Re: Injection Pressure Increase  
Ballard Grayburg-San Andres Unit  
Eddy County, New Mexico

Dear Sir:

Reference is made to your request of May 21, 1986 to increase the surface injection pressure on three wells in your Ballard Grayburg San Andres Unit. This request is based on step rate tests conducted on the wells May 13-15, 1986. The results of the tests have been reviewed by my staff and we feel an increase in injection pressure on these wells is justified at this time.

You are therefore authorized to increase your surface injection pressure on the following wells:

<u>Well &amp; Location</u>	<u>Maximum Injection Surface Pressure</u>
BGSAU No. 5-9 Section 8, T-18S, R-29E	1032 PSIG
BGSAU No. 5-14 Section 8, T-18S, R-29E	925 PSIG
BGSAU No. 10-9 Section 4, T-18S, R-29E	895 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or it is endangering any fresh water aquifers.

Sincerely,

A handwritten signature in dark ink, appearing to read "R. L. Stamets", written over the word "Sincerely,".

R. L. STAMETS
