Case 14145

Re: Application of Fasken Oil and Ranch, Ltd.
for An Order Requiring Cimarex Energy Co. of Colorado
To Shut-In Certain Overproduced Wells and to Makeup
All Overproduction, Lea County, New Mexico

Dear Mr. Fesmire:

On behalf of Fasken Oil and Ranch, Ltd, please find enclosed our referenced application for an order to shut-in four overproduced wells operated by Cimarex. I request that this case be set for an Examiner's hearing on the June 26th docket

Very truly yours,

W. Thomas Kellahin

cc: Fasken Oil and Ranch, Ltd.
Attn: Jimmy Carlile

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**IN THE MATTER OF THE APPLICATION OF
FASKEN OIL AND RANCH, LTD FOR AN
ORDER REQUIRING CIMAREX ENERGY CO. OF
COLORADO TO SHUT-IN CERTAIN OVERPRODUCED WELLS
AND TO MAKE UP ALL OVERPRODUCTION
LEA COUNTY, NEW MEXICO**

Case 14145

APPLICATION

Fasken Oil and Ranch, Ltd. ("Fasken") by its attorneys, Kellahin & Kellahin, applies to the New Mexico Oil Conservation Division for an Order requiring Cimarex Energy Co. of Colorado ("Cimarex") to shut-in four over-produced Bones Spring wellbores and to make up all overproduction.

And in support states:

(1) Fasken and Cimarex are operators of oil wells producing from the Apache Ridge-Bone Spring Pool (ID#2260) located in parts of Section 36, T19S, R33E and Sections 30-32 of T19S, R34E, Lea County, NM

(2) The Apache Ridge-Bone Spring Pool is subject to 40-acre spacing units and Division Rule 505 limits production to not more than 275 BOPD with a 2,000-to-GOR limit for a 40-acre spacing unit.

(3) Cimarex operates four wells in this pool that are substantially over-produced by a total of 48,640 barrels of oil, based on the most current data available:

- (a) Mescalero 30 Federal Well No. 1 (API 30-025-29266)
(Unit P) Sec 30, T19S, R34E Overproduction of 10,191 bbls
- (b) Pennzoil 36 State Well No. 1 (API 30-025-29918)
(Unit I) Sec 36, T19S, R33E Overproduction of 5,692 bbls

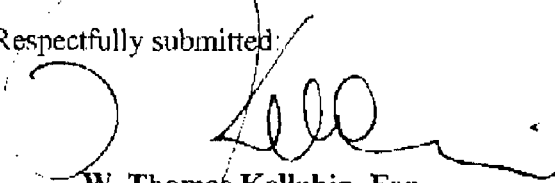

- (c) **Pennzoil B 36 State Well No. 2 (API 30-025-38300)**
(Unit J) Sec 36, T19S, R33E Overproduction of 19,440 bbls
- (d) **Pennzoil B 36 State Well No. 7 (API 30-025-38624)**
(Unit A) Sec 36, T19S, R33E Overproduction of 13,317 bbls

(4) Fasken's correlative rights are being violated by Cimarex failure to comply with the Division's oil proration rules.

(5) Further, Fasken seeks relief of current over production of the depth bracket allowable by immediate shut-in of the Cimarex operated wells over produced in the Apache Ridge-Bone Springs Oil Pool. Fasken requests the shut-in period be determined by the cumulative over produced oil volume divided by the most recent month daily oil rate or the current depth bracket allowable, whichever is lesser.

Wherefore, Fasken requests that the Division enter an Order directing that Cimarex Energy Co. of Colorado shut-in these four wells and to bring these wells into full compliance with Division Rule, including Rule 502, by a date certain.

Respectfully submitted:

W. Thomas Kellahin, Esq.

Total Overage:						1811 bbls

NOTE 2: Cimarex shows to have added this same Bone Springs Interval in the Pennzoil 36 State No. 2 (30-025-35971) on April 9, 2008 (as shown in attached X-Section). This well is located in the same 40 acre spacing unit as this Pennzoil B 36 State No. 7 (as shown in attached map). The completion report data that we have received ends on April 14, 2008, so we do not know what production rates this zone is contributing to this 40 acre spacing unit.
