Attention: Mr. Mark Stephens

Re: Request for Activation of Injection Status  
North Hobbs Grayburg San Andres Unit Well No. 637  
API No. 30-025-37101  
1268' FNL & 1455' FEL (Unit B)  
Section 24, T-18S, R-37E, NMPM,  
Lea County, New Mexico

Dear Mr. Stephens:

The Division has received and reviewed your request dated June 22, 2005 to drill and complete the North Hobbs Grayburg San Andres Unit ("NHGSAU") Well No. 637 as an injection well within the NHGSAU Pressure Maintenance Project.

By Order No. R-6199-B dated October 22, 2001, the Division authorized Occidental Permian Ltd. to implement a tertiary recovery injection project within the NHGSAU Pressure Maintenance Project by the injection of water, CO<sub>2</sub> and produced gas into the Grayburg and San Andres formations, Hobbs Grayburg-San Andres Pool. The order further approved sixty (60) wells to be utilized for injection, including twenty-one (21) wells that were to be drilled and converted at a later time. It is our understanding that the NHGSAU Well No. 637, which was initially identified as the NHGSAU Well No. 312 by Order No. R-6199-B, is now going to be drilled and completed as an injection well.

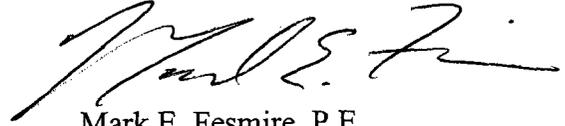

Pursuant to Order No. R-6199-B, the NHGSAU Well No. 637 has already been permitted for injection. Occidental Permian, Ltd. is therefore authorized to drill and complete this well as an injection well within the NHGSAU Pressure Maintenance Project.

Injection and operation of this well shall be in conformance with all provisions contained within Division Order No. R-6199-B.
