STATEMENT OF THE CASE

The Fifth Amended Application for Rulemaking filed by the Oil Conservation Division ("the Division") requests an order amending 9.15.39 NMAC by adding a new section 11 that would apply to newly-drilled wells within a Division-specified Designated Area. The intended effect of the Division's proposed rule is a requirement of two strings of surface protection casing in any well drilled through the shallow and artesian aquifers within the Designated Area.

EOG opposes the Division's application on the grounds that the proposed rule: (1) is unnecessary in light of the Division's current statewide rules, which provide adequate protection for the shallow and artesian aquifers, and historical and current drilling practices within the Designated Area that have proven to be protective of both aquifers; and (2) would result in excessive drilling costs and increased drilling and safety risks.

PROPOSED EVIDENCE

<u>WITNESS</u>	<u>ESTIMATED TIME</u>	<u>EXHIBITS</u>
Jeremiah Mullen (Engineer)	30 minutes	3

In accordance with 19.15.4.13(B)(2) NMAC, EOG has attached hereto copies of the documentary exhibits (Exhibit Nos. 1 through 3) that it proposes to offer into evidence at the hearing.

EOG reserves the right to call a rebuttal witness(es) and introduce rebuttal exhibits if appropriate.

PROCEDURAL MATTERS

EOG is not aware of any procedural matters to be resolved prior to or at the hearing.

CERTIFICATE OF SERVICE

I hereby certify that on this 21st day of November, 2016, I served a true and correct copy of the foregoing *Pre-Hearing Statement of EOG Y Resources, Inc.* via email to:

Wells in the OCD's Proposed Rule Area Operated by EOG Y Resources Inc. formerly YPC

Total number of operated wells	771
Wells with one casing string to protect both aquifers	377
Wells with two casing strings excluding production casing	410
Wells with two casing strings to case off aquifers separately	0

The numbers show that EOG Y Resources Inc. formerly YPC operates 771 wells in the OCD's proposed rule area. Of these 771 wells, there are 377 (48.9%) of them that utilized one string of casing to case off both aquifers. 410 wells ran two strings of casing (excluding production casing) but did so due to hole problems, not for the purpose of separately casing off the aquifers. Finally, the number of wells that did run two strings of casing for the sole purpose of casing off the aquifers separately is zero.

Added cost to case off aquifers separately

17 1/2" bit	\$1,500
Casing: 13 3/8" @ 450'	\$16,000
Cement 13 3/8" casing	\$7,000
Float equipment	\$2,500
Wellhead	\$1,500
BOP test	\$2,000
Casing inspection	\$450
Haul casing	\$500
Welder (csg and head)	\$1,500
12 hrs rig & rentals (drill surface, set & cement casing)	\$20,000
Bond log cost	\$4,000
72 hrs waiting on cement for bond log	\$120,000
4 hrs to rig up and run bond log	\$6,668
? hrs for District office to review & approve bond log	???
Cost for added casing string	\$183,618

Bond log cost	\$4000
72 hrs waiting on cement for bond log	\$120,000
4 hrs to rig up and run bond log	\$6,668
? hrs for District office to review & approve bond log	???
Cost for bond log on interm. casing	\$130,668

Minimum cost of proposed rule (excluding time for bond log review and approval) \$314,286/per well
