**RE: Injection Pressure Increase Mesa Gallup Unit Waterflood Project,
 San Juan County, New Mexico**

Dear Mr. Thompson:

Reference is made to your request dated July 24, 1995 to increase the surface injection pressure on 6 wells in the above referenced waterflood project. This request is based on two representative step rate tests conducted on two of the wells on July 10, 1995. The results of the tests have been reviewed by my staff and we feel an increase in injection pressure on these wells is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following wells:

Well and Location	Maximum Surface Injection Pressure
Navajo 'C' Well No.1, Unit Letter H, Section 15	700 PSIG
Navajo Well No.3, Unit Letter N, Section 24	700 PSIG
Navajo Well No.11, Unit Letter B, Section 23	700 PSIG
Navajo Well No.4, Unit Letter J, Section 14	700 PSIG
Navajo 'C' Well No.7, Unit Letter E, Section 24	700 PSIG
Navajo 'C' Well No.3, Unit Letter O, Section 14	700 PSIG
All wells located Township 32 North, Range 18 West, San Juan County, New Mexico.

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Re: Mesa Gallup Unit
Step Rate Injection Tests

Dear Mr. Chavez,

On July 10, 1995, step rate injection tests were performed on Mesa Gallup Unit #9 (Navajo #7) and Mesa Gallup Unit #21 (Navajo #C1). Both of these wells were recently converted from producing wells to injectors as part of an expansion of the Mesa Gallup waterflood project.

The data from the bottom hole pressure recorder indicates that a surface pressure of approximately 725 to 740 psig is equal to the parting pressure of the Gallup formation. As a result of these tests, 21st Century Investments requests administrative approval for a maximum field wide injection pressure of 725 psig.

Attached for your information and review are copies of the Halliburton job log and the bottomhole pressure data from Tefteller.

Please call if you have any questions or need additional data.

Sincerely,

Paul C. Thompson
