*Case 13671*

2006 FEB 14 PM 12 35

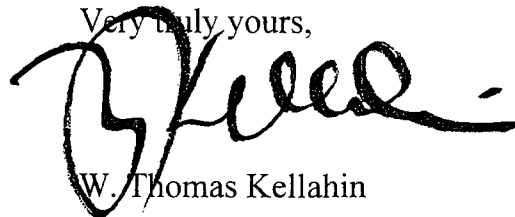

Re: Application of Burlington Resources Oil & Gas Company LP  
for an exception to the well density requirements of the  
Special Rules and Regulations for the Blanco-Mesaverde  
Gas Pool, Rio Arriba County, New Mexico

W/2 Section 33, T29N, R7W including the simultaneous dedication  
of the San Juan 29-7 Unit Well 97B (Unit Letter C) and the  
San Juan 29-7 Unit Well 114M (Unit Letter C) both located in the  
same 40-acre tract of the spacing unit.

Dear Mr. Fesmire:

On behalf of Burlington Resources Oil & Gas Company LP, please  
find enclosed our referenced application which we request be set for  
hearing on the Examiner's docket now scheduled for March 16, 2006. Also  
enclosed is our proposed advertisement of this case for the NMOCD  
docket.

Very truly yours,

W. Thomas Kellahin

cc: Burlington Resources Oil & Gas Company LP  
Attn: Alan Alexander

**CASE 367!** Application of Burlington Resources Oil & Gas Company LP for an exception to the well density requirements of the Blanco-Mesaverde Gas Pool, Rio Arriba County, New Mexico. Applicant seeks an exception to the well density requirements of Rule I.B of the Special Rules and Regulations for the Blanco-Mesaverde Gas Pool to permit it to produce the following 2 Mesaverde gas wells in the same quarter-quarter section (NE/4NW/4) on a standard spacing and proration unit comprised of the W/2 of Section 33, T29N, R7W, NMPM:

(a) the San Juan 29-7 Unit Well No. 97B (API #30-039-2586100) located 2135 feet FWL and 1195 feet FNL (Unit C) of this section; and

(b) the San Juan Unit 29-7 Well No. 114M (API #30-039-2242500) located 1530 feet FWL and 790 feet FNL (Unit C) of this section; and

These wells are located approximately 9 miles south of the Navajo Dam, New Mexico.

**IN THE MATTER OF THE APPLICATION OF  
BURLINGTON RESOURCES OIL & GAS COMPANY LP  
FOR AN EXCEPTION TO THE WELL DENISTY  
REQUIREMENTS FOR THE BLANCO-MESAVERDE  
GAS POOL, RIO ARRIBA COUNTY, NEW MEXICO.**

CASE NO. 13671

**APPLICATION**

Burlington Resources Oil & Gas Company LP. ("Burlington") by its attorneys, Kellahin & Kellahin, seeks an order for an exception to the well density requirements of the Blanco-Mesaverde Gas Pool, San Juan County, New Mexico. Applicant seeks an exception to the well density requirements of Rule I.B of the Special Rules and Regulations for the Blanco-Mesaverde Gas Pool to permit it to produce the following 2 Mesaverde gas wells in the same quarter-quarter section (NE/4NW/4) on a standard spacing and proration unit comprised of the W/2 of Section 33, T29N, R7W, NMPM:

(a) the San Juan 29-7 Unit Well No. 97B (API #30-039-2586100) located 2135 feet FWL and 1195 feet FNL (Unit C) of this section; and

(b) the San Juan Unit 29-7 Well No. 114M (API #30-039-2242500) located 1530 feet FEL and 790 feet FNL (Unit C) of this section; and

In support of its application Burlington states:

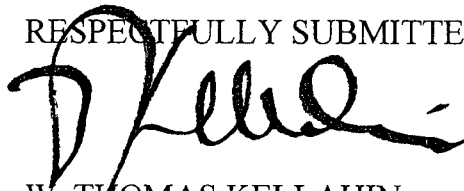

- (1) Burlington is the current operator of the San Juan 29-7 Unit that includes, among other acreage, the W/2 of Section 33, T29N, R7W, San Juan County, New Mexico.

- (2) This spacing unit currently contained four well completed in the Blanco-Mesaverde Gas Pool as follows:
  - (a) the San Juan 29-7 Unit Well No. 97B (API #30-039-2586100) located 2135 feet FWL and 1195 feet FNL (Unit C) of this section; and
  - (b) the San Juan Unit 29-7 Well No. 114M (API #30-039-2242500) located 1530 feet FEL and 790 feet FNL (Unit C) of this section; and
  - (c) the San Juan 27-5 Unit Well No. 97 (API #300390748400) located 1650 feet FSL and 990 feet FWL (Unit L) of this section.
  - (d) the San Juan 27-5 Unit Well No. —97C (API #300392613100) located 830 feet FSL and 1675 feet FWL (Unit N) of this section.
- (3) The Blanco-Mesaverde Gas Pool is governed by Special Rules and Regulations which provide for 320-acre spacing and proration units on which as many as four wells may be drilled. See Order R-8170, as superseded by Order R-10987-A, effective February 1, 1999 and amended by Order R-10987-A (1), effective December 2, 2002. This Special Pool Rules and Regulations provide, among other things, that an infill well shall not be located within the same quarter-quarter section (40-acre tract) and another well.
- (4) On or about December 11, 2000, Burlington recompleted the San Juan 29-7 Unit Well No. 114M, such that the No. 114M and the No. 97B are both in the same quarter-quarter section and are located at standard distances from the outer boundaries of this GPU.
- (5) Upon becoming aware of its mistake, on February 6, 2006, Burlington shut-in the Well No. 97B that remains shut-in and is not producing from the Mesaverde formation.

- (6) While the total number of wells in this Mesaverde gas proration unit ("GPU") is not more than what is allowed, the Well No. 78B and Well No. 114M are located in the same quarter-quarter section and therefore are in violation of the density requirements of this Special Pool Rules.
- (7) Burlington therefore requests that the Division enter its order granting an exception to the well density requirements of Rule I.B of the Special Rules and Regulations of the Blanco-Mesaverde Gas Pool approving the location of the San Juan 29-7 Unit Well No. 97B and the Well No. 114M in the same quarter-quarter section and authoring Burlington to simultaneously produce both wells.
- (8) Approval of this application will not impair the correlative rights of any other interest owner in the Blanco-Mesaverde Gas Pool and will afford Burlington the opportunity to utilize the existing wells to produce the reserves from this GPU.
- (9) Approval of this application will be in the best interests of conversations, the prevention of waste and the protection of correlative rights.

WHEREFORE, Burlington Resources Oil & Gas Company, LP requests that this application be set for hearing before an Examiner of the Oil Conservation Division on March 16, 2006 and after notice and hearing as required by law, the Division enter its order granting an exception to the well density requirements of Rule I.B of the Special Rules and Regulations of the Blanco-Mesaverde Gas Pool approving the location of the San Juan 29-7 Unit Wells No. 97B and No. 114M in the Mesaverde formation and authorizing Burlington to simultaneously produced both wells.

RESPECTFULLY SUBMITTED:
