| M                                | T31N R8W S30 East       | 25.5         | 31.9    | 22          | 145%                      | 488                                  |
| Average                          |                         | 15.3         | 19.7    | 20.4        | 97%                       | 326                                  |
| Non Standard Drill Block Average |                         | 19.1         | 24.8    | 20.8        | 119%                      | 398                                  |

- Total EUR for the region approaches total mapped GIP.
- Variable drainage, and drainage in excess of spacing unit size demonstrates competitiveness of the Fruitland Coal Pool
