the dangers inherent in the production of fossil fuels. We must be sure that the degradation of our environment and threats to human life are not a part of the cost of that work. If we neglect to use all of the technology at hand to prevent problems we have failed our neighbors and the environment we depend upon for our survival.

Thank you for your work on our behalf.

Sincerely,
Diane & Doug Shelley

For the last four years, New Mexico's Pit Rule has kept drilling waste out of our water supply. I urge you to maintain this effective rule.

This Pit Rule has been effective at protecting our State's water. There is no valid reason for repealing it!

Please don't threaten the safety of our water for any reason, especially for any fadish "anti-regulatory" ideology. This issue is a prime example of the need for regulations to protect public and environmental health.

Sincerely,

Don Hyde

Oil Conservation Commissioners

Dear Commissioners,

I urge you to maintain the current New Mexico Pit Rule, which protects our water supply from drilling waste.

For the last four years, New Mexico's Pit Rule has kept drilling waste out of our water supply. I urge you to maintain this effective rule.

Sincerely,

John Rivers

Jun 14, 2012

Oil Conservation Commissioners

Dear Commissioners,

I urge you to maintain the current New Mexico Pit Rule, which protects our water supply from drilling waste.

For the last four years, New Mexico's Pit Rule has kept drilling waste out of our water supply. This is a sensible policy, and far, far cheaper for the energy interests, which seek to have it overturned, than the costs of lawsuits that will inevitably be brought against them for groundwater contamination. The energy boys, as usual, don't understand what's in their best interests. The citizens of New Mexico do.

I urge you to maintain this effective rule.

Sincerely,

John Stokes

Oil Conservation Commissioners

Dear Commissioners,

I urge you to maintain the current New Mexico Pit Rule, which protects our water supply from drilling waste.

For the last four years, New Mexico's Pit Rule has kept drilling waste out of our water supply. I urge you to maintain this effective rule.

Sincerely,

warren harkey
