Gentlemen:

Devon Energy Production Company, L.P. ("DEPCO") proposes to drill the referenced horizontal well to an approximate TVD of 8,367' and an approximate TMD of 13,444' in order to test the Bone Spring formation.

To facilitate this project, DEPCO also proposes forming a 160-acre Project Area consisting of the W/2 E/2 of Section 35, T 24S-R28E, Eddy County, NM. This Project Area will be made up of Federal Lease USA NMNM 25953 and Fee Minerals, insofar as it covers W/2 E/2 of Section 35, T24S-R28E, Eddy County, NM. Accordingly, Chevron USA, Inc. would have an 18.75% WI and RKC, Inc. would have a 6.25% WI in the proposed Project Area and well.

Enclosed you will find DEPCO's AFE for the procedure reflecting our estimated completed well cost of \$7,783,622. A proposed JOA will be mailed under separate cover. If you elect to participate in this well, please return to my attention via mail, email, or fax @ 405-234-2644 a signed AFE, four signed sets of signature pages to the Communitization Agreement, and your most updated well requirement sheet including email addresses. If returned by email or fax, the signature will be deemed an original response.

If you have any questions concerning this proposal, please contact the project engineer, Ryan Dzurisin at 405-228-2469 or the undersigned at 405-552-3365.

Yours very truly,

DEVON ENERGY PRODUCTION COMPANY, L.P.
