for the South Culebra Bluff - Bone Spring Pool
Eddy County, New Mexico

Dear Mr. Kimsey:

As you are aware, Mewbourne Oil Company as Applicant has applied to abolish the Special Pool Rules and Regulations for the South Culebra Bluff - Bone Spring Pool. This Pool was created by Division Order R-6139 which provided for 80 acre spacing, wells to be located within 150 feet of the center of a quarter-quarter Section or Lot and had a depth bracket allowable of 222 barrels of oil per day.

By abolishing the above referenced Special Pool Rules, this would allow Operators more flexibility in locating surface and bottom hole locations and increasing the depth bracket allowable to 187 barrels of oil per day which would provide for 748 barrels of oil per day for 160 acre Project Areas in lieu of the current 444 barrels of oil per day for 160 acre Project Areas for the Bone Spring formation.

In reference to the above, Mewbourne Oil Company respectfully requests your support to abolish the above referenced Special Pool Rules and Regulations whereby Mewbourne Oil Company is requesting that all existing 80 acre well units be grandfathered in, unless an Operator in this Pool desires to change spacing for its well units.

Please acknowledge your firm's support of our Application by signing and returning this letter to me at your earliest convenience. For your information, our case will be heard at an Examiner's Hearing on June 27, 2013. Accordingly, please have this letter signed and returned to me via fax (432) 685-4170 or by email to phaden@mewbourne.com at your very earliest convenience.
