

# Additional Drilling Potential

## (80-acre to 40-acre)

Additional Economic New Drills to Get to 40-Acre Spacing from 80-Acre  
028N007W to 027N004W (Excluding Rincon Unit)

# Scoping Study Conclusions

- 40-acre infilling seems possible with reasonable assumptions of future gas price (\$5 - \$10/Mcf)
- Overlapping Dakota and Mesaverde potential in Southeast Federal Units (SEFU)
- Recommended infill pilot area in NW/4 SJU 27-5
