Attention: Ewell N. Walsh

**RE: Injection Pressure Increase Disposal No. 1, Section 3, Township 29 North, Range 11 West, NMPM, San Juan County, New Mexico**

Dear Mr. Walsh:

Reference is made to your request dated April 15, 1988 to increase the surface injection pressure on the above-referenced well. This request is based on a step rate tests conducted on this well on April 14, 1988. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on this well is justified at this time. This approval will be retroactive to cover that time which has elapsed since the original step rate test, at which time, the supervisor of the Aztec District Office verbally authorized the increase in injection pressure.

You are therefore authorized, as of April 15, 1988 and now, to increase the surface injection pressure on the following well:

Well and Location	Maximum Injection Surface Pressure
Disposal Well No. 1 Unit F, Section 3, Township 29 North, Range 11 West	1870
This well is located in San Juan County, New Mexico.	

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

  
 William J. LeMay  
 Director
