STATEMENT OF THE CASE

APPLICANT

In Case No. 13,912, EOG Resources, Inc. ("EOG") seeks an order pooling all mineral interests from the surface to the base of the Bone Spring formation underlying the SW/4NW/4 of Section 17, Township 18 South, Range 34 East, NMPM, to form a standard 40-acre oil spacing and proration unit for any and all formations or pools developed on 40-acre spacing within that vertical extent. The units are to be dedicated to the Cimarron "17" State Well No. 1, to be drilled at an orthodox location in the SW/4NW/4 of Section 17. Also to be considered will be the cost of drilling and completing the well and the allocation of the cost thereof, as well as actual operating costs and charges for supervision, designation of applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well.

In Case No. 13,945, Occidental Permian Limited Partnership ("Occidental") seeks cancellation of the APD issued to EOG, and a determination that only Occidental has the right to drill. EOG asserts that it owns a working interest in the well unit, has the right to drill, and that a compulsory pooling order should be granted. Thus, Occidental's application should be denied.
