**Attachments:** Gem #3 WIW Del Req for Publication.pdf

*Case 14973*

Good afternoon, Mr. Jones.

Attached, please find one copy of the Application for Injection for our 8705 JV-P Gem #3 API 30-025-30977. We are proposing to plug back from the current Delaware perforations and open a new Delaware interval. We plan to utilize this well to enhance recovery.

We are currently permitted, in this well, in the SWD, Delaware SWD-794.

Please advise as to your estimate of review time, if possible. The well is currently shut in, until we receive permission for the rework.

Should you have any questions or require additional information, please give a shout.

Thanks,

Pam

Thanks for the quick response, Will.

I will fax you a copy shortly.

The well is currently shut in, until we receive permission for the rework.

Pam

**Subject:** RE: Disposal applications

Hello Pam,

We strive for 30 day turnaround, but that is after the application has everything needed and it still can be considered administratively.

As you know, all applications are different in that regard.

The biggest time delays are notice issues and sometimes waiting on a geologist or log analyst to send an analysis takes a while.

If you are in a real hurry, send it in and let me know you are in a bind.  
I will look it over immediately and give you feedback.

Thank You,

Will

**Subject:** Disposal applications

Good morning, Mr. Jones.

BTA submitted, back in May, an application for disposal at our 8705 JV-P Gem #3, 30-035-30977. There were several issues with this application and BTA did not proceed with that application.

We are proposing to dispose in the Delaware for this well.

What is the current turnaround time for application processing, at present?

Thanks,

Pam
