Re: Carter Estate #1
Lea Co., N. Mex.
N-32-17-39

Dear Mr. Stamets:

We would like to request that our unorthodox location approval granted under Order #R-7220 for an 8,100' Abo Test be amended to reflect the actual producing formation which turned out to be the Yeso formation @ 6,410'. Mr. Kautz, at the District 1 office in Hobbs, after reviewing our log on the well, informed us as to which formation we would have to call it, which was the Yeso.

Your assistance in this matter would be greatly appreciated.

We have written a letter to Mr. Anderson Carter, who is the offset operator to the southwest, to inform him of our proposal to amend our original order.

Thank you.

Very truly yours,

Dear Mr. Carter,

This letter is to inform you of our request to the Oil Conservation Commission to amend our unorthodox location approval order #R-7220 for the Carter Estate # 1. The amendment would reflect the correct name of the producing formation, which was found to be the Yeso formation.

Our original approval order was granted for an 8100' Abo Test, however, no productive horizon was encountered at that depth, so we came up the hole to 6400' where we made a producer in the Yeso. Now it seems our original order must be amended to reflect this.

If you have any objections to our application to amend the original order please contact Mr. Richard Stamets in Santa Fe at 505-827-5802.

Very truly yours,

A handwritten signature in dark ink, appearing to read "Bill Chas. Hatchett", with a long, sweeping horizontal line extending to the right.
