RE: Injection Pressure Increase  
State "H-35" Well No. 15  
H-35 Vacuum Pressure Maintenance  
Project  
Lea County, New Mexico

Dear Mr. Wacker:

Reference is made to your request dated April 11, 1989, to increase the surface injection pressure on the State "H-35" Well No. 15. This request is based on a step rate test conducted on the well on December 5, 1988. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on the well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well.

WELL AND LOCATION

MAXIMUM INJECTION  
SURFACE PRESSURE

State "H-35" Well No. 15  
Unit C, Section 35, T-17 South,  
R-34 East, NMPM, Lea County,  
New Mexico.

1350 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

William J. LeMay  
Director
