

Partners

In all partner states:

- major universities
- geologic survey
- other state agencies

as well as

- Western Governors Association
- five major utilities
- seven energy companies
- three federal agencies
- the Navajo Nation
- many other critical partners

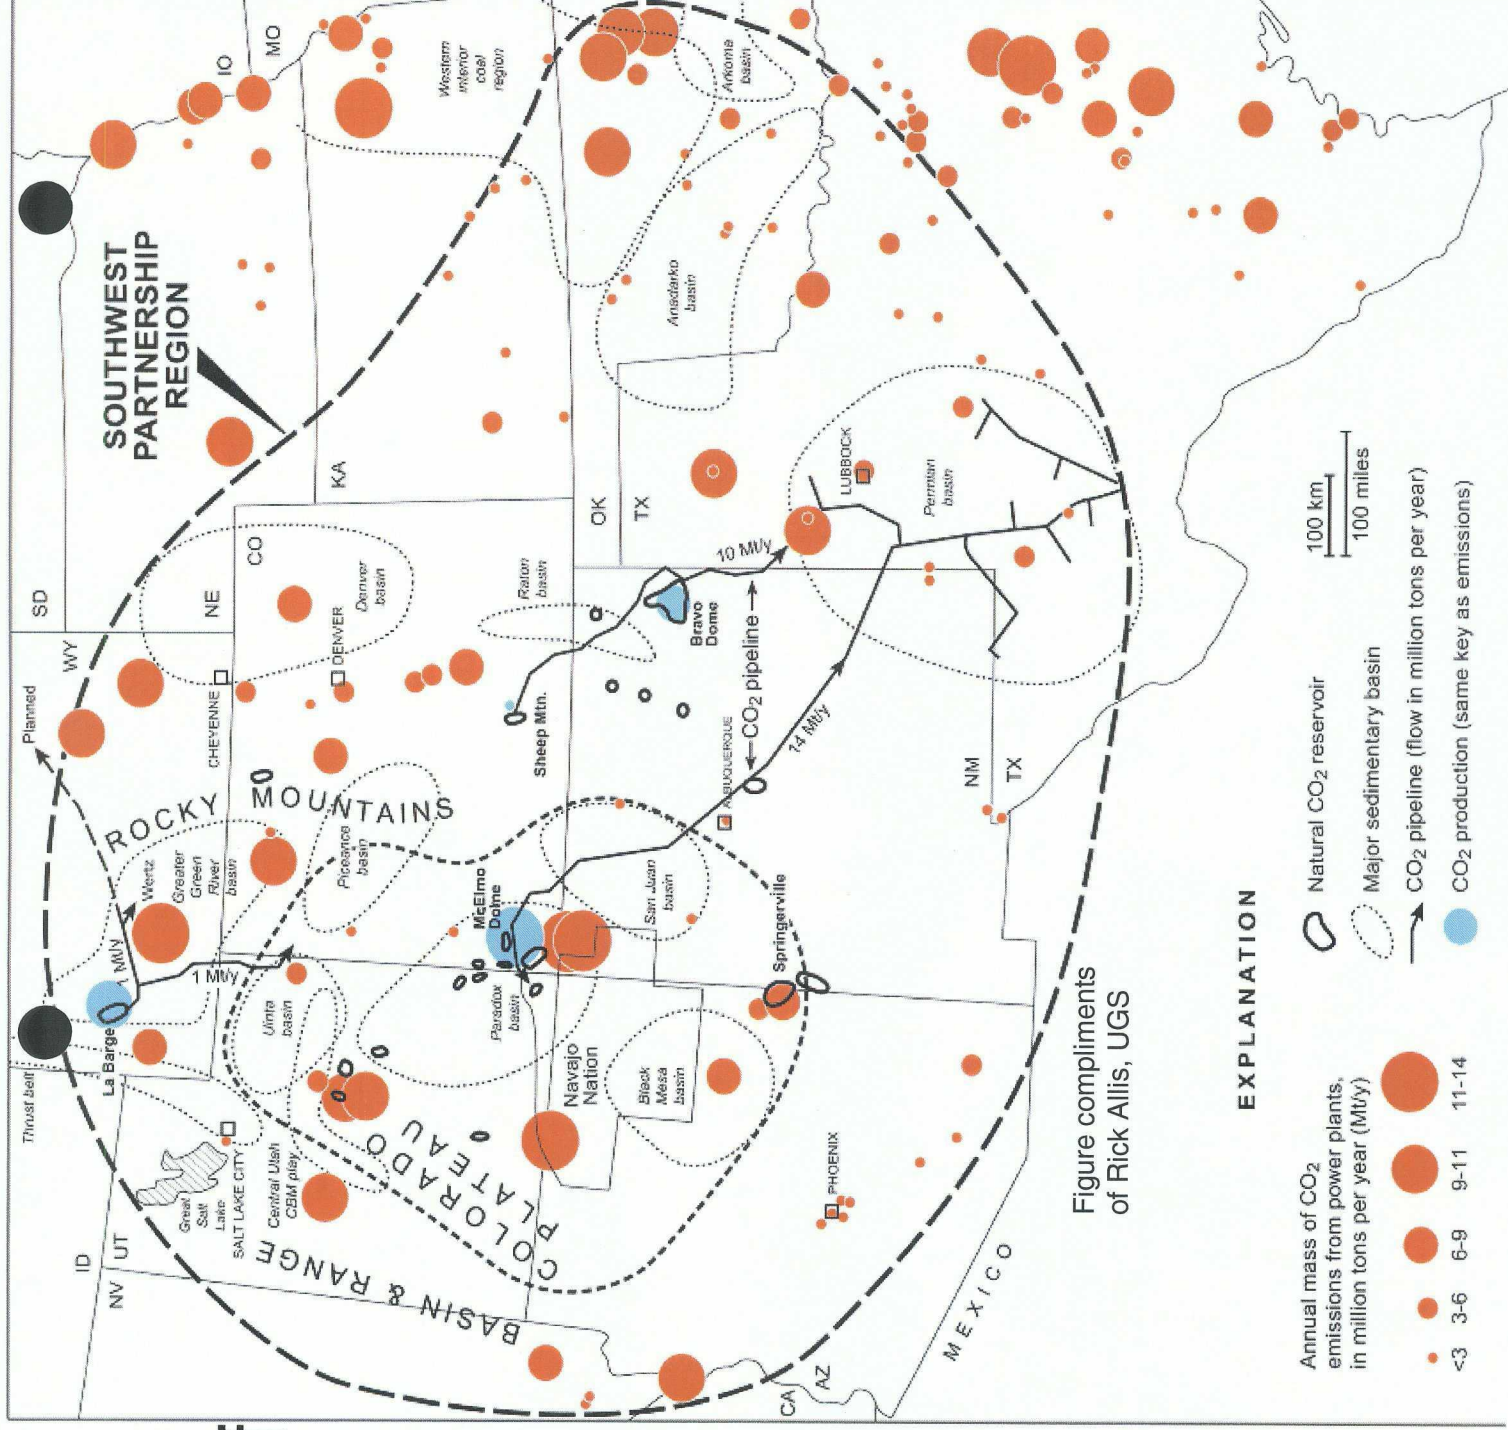

Southwest Partnership

- Phase I Regional Characterization 2003-2005
- Phase II Pilot Demonstrations 2005-2009
 - COP initial meeting – 2-8-05
 - Workshop – 10-21-05
 - Phase II kickoff – 12-14-05
 - Project meeting – 8-1-06
 - Annual SWP meeting – 9-28-06
 - Project meeting – scheduled for 7-25-07
- Phase III Full Scale Deployment 2009-2019

General Map of Sources and Pipelines

- electrical power plants
- cement & other plants
- urban centers
- non-point sources (agriculture, automobiles, etc.)

Total regional point source emissions
~10⁸ t/yr.

Project Portfolio

Four of over 100 geologic options were selected as the most promising opportunities for evaluation:

(3) combined enhanced coalbed methane production and sequestration testing, San Juan Basin, NM
