MR. STOGNER: We're going to call next Case 7978, which is the application of Chama Petroleum Company for compulsory pooling and an unorthodox well location, Eddy County, New Mexico.

MR. CARR: May it please the Examiner, my name is William F. Carr, with the law firm Campbell, Byrd, and Black, P.A., of Santa Fe, appearing on behalf of Chama Petroleum Company.

Mr. Examiner, we have received voluntary joinder from all interest owners in the spacing unit and therefor at this time we request that you dismiss the portion of the case relating to the compulsory pooling.

MR. STOGNER: Thank you, Mr. Carr. Mr. Letizio did not have any interest in this area?

MR. CARR: He did not.

MR. STOGNER: Thank you.

MARK NEARBURG,

being called as a witness and being duly sworn upon his oath, testified as follows, to-wit:

DIRECT EXAMINATION

BY MR. CARR:

Q Will you state your name and place of residence.

A Mark Nearburg, Dallas, Texas.

Q Are you the same Mark Nearburg who

testified in the previous case and had your credentials accepted and made a matter of record?

A Yes.

Q Are you familiar with the application filed on behalf of Chama in this case?

A Yes.

Q Are you familiar with the subject acreage and the Parino No. 1 Well?

A Yes.

MR. CARR: Are the witness' qualifications acceptable?

MR. STOGNER: They are, and also let the record show that he was previously sworn in in the previous case.

Q Mr. Nearburg, will you state what Chama seeks with this application?

A With this application Chama seeks approval of an unorthodox location for a re-entry of the previously drilled Amoco Parino Well in the south half of Section 23.

Q And what is the location of this well?

A This well is located 1980 feet from the south line and 660 feet from the east line.

Q And when this well was originally drilled it was at a standard location, is that correct?

A That's correct.

Q Would you provide Mr. Stogner with a

brief history of this well?

A This well was drilled in 1978 by Amoco Production Company to the Morrow formation and was dry and abandoned at that time.

Chama Petroleum Company desired to re-enter this well and on 9-22-83 Les Clements in Artesia approved re-entry of the well at this location on a south half unit.

9-26 his actual approval was given pending approval of the nonstandard location from Santa Fe.

Q So on the 26th you received written approval.

A That's right.

Q Okay, and then you were permitted to re-enter the well but you had to get the location approved by coming to hearing.

A That's correct.

Q Will you please refer to what has been marked for identification as Chama Exhibit Number One, identify this and explain what it shows?

A This is a land map covering the subject area. In Section 23, outlined in blue, was Amoco's east half proration unit for drilling the Parino in 1978. In yellow is Chama's south half unit.

Q Why are you dedicating the south half to this well?

A We turned the original unit from the east

half to the south half to protect our working interest.

Q And you turned back the working interest ownership in the southwest quarter.

A Yes, southwest quarter.

Q What is the status of the acreage to the east of the subject well?

A In Section 24 Chama has leased 11/16ths of the south half and 5/32nds of the west half northwest quarter. The other mineral interests are owned by industry people and they have been contacted and have agreed to work with us at such time as we drill on that acreage.

Q Would this location qualify for administrative approval by the Commission?

A No, this would not qualify for administrative approval because on the south half proration unit the well is not 1980 feet from the end boundary of the unit.

Q And you're having to come to hearing because you turned the spacing unit.

A That's correct.

Q In your opinion will granting this application be in the best interest of conservation, the prevention of waste, and the protection of correlative rights?

A Yes.

MR. CARR: At this time we would offer into evidence Chama Exhibit Number One.

MR. STOGNER: Chama's Exhibit Number One will, and all others will be admitted into evidence.

MR. CARR: And that concludes my examination of this witness.

CROSS EXAMINATION

BY MR. STOGNER:

Q Also for this well, again, the east half was dedicated to it previously. It was a standard location at that time in the Morrow.

A That's correct.

MR. STOGNER: I have no further questions of this witness.

Does anybody else have anything further in Case Number 7978 this morning of this witness?

If not, he may be excused, and Case Number 7978 will be taken under advisement.

(Hearing concluded.)
