STATE OF NEW MEXICO  
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES  
OIL CONSERVATION DIVISION

APPLICATION OF HILCORP ENERGY  
COMPANY FOR AN EXCEPTION TO THE  
WELL DENSITY REQUIREMENTS OF THE  
SPECIAL RULES AND REGULATIONS FOR  
THE BLANCO-MESAVERDE GAS POOL,  
SAN JUAN COUNTY, NEW MEXICO.

CASE NO. 20638

APPLICATION

Hilcorp Energy Company, ("Hilcorp") (OGRID No. 372171), through its undersigned counsel, hereby files this application with the Oil Conservation Division for an order for an exception to the well density requirements of the Blanco-Mesaverde Gas Pool (72319), San Juan County, New Mexico. Specifically, Hilcorp seeks an exception to the well density requirements of Rule I.B of the Special Rules and Regulations of the Blanco-Mesaverde Gas Pool to permit it to complete and simultaneously produce four Mesaverde gas wells in the same quarter section, for a total of six Mesaverde gas wells within the same standard 314-acre, more or less, spacing and proration unit. In support of this application, Hilcorp states:

1. Hilcorp is the operator of a standard 314-acre, more or less, spacing and proration unit in the Blanco-Mesaverde Gas Pool comprised of the W/2 of Section 13, Township 31 North, Range 12 West, San Juan County, New Mexico, in which the following four wells are currently completed and producing:

- a. Grenier 005 Well (API No. 30-045-10787), Sec. 13, T31N, R12W (Unit C);
- b. Grenier 005A Well (API No. 30-045-21878), Sec. 13, T31N, R12W (Unit L);

- c. Grenier 005B Well (API No. 30-045-30000), Sec. 13, T31N, R12W (Unit E); and
- d. Grenier 011E Well (API No. 30-045-23646), Sec. 13, T31N, R12W (Unit N).

2. The Blanco-Mesaverde Gas Pool is governed by Special Rules and Regulations which provide for 320-acre spacing and proration units on which as many as four wells may be drilled. See Order No. R-8170, as superseded by Order No. R-10987-A, and amended by Order No. R-10987-A(1), effective Dec. 2, 2002. These Special Pool Rules and Regulations provide:

**I. ACREAGE AND WELL LOCATION REQUIREMENTS**

**A. Standard GPU (Gas Proration Unit):** *A standard GPU in the Blanco-Mesaverde Pool shall be 320 acres, more or less, comprising any two contiguous quarter sections of a single section that is a legal subdivision of the U. S. Public Land Surveys.*

**B. Well density:**

(1) *Up to four (4) wells may be drilled on a standard GPU, as follows:*

(a) *the FIRST OPTIONAL INFILL WELL drilled on a GPU shall be located in the quarter section not containing the INITIAL Mesaverde well;*

(b) *the SECOND OPTIONAL INFILL WELL drilled on a GPU shall be located in a quarter-quarter section not containing a Mesaverde well and within a quarter section not containing more than one (1) Mesaverde well;*

(c) *the THIRD OPTIONAL INFILL WELL drilled on a GPU shall be located in a quarter-quarter section not containing a Mesaverde well and within a quarter section not containing more than one (1) Mesaverde well;*

(d) *at the discretion of the operator, the second or third optional infill well may be drilled prior to the drilling of the first optional infill well;*

*(e) no more than two wells shall be located within either quarter section in a GPU; and*

*(f) any deviation from the above-described well density requirements shall be authorized only after hearing.*

3. The objective formation in each of the above-described wells in Paragraph 1 is the Blanco-Mesaverde Gas Pool, and each well was permitted and drilled with a Mesaverde completion.

4. Hilcorp now proposes to simultaneously dedicate and produce the following fifth and sixth wells within the same standard spacing and proration unit, at the following location:

a. **Grenier 011 Well** (API No. 30-045-10763), Sec. 13, T31N, R12W (Unit F); and

b. **Grenier 011F Well** (API No. 30-045-30466), Sec. 13, T31N, R12W (Unit D).

5. Hilcorp therefore requests that the Division enter an order granting an exception to the well density requirements of Rule I.B of the Special Rules and Regulations of the Blanco-Mesaverde Pool to authorize Hilcorp to simultaneously dedicate and produce the **Grenier 011 Well** (API No. 30-045-10763) and the **Grenier 011F Well** (API No. 30-045-30466) within the W/2 of Section 13, Township 31 North, Range 12 West, permitting the total number of wells dedicated and producing within this spacing and proration unit to six, with four wells in the same quarter section.

6. Approval of this application will not impair the correlative rights of any other interest owner in the Blanco-Mesaverde Gas Pool and will afford Hilcorp the opportunity to use existing wells to produce incremental reserves from this spacing unit.

7. Approval of this application will be in the best interest of conservation, the prevention of waste, and the protection of correlative rights.

WHEREFORE, Hilcorp Energy Company requests that this application be set before an Examiner of the Oil Conservation Division on July 11, 2019, and, after notice and hearing as required by law, that the Division enter an order:

- Granting an exception to the well density requirements of Rule I.B of the Special Rules and Regulations of the Blanco-Mesaverde Gas Pool (72319) permitting the total number of wells dedicated and producing within this spacing and proration unit to six, with four wells in the same quarter section;
- Approving the proposed location of the **Grenier 011 Well** (API No. 30-045-10763) in the Mesaverde formation with a surface location in Unit F within the W/2 of Section 13, Township 31 North, Range 12 West, NMPM, San Juan County, New Mexico;
- Approving the proposed location of the **Grenier 011F Well** (API No. 30-045-30466) in the Mesaverde formation with a surface location in Unit D within the W/2 of Section 13, Township 31 North, Range 12 West, NMPM, San Juan County, New Mexico; and
- Authorizing Hilcorp to simultaneously complete and produce the **Grenier 011 Well** and the **Grenier 011F Well** from the Blanco-Mesaverde Gas Pool.

Respectfully submitted,

HOLLAND & HART LLP

**ATTORNEYS FOR HILCORP ENERGY COMPANY**

CASE 20638

**Application of Hilcorp Energy Company for an Exception to the Well Density Requirements of the Special Rules and Regulations of the Blanco-Mesaverde Gas Pool, San Juan County, New Mexico.** Applicant in the above-styled cause seeks an order for an exception to the well density requirements of Rule I.B of the Special Rules and Regulations for the Blanco-Mesaverde Gas Pool (72319), San Juan County, New Mexico, to permit it to complete and simultaneously produce six Mesaverde gas wells in the same standard 314-acre, more or less, spacing and proration unit, with four wells in the same quarter section. Hilcorp further seeks approval for the proposed location of the **Grenier 011 Well** (API No. 30-045-10763) in the Mesaverde formation with a surface location in Unit F and the **Grenier 011F Well** (API No. 30-045-30466) in the Mesaverde formation with a surface location in Unit D within the W/2 of Section 13, Township 31 North, Range 12 West, NMPM, San Juan County, New Mexico, and authorization to simultaneously complete and produce the those wells from the Blanco-Mesaverde Gas Pool. Said area is located approximately 14 miles north of Aztec, NM.
