Basin Fruitland Coal

Dear Mr. LeMay,

This is a request on behalf of SG Interests I, Ltd. for administrative approval of the above referred to non-standard location.

This non-standard location is necessitated by a variation in the legal subdivisions of the U.S Public Land Surveys and for topographic reasons. Attached for your review is a copy of the well location plat (Form C-102). The dedicated acreage for this well is 308.56 acres due to the irregular size of Section 30, T30N, R9W.

This location does not meet the minimum set back requirements for Fruitland Coal wells due steep cliffs in the southwest quarter of Section 30. A topographic map showing the location for this well has been included.

Also attached is a plat indicating the offset Fruitland Coal operators and a list of offset operators and their addresses.

The offset Fruitland Coal operators are being notified of this application by certified return receipt mail. Copies of these letters are enclosed.

Thank you for your consideration and approval of this application. If you have any questions please do not hesitate to call upon me.

Sincerely,

Paul C. Thompson
