Attention: Tommy W. Thompson

RE: Injection Pressure Increase
Langlie-Mattix Penrose Sand Unit
Lea County, New Mexico

Dear Mr. Thompson:

Reference is made to your request dated January 17, 1989, to increase the surface injection pressure on the Langlie-Mattix Penrose Sand Unit Well No. 18-3. This request is based on a step rate tests conducted on the well on January 12, 1989. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on the well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well.

WELL AND LOCATION

MAXIMUM INJECTION
SURFACE PRESSURE

LMPSU Well No. 18-3
10 FSL & 1310 FWL (Unit M)
Section 26, T-22 South,
R-37 East, NMPM, Lea County,
New Mexico

1391 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

William J. LeMay
Director
